Combines rolled again this week after frequent interruptions by rain.

Area wheat farmers cautioned

EPHRATA - Pennsylvania's wheat harvest is at a critical stage. In most areas of the state wheat is being marketed heavily and is of excellent quality. But this has not been the case in Southeastern Pennsylvania where continual wet weather has hampered harvesting and added to the potential for scab and sprout damage. In addition there may be some withholding by farmers in trying to sweat out the full implications of another Russian grain purchase.

To assist growers in attempting to identify wheat scab, Penn Ag Industries Association has extracted the following material from a USDA book entitled Plant Diseases. While scab can occur on other grains, this reference only applies to wheat.

"Fusarium head blight, or scab (or tombstone) is a disease of wheat which occurs most frequently in the eastern and central Corn Belt in humid areas. The head blight develops at any stage from kernel formation to ripening of the grain. Infection occurs in the flowers and then spreads up and down the spike. The diseased part of the head soon turns a straw color. Frequently pink mold growth develops around the base of the flower and cements the chaff to the grain. The kernels are shrivelled, white or gray and show a rough scabby surface.

"The fungus grows into the kernels and makes the starch floury, discolored and partly changed to sugars. The proteins are partly broken down into soluble nitrogen compounds. Some of the fats become rancid because of the formation of fatty acids. New compounds are produced that cause acute vomiting in hogs, dogs and man, but do not affect sheep, cattle or mature poultry. 5 percent infected grain can cause vomiting in hogs. Scabbed kernels in grain therefore should not be processed into human food or used to feed swine. Scabbed kernels can readily be separated from sound

Lid scarcity scaring orchardmen

By Dieter Krieg

HANOVER — Orchardmen in western York County and eastern Adams County report that they may have approximately 10 percent more fruit to handle this year, as opposed to a year ago, but that doesn't mean they'll make more money - or even as much of it. Why? Because, like those engaged in other segments of agriculture, they are caught between rising costs and a price structure which gives them "whatever somebody wants to pay."

Furthermore, the fruit growers claim they are victims of the so-called "canning - lid shortage or conspiracy," since sales will decrease drastically if housewives can't find the materials to do their canning. The recent increase in sugar prices - just in time for the canning season - may also hamper sales a bit. Production costs, meanwhile, have risen 20 percent.

Stuart Lucabaugh, an Adams County grower who has been in business since 1948, says he can't see any reason why his costs should be going up so much while prices he's receiving are coming down. He added that orchardmen should receive the same price as last year. Sweet cherries, for example, sold for 20 cents a pound a year ago, compared to 10 cents per pound this year. In grocery stores the going rate is around 79 cents per pound. Lucabaugh said the price of cherries may go up to 12 or 15 cents a pound later this year.

Soil conservation day held

By Dieter Krieg

COLUMBIA — The Soil Conservation District held its annual field day here last Tuesday on what turned out to be one of the most perfect days of the year. Instead of showers, or sweltering heat, the weatherman came through with clear blue skies, abundant sunshine, and high temperature of 83 degrees.

Held at the Howard Long farm, the field day featured a plowing contest, land judging competition, and even a pig and rooster chase. Approximately 40 persons were present for the activities.

Capturing first places in contour plowing and level land plowing were Frank Burkhart and Richard Binkley, respectively. Burkhart, from Silver Springs Road, Lancaster, amassed 495 points in his bid for qualification to the state plowing contest which takes place next month at the Ag Progress Days in Mercer County. The Lancaster County farmer is no stranger to state competition, having been there last year and in 1970, coming back both times with state honors. Second place, with 461 points went to Glenn Burkholder of Washington Boro.

Binkley, Columbia R2, tallied 458 points in the level land plowing event, followed by Harvey Sauder of New Holland with 420 points. The

Ray Moyer

Lebanon youth enjoys dairy projects

LEBANON - Ray Moyer is a Lebanon County youth who has been interested in dairy operations since he first began FFA project work three years ago.

Ray, who is the son of Mr. and Mrs. Albert Moyer, Lebanon R4, helps out on his parents dairy farm where they are presently milking some 65 head of Holsteins.

"My brothers had dairy projects before me and I guess it was just natural that I should chose it too."

Along with taking the dairy projects, Ray has been a member of the dairy judging team from Cedar Crest High School that competed for honors at State FFA Days and has won county and state awards for his dairy record books.

The Lebanon County youth has shown his dairy animals at the Lebanon Fair and at several district and regional shows. A member of the Cedar Crest 4-H Dairy Club also, Ray has also taken heifer and cow projects in that area.

Although dairying has been his primary interest, Ray also enjoys raising corn for FFA work. Last year the young man planted five acres of corn and used it as feed later in the season.

Ray recently represented Cedar Crest High School and Lebanon County at the National FFA Leadership Convention held in Washington, D.C. Since he will be serving his chapter as the sentinnel next year, Ray appreciated the opportunity to learn more leadership skills at the event.

"I enjoyed the program," Ray noted, "but I especially enjoyed meeting the national officers and people from other states."

"We not only learned about leadership for FFA but

Eastern PA & NJ

Live Hen Report
Wednesday, July 23

Prices trended lower within an unchanged range on light type hens. Offerings more readily available for a fair demand as one processing plant temporarily closed. Offerings of heavy type hens barely adequate for a fair interest.

Prices paid at farm: light type hens 4-6½, mostly 6 in PA, mostly 5-6 in NJ. Heavy type hens TFEWR.

Baltimore Eggs

Wednesday, July 23

Prices advanced 1 to 3 cents. Demand irregular, but generally fair. Supplies are adequate and in good balance with needs.

Cartoned eggs: prices to retailers, state graded (min one case sale).

White Grade A Large 60-66, mostly 60-63 Grade A Medium 49-57, mostly 49-52.

Delmarva

Broiler-Fryer Market
Tuesday, July 23

Ready to cook movement continues fairly good. Slaughter schedules about steady. Today's less than trucklot asking prices held unchanged to 1 cent higher on both plant and US Grade A. Advance interest slow in developing. Live supplies adequate at most desirable weights. Undertone fully steady to firm.

Current broiler-fryer negotiated prices for immediate delivery mostly multiple-drop shipments to New York City from Delmarva.

Range: US Grade A 49-50; Plant Grade 48-49½; Premium US Grade A 51-54; Premium Plant Grade 50-52.

Wtd. Avg.: US Grade A 49.51; Plant Grade 48.52; Premium US Grade A 53.46; Premium Plant Grade 51.90.

NEW ENGLAND WEEKLY SHELL EGG REPORT

Tuesday, July 22, 1975

+Includes Central and Western Sections Only.

NEST RUN EGGS

Prices are from Egg Clearinghouse, Inc., (ECI) Durham, N.H. and reflect trading prices for gradeable nest run eggs (GNR) on ECI, a nationwide trading center for producers, packers and marketers. GNR eggs are classified by weight in 30-dozen cases, and traded in lots of either 300 or 750 cases. Prices are FOB buyers dock, and are computed Tuesday and Thursday of each week. This week's prices for each classification were:

Classification	New Weight Per Case	Tuesday	Thursday
Extra Large	51 lbs.	0	0
Class 1 - Large	48 lbs.	48	51
Class 3 - Medium	42 lbs	37	39
Class 4 - Small	39 lbs.	30	30
Breaking Stock	48 lbs.	39	40
Checks	48 lbs.	34	34

Fogelsville

Sale of
Tuesday, July 22

Prices paid dock weights, cents per pound, except where noted.

Hens, heavy type 12-21, mostly 15-20; Pullets 44-51, mostly 44-47; Roasters 22-47; Ducks 47-61; Geese 46; Turkeys - Hens 46; Rabbits 20-50, mostly 45-47; Pigeons (per pr.) 85-3.65.

Total coops sold 237.

Poultry received Monday 7 p.m. to 10:30 p.m., Tuesday 7 a.m. to 12 Noon. Sale at 11:30 a.m.

Directions — Take Rt. 222 thruway. Exit at Fogelsville exit. North to stoplight in Fogelsville, turn left, proceed one mile.

Philadelphia Eggs

Wednesday, July 23

Prices unchanged to higher on all sizes. Cartoning demand fairly good under influence of extensive features. Offerings adequate though generally confidently held in most quarters.

Prices to retailers: sales to volume buyers, consumer grades white eggs in cartons, delivered: store door A Extra Large 57-62½; A Large 56-61½; A Medium 45-48½.

Fritz Kroeck

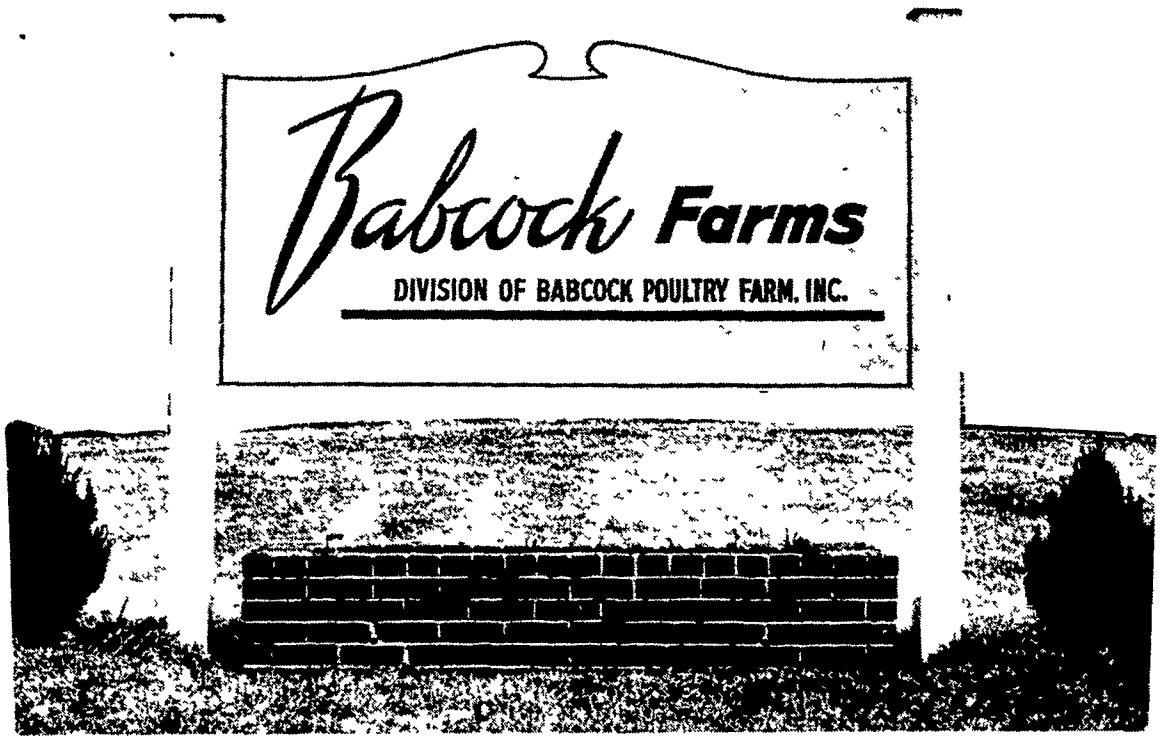
Wilmer Esbenshade

These two Babcock Farms employees are our very valuable jack of all trades. These men perform in numerous job capacities for us and their contribution to the overall success of Babcock Farms is great.

Fritz Kroeck, who is wearing the neat bow tie, is 78 years young He has been a Babcock Farms employee for 8 years and we appreciate his enthusiasm and meticulous approach to his work.

Wilmer Esbenshade is a 4 year employee of Babcock Farms Wilmer may be delivering chicks to you one day and assisting in hatching chicks the next day. He is another skilled employee of Babcock Farms

"The Sign of Quality"



Babcock layers began setting world records in the late 1930's and early 1940's. These records were set in the Record of Performance tests that were the early comparisons of breeding results prior to today's Random Sample tests.

Our 1975 Babcock B-300 layer has the ability to produce more **marketable eggs** on **less** feed over a **shorter** lay period than her record setting counterparts of the late 1930's.

The poultry businessman of today knows that feed consumption is extremely important to his profits The 1975 Babcock 300 layer will produce more **marketable eggs** because she has stronger shells The right "package" for poultry profit potential is Babcock B-300 layers from Babcock Farms *May we have your next order for chicks or started pullets?*

Receipts 9,000, Last Week 10,000, Year Ago 7,300. Compared to last Tuesday, Slaughter Steers and Heifers very uneven, steady to mostly 1.00 lower. Demand continues light for Good Grade Steers under 1000 lbs. and Good Grade Heifers under 850 lbs. Cows 1.00-2.00 higher. Bulls mostly 1.00 lower. Supply near 40 percent steers, Good and Choice 900-1100 lbs. Yield Grade 2-4 with near 22 percent Slaughter Heifers; Cows 15 percent and Feeders 20 percent.

SLAUGHTER STEERS: Load Choice including Prime 1175 lbs. Yield Grade 3-4 52.50 on Monday. Choice 1000-1300 lbs. Yield Grade 2-4 47.00-51.00, load 51.75 on Monday. Mostly Choice 900-1050 lbs. 45.00-48.00. Mixed Good and Choice 900-1200 lbs. 43.00-47.50. Good 40.00-44.00; mostly Good 800-1000 lbs. 38.00-42.00. Two loads mostly Good Holsteins 1250 lbs. 39.00. Standard and Good 1000-1200 lbs. 30.00-37.25, mostly 34.00-36.00. Part load Standard 975 lbs. 28.00.

SLAUGHTER HEIFERS: Load and part load Choice including Prime 900-950 lbs. Yield Grade 3-4 46.50-47.00. Choice 850-1050 lbs. Yield Grade 2-4 43.00-46.00, closing mostly 43.00-45.00. Mixed Good and Choice 800-1000 lbs. 41.00-44.50. Good 37.00-42.00. Standard and Good 650-900 lbs. 32.00-36.00.

COWS: Utility and Commercial 18.00-22.00, few 23.00. Cutter 15.00-19.00. Canner 12.00-15.00.

BULLS: Yield Grade 1-2 1100-1600 lbs. 21.00-25.00, thin 900-1100 lbs. 18.00-22.00.

VEALERS: Good and Choice 20.00-30.00, few 32.00.

FEEDERS: Including near 1300 at Thursday auction. Steers 1.00-2.00 higher, Heifers 2.00-4.00 higher. Supply mainly Good and Choice 500-900 lb. steers and 300-600 lb. heifers, also a moderate showing Standard and Good 400-600 lbs. steers including many lots Bulls.

STEERS: Choice 400-600 lbs. 28.00-33.75, one consignment pre-conditioned 517 lbs. 36.25. Choice 600-700 lbs. 30.50-36.00; 700-900 lbs. 34.75-37.25. Mixed Good and Choice 500-700 lbs. 24.75-30.00. Good 375-600 lbs. 20.00-26.75; 600-871 lbs. 18.00-22.75.

HEIFERS: One consignment Choice 200 lbs. 25.25; mostly Choice 400-600 lbs. 24.75-30.00; Twp. lots 696-745 lbs. 34.00-34.75. Mixed Good and Choice 300-400 lbs. 19.00-24.00; 400-550 lbs. 20.25-24.50. Good 350-525 lbs. 17.00-19.50.

TRY A CLASSIFIED

New Holland Dairy

Wednesday, July 23

Reported receipts of 97 cows, 21 heifers and 2 bulls. Market steady with last week.

Load of Maryland springers 300-660; load of Pa. cows fresh 330-505; springers 365-550 and fresh 315-690. Local cows 300-780; open heifers 185-265; bred heifers 290-380; bulls 200-360. Small herd dispersal of 20 head in all stages of production 275-520.

Local Grain

Thursday, July 24

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, July 24, 1975 are as follows:

	Buy+	Sell+
Ear Corn	69.00	75.50
Shelled Corn	2.98	3.21
Oats		
Local	1.60	1.87
Western	1.88	2.08
Barley	1.67	1.89
Wheat	3.08	3.30

+Buy is the price the dealer will buy from the farmer delivered to the mill. Sell is the price the dealer will sell for at his mill.

Layer production down

HARRISBURG - Pennsylvania layers produced 266 million eggs during June, 5 percent less than the previous month and 7 percent less than a year earlier, according to the Crop Reporting Service.

The June average of 13.1 million layers was down almost 1 percent from the previous month and down 8 percent from a year earlier.

Egg production per 100 layers during June totaled 2,025 eggs, down 4 percent from the previous month but up 1 percent from a year earlier.

The nation's laying flock produced 5,211 million eggs during June, 4 percent less than a year earlier. Layer on hand during June averaged 270 million, down 4 percent from a year earlier. The average rate of lay during the month was virtually the same as a year earlier.

Use the Farm Calendar To Publicize Your Meetings.

Active combining of grains

HARRISBURG - Small grain combining was active throughout Pennsylvania for the week ending July 14, according to the Pennsylvania Crop Reporting Service.

Barley is reported 38 percent ripe and one-third harvested, about four days behind 1974. Combining is 17 percent done in the north, 20 percent in central and 55 percent done in southern counties. Lodged barley continues to plague those attempting to combine.

Wheat is reported at 37 percent turning, 54 percent ripe and six percent harvested, also behind 1974 by four days. Harvest has barely begun in the northern and central counties, but is reported 13 percent done in southern counties. Wheat lodging has become a problem.

Oats are rated at 31 percent turning yellow and two percent ripe - same as in 1974. Ripening is furthest along in the south at five percent.

The first cutting of alfalfa hay is 95 percent complete and the second nearly one-fourth done statewide. First cut clover-timothy hay is reportedly 83 percent complete. Hay quality continues to be rated mostly fair. The rating is somewhat better than the previous week but not as good as this time the previous two years.

Corn is now three feet tall statewide, a foot higher than last week and two days ahead of 1974 progress. Height is 31 inches in the north, 39 inches in central and 41 inches in southern counties.

Tobacco transplanting has finally been completed. The tobacco crop is reportedly growing well.

Soil moisture is still rated adequate statewide. Moisture is reported shortest in the north to wettest in the south. Rain the past few days may be expected to accentuate the problem in the southern area.

The harvesting of sweet corn has begun and the cherry harvest is continuing. Some early tomatoes are nearly ready to pick. Harvest of snap beans is underway.

An average amount of feed continues to be derived from pastures.

In the United States for the week ending July 6, heavy rains in the southern Red River Valley of North Dakota and Minnesota caused wide-spread flooding, erosion and drown-out of crops.

Winter wheat harvested gained momentum and combining of the 1975 crop has passed the half-way mark. This is still behind the excellent progress in 1974 of 65 percent done.

In the north central states average height of corn ranged from 55 inches in Illinois to 27 inches in South Dakota. The corn crop is five percent tassled in Iowa, five percent silked in Indiana and 10 percent silked in Ohio. This is one week ahead of normal.

Pa. vegetable grower supports direct marketing

WASHINGTON, D.C. - More Direct Marketing would benefit both consumers and producers, a National Farmers Union witness told the House Agriculture Subcommittee on Domestic Marketing and Consumer Relations Wednesday.

David Zachrel, a vegetable and grain farmer from Clarion County, Pennsylvania, told the Subcommittee that "consumers would gain benefits in improved quality of farm produce, savings over retail chain store costs, and the educational and recreational experience of 'pick your own' buying of fruits and vegetables.

"Farmers, in turn, would receive greater returns through direct marketing of their crops to help off-set increasing production costs. During the month of May, "Zachrel told the Subcommittee, "farmers received, on a national average, only 34 cents out of each dollar paid by the consumer for fresh fruits and vegetables."

The Subcommittee is considering legislation (HR 7488), introduced by Chairman Joseph Vigorito (D-Pa.), to assist farmers in organizing more direct marketing facilities, whether they be roadside stands, permanent marketing facilities, or cooperative farmer-consumer enterprises to compete directly with retail food chains.

Beekeeper

Effective July 15, the U.S. Department of Agriculture (USDA) will no longer make Beekeeper Indemnity Program payments on queen bee nuclei losses which occur between August 15 and December 31 each year, according to Paul H. Keeney, Chairman of Berks County Agricultural Stabilization and Conservation Committee. (Queen bee nuclei are miniature colonies used in the production of queen bees for sale.)

USDA has also changed the final date for adjusting the degree of loss on bee colonies from November 1 to October 1.

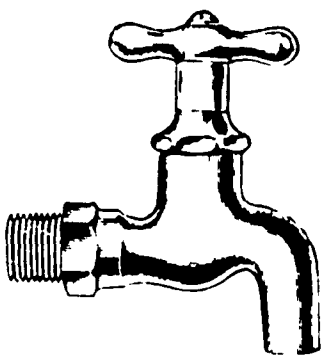
THE OLD FARMER'S ALMANAC

JULY 28 - AUG. 3, 1975

As the days shorten, the heat'll scorch 'em.

Now's the time for a hammock in the shade . . . Wild Bill Hickok assassinated Aug. 2, 1876 . . . Last quarter of the moon July 31 . . . Average length of days for the week, 14 hours, 33 minutes . . . Grasshoppers invaded S.D., Nebraska, and Iowa, July 28, 1931 . . . First Masonic Lodge opened in Boston, July 30, 1733 . . . Diamonds found in Arkansas this week in 1906 . . . Good china, like a good reputation, is easily cracked.



Old Farmer's Riddle: What has one foot at each end, and a third foot in the middle? (Answer below.)

Ask the Old Farmer: My grandfather used to say he could tell it was going to rain by the sound of a distant train. I was too young to disbelieve him. Any truth in what he said? H. D., Grand Forks, N.D.

He was right. When distant sounds are loud and hollow, look for rain. Lowering cloud ceiling acts like a sounding board.

Home Hints: After your next painting job, wash your paint roller with a fabric softener. The roller cover will dry soft and fluffy, just like new . . . *Riddle answer:* A sandwich

OLD FARMER'S WEATHER FORECASTS

New England: Somewhat cloudy all week, with intermittent rain and thunderstorms; cool temperatures at week's end.

Greater New York-New Jersey: Most of week partly cloudy and quite warm; rain latter part, then clearing by weekend.

Middle Atlantic Coastal: Week begins with fairly heavy rain in west, then clearing and very hot by midweek; heavy rains in north, clear and hot weather in south and central by week's end.

Piedmont & Southeast Coastal: Partly sunny and hot to start, then moderately heavy rain in north and south; week ends with partial cloudiness and showers in central and south.

Florida: Early week sunny in central and north, cloudy in south; general cloudiness and hot latter part, with showers in central on weekend.

Upstate & Western N.Y.-Toronto & Montreal: Partly cloudy with intermittent showers most of week; partly clear in south latter part.

Greater Ohio Valley: Cloudy with rain to start, then partial clearing; partly cloudy again with highs near 90.

Deep South: Week begins partly cloudy and very warm; light showers in north and east, then partial clearing latter part.

Chicago & Southern Great Lakes: Cloudy and very hot at first, with showers in west, then gradual clearing, slightly cooler temperatures by week's end.

Northern Great Plains-Great Lakes: Early week slightly cloudy and cool with scattered showers; end of week very hot, with thunderstorms in central.

Central Great Plains: Week starts with rain in east, north and central; latter part cloudy, but clear on weekend, except for some showers in south.

Texas-Oklahoma: Week begins clear and very hot in central and south, showers in north, partly cloudy with scattered showers latter part.

Rocky Mountain: Clear and cool, then clouding up with showers in south, end of week clear and warmer in central and west, cloudy in east with rain.

Southwest Desert: Cloudy with thundershower activity and highs near 110 to start; week ends with gradual clearing, high temperatures.

Pacific Northwest: Early part of week partly cloudy and cool, rain in north by midweek, clearing, then clouds and rain again in north.

California: Clear and hot to start, some morning clouds along coast, some light drizzle and partly overcast latter part, clearing and hot again by weekend.

Wheat farmers cautioned

(Continued from Page 1)

wheat.

"Pathogens are carried over on crop residues. All straw and stalks should be plowed under and left below soil surface to control the disease. All known varieties of wheat will be scabbed if spores are present and weather is favorable."

To this we might add the observations of a USDA official that scab is easily identified by the off-white or granite color of the kernel. The kernels are very low in test weight and may be eliminated during harvest by turning up the aspirator on the combine - although without plowdown afterward, the diseased kernels will undoubtedly reinfect the field.

In the case of sprout damage the condition is one of over ripeness in which the seed is beginning the growing process. Sprouts appear at the germ end of the kernel and cause a darkening. However, the sprouts may be knocked off in harvesting. Cutting the germ end with a razor will disclose the interior of the kernel to be yellow and not white.

Opinions differ as the the maximum acceptable level of sprout damaged grain before flour quality is affected - some say 10 percent, others 15 percent. The ultimate use of the flour will have much to do with the limit. However, it is certain that once sprouting occurs, the standards on which flour quality are based are altered.

Both sprout damaged and moldy or diseased kernels are classified as "damaged kernels" in the U.S. Grain Standards and the following are the maximum percentages of damaged kernels (total) for each grade; No. 1 - 2 percent; No. 2 - 4 percent; No. 3 - 7 percent; No. 4 10 percent; No. 5 15 percent. Above these levels wheat is classed as "Sample" grade.

PLUTO

Pluto is the most distant planet in our solar system It was discovered in 1930 and in Pluto's 248-year orbit of the sun the planet has never come closer than 2 6 billion miles to Earth

Local auctioneers participate in Keeneland sale

Paul Z. Martin, well-known auctioneer and horse fancier from Blue Ball and his son Vernon Martin of New Holland recently participated in the famous Keeneland Sale of yearling thoroughbred horses.

The Martins were present at the sale as spot bidders and reported that the event grossed some 18 million dollars.

The sale is held annually and offers only the most select yearling race horses. Some 340 head were offered on the block with the top selling animal selling for $715,000. The yearling was from the famous Clairborn Farms and was consigned by E. B. Hancock III. Other top selling animals ranged from $500,000-275,000.

Paul Martin got involved in working the sale several years ago after meeting the auctioneer George Swinebroad at a horse sale. Eight years ago, Vernon Martin was also selected as a spot bidder and has been going to the prestigious sale ever since.

The auctioneering staff is now under the direction of Tom Caldwell of Ontario, California. Spotters from other portions of the country are also hired for the sale.

While the actual sale was exciting for the Martins, they have another thrill in store, as the CBS television network will be televising a video tape of the sale at 6:30 p.m. this Saturday evening.

Wheat causing confusion, concern

By Dieter Krieg

LANCASTER — With hot and reasonably dry weather finally arriving in the area, wheat growers in southeastern Pennsylvania wasted no time in climbing aboard their combines and are at long last bringing in their crop.

As noted in a story on page one, the wheat situation is critical, and millers did report instances of diseased wheat arriving at their facilities. Don Parks of PennAg Industries, who released the news item, added in a telephone interview that out of 11 grain samples sent to USDA for testing, seven had evidence of tombstone blight.

Tests showed that the samples were affected with the disease up to a level of 2½ per cent. "The literature indicates that a five per cent level is dangerous," Parkes noted. He emphasized his concern over these developments, adding that the danger could increase even further if wheat is stored and toxic substances develop. He cautioned farmers who are thinking of feeding their feed to livestock and poultry.

This week's survey of the wheat harvest indicates again that yields are lower — in some cases a loss of 40 and even 50 per cent is reported. Test weights are also lower, approximately 40 to 45 pounds per bushel.

A spokesman from Pennfield's York mill estimated that 40 per cent of the wheat in his county is still out. While damage is widespread, the amount of sprouting and disease reported is not too serious at this point. The spokesman believed 90 per cent of the crop could still go for flour.

Commenting on the incidence of disease in York County fields, the spokesman said "there's quite a bit of it around." He observed that York County farmers had cut wheat prior to the Fourth of July, and the crop showed damage even then and was light in weight.

Lancaster County millers are requesting that farmers dry their wheat. One miller expressed surprise that damage of wheat coming to his mill was not more severe. "It is not as much as we expected," he said. However, it is considerably lower in weight, shrinkage, yield and quality than normal.

The wheat harvest in Lancaster County is expected to average approximately 40 to 50 bushels per acre, according to reports received by Lancaster Farming. About one third of the fields remained unharvested on Thursday, estimates indicated.

Another York County miller described the wheat coming to his mill as being "very poor" — low in weight and high in moisture. "We wanted to be very particular about what we take," he continued, "and we didn't want to be taking wheat that's sprouting, but we had to." He opinionized that the southern parts of the county were in worse shape than northern sections. "We can't get a lot of it," he said disappointedly.

Farmers are in a state of confusion, according to some grain handlers, because they're faced with refusals at the mill and seed outlets. Early varieties of wheat are reportedly hardest hit. "The longer you let it go, the worse it's going to get," the dealer concluded.

Elected to the office of sentenniel at Cedar Crest High School FFA, Ray will be making sure that the transactions are carried out properly.

Ray Moyer, an FFA'er from Cedar Crest High School in Lebanon, has been active in corn and dairy projects.

[Continued from Page 1]

also about the different clubs from across the country." One of the main discussions of interest to Ray were the many ideas put forth on increasing membership.

Asked what he might consider some areas of FFA that needed improvement, Ray answered, "I think it would be nice to have more projects available for members." "There are a lot more today then before but there are also more interests."

Ray will no doubt be using some of his ideas, gained at the conference, as the new school year begins. For as chapter parliamentarian, the youth will be asked to make sure that all transactions are carried out in the proper and correct manner.

Until school begins, however, Ray will continue working on his parents dairy farm.

Which Farm Ventilating Fans Use More Electricity Than Others?

You know that electricity costs money You also know the importance of saving money and energy today

But, did you know that not all ventilating fans are created equal? Even with the same air moving capacity some use more electricity than others.

How much more electricity one make and model ventilating fan will use when compared to another can be measured by cubic feet of air per watt

We have the efficiency report on five major manufacturers of ventilating fans. Send the coupon below for your free copy!

Farm Commentary

By: Dieter Krieg

Life on the farm

By: Dieter Krieg

Boy, it was hot! It was the kind of day that was good for making corn grow or for dipping into the pond. Wearing no shirt, the sun sizzled on my tanned, perspired back as I walked up the long slope towards where the cows were loafing. The tall grasses of the pasture made walking a chore whenever I decided to get off the narrow cowpath which tended to follow the base line of the hiss rather than go straight up. Bugs hopped from stem to stem as I disturbed their feeding and frequently protested by buzzing within inches of my face

While it was exceptionally hot in open areas, especially on this slope which faced south, the summit, with its many trees, offered abundant shade, a gentle breeze, and a splendid panoramic view of our southern York County farm Pausing for a few minutes to admire the beauty of the day, I sat down on an old tree stump beneath the trees, not far from where the pasture, woods and a big corn field met. A few cows lazily got up and joined me, possibly appreciative that I was sparing them the long walk to the barn for a while.

This was a truly peaceful setting, with trees whispering in the breeze, cows loafing contentedly while chewing their cuds, and the bright afternoon sun giving a special warmth and brilliance to the entire day. Below us, the silver-colored roofs of the farm buildings reflected the sunlight as would so many mirrors.

What caught my attention as much as anything, however, was the field of corn on the other side of the rusty fence and briars. The gracefully-curved, broad leaves of corn, "knitted" together to make a lush, deep green carpet for as far as the eye could see, was an inspiring sight.

Not only does such a field of corn stand as a symbol of the height of summer, it offers a magnificent tribute to the miracles and wonders of nature. And it gives the farmer a special feeling of satisfaction, joy, appreciation and pride

Since shortly after the kernels of corn were placed into the soil, I, like most farmers, used to pace up and down the rows each day to check on the progress of the crop. Often I'd come back amazed by the rate of growth I was observing.

While I admire good crops no matter where they are, the fields at home were always my favorite. Nature's beauty is evident everywhere, but the crops I planted, cared for, and eventually harvested were special. They represented goals, hopes, an investment, and lots of work. The swallowed dust, long hours, breakdowns of equipment, stone picking, and aching muscles were not forgotton. It was a pleasure to overlook the farm and see the crops grow where only a few months earlier there were bare fields.

This year's crop looks better than any I have ever seen before. In the 10 weeks since it was planted, corn has in some fields raced towards the sky at the rate of one foot per week. What was a nursery of tender shoots in mid-May, has turned into a thick forest of 10-foot tall stalks by the beginning of the third week in July.

But all of this dosen't come cheap, and could quickly be destroyed by drought, flooding, insects or frost. The cost of planting 100 acres of corn is roughly equivalent to the price of two brand-new full-sized Cadillacs. And there aren't even any buttons on corn the farmer can push to make it go into the silo automatically.

Fertilizer industry weakened

The multi-billion dollar U.S fertilizer industry which for decades had led the world in production will soon give up its No. 1 position to the USSR and the Eastern Bloc according to Gordon L Berg, editor of Farm Chemicals, published by Meister Publishing Company, Willoughby, Ohio, in his July editorial.

American and other western capital has been used to build Russia into the No 1 fertilizer - producing nation in the world - "in the spirit of detente." USSR is being granted long-term loans on terms that make US businessmen drool Rates on these loans vary, but are lower than the prime rate One deal involving the US Export - Import Bank and a consortium headed by the Bank of America extended $180 million of credit to the USSR to help finance a giant fertilizer complex The Soviets will put up only $40 million in cash

The editorial pointed to a possible oversupply of fertilizer in the years ahead as "a mass transfer to technology, investment capital and production equipment to the Eastern Bloc takes place"

"This is being done on promises to pay at some future date," the editor stressed One of the most publicized American deals is the one expected to go into effect in 1978 Dr Armand Hammer of Occidental Chemical Company made the headlines when he announced that company's plans for USSR several years ago.

"Occidental will literally help locate markets for the Russia giant The company will also assist in finding suitable American companies to bid for supply technology, materials, equipment and services in connection with terminals, ammonia and urea plants, rail tank cars for superphosphoric acid (SPA) and an ammonia pipeline, all for installation in the USSR," Berk explained. "Occidental has the phosphate rock which Russia needs. The former will convert this strategic, unrenewable resource into sale to Russia of 1 million tons of SPA per year for 20 years! In return, for the next 20 years Occidental has agreed to buy yearly 1 5 million metric tons of ammonia, 1 million metric tons of urea, and 1 million metric tons of muriate of potash"

To provide funds for the USSR to repay the Export - Import Bank and consortium of bank loans, Occidental Chemical Company will buy 600,000

(Continued on Page 11)

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

WHO'S GOT THE SPIRIT?

Lesson for July 27, 1975

Background Scripture: Acts 10; 1 Corinthians 2: 1-5; 2 Corinthians 4: 7-16.

Devotional Reading: Acts 10: 34-38.

The Holy Spirit is in the headlines once again. Some Christian speak of the Holy Spirit as if he were a rather recent discovery. For others, it is not only a recent discovery, but a parochial one as well.

Many Christians today are in the position of the little boy who charged the kids in the neighborhood to come in to his backyard to see the eclipse! This same "backyard" mentality is to be found with many religious groups today. They speak of the Holy Spirit as if he were a personal possession, limited to followers of one sect or cult.

"He will guide you . ."

The implication is often very simple: "I've got the Spirit; you do not." So, how do we know if we've "got the Spirit"?

First of all, the above question is all wrong. It is not so much a matter of who's got the Spirit, but whom does the Spirit have? We do not "get the Spirit," so much as the Spirit "gets" us. We cannot control the Spirit of God, we cannot manipulate the Spirit's presence or preformance. This is what Jesus told Nicodemus: "The wind blows where it wills, and you hear the sound of it, but you do not know whence it comes, or wither it goes: so it is with everyone who is born of the Spirit" (John 3: 8).

I am always rather skeptical of those who sound as if the Spirit were under their beck and call.

Secondly, the Spirit is not narrowly confined to the chosen few. The Bible makes it clear that God's Spirit can be found at work in all men, even when they do not recognize or acknowledge the Spirits presence. The Holy Spirit is the presence of God at work within us and there is no one on the fact of this earth who is without God's Holy Spirit.

"Walk by the spirit"

Much more to the point is, not whether we all have God's Spirit in us, but whether we respond to that presence within. As Paul puts it in Galatians, "walk by the Spirit" (5: 16). We may have the Spirit within us, but totally ignore the guidance he would give us. Or, we may allow the Spirit to help us in times of need. Paul assures us that "the Spirit helps us in our weakness" (Romans 8:26) and "interceded for the saints according to the will of God" (8:27).

Finally, the real proof of who's got the Spirit is to be found, not in doctrines, nor in demonstrations of prowess, but in the practical results found in our lives. "By their fruits shall you know them," said Jesus and when he himself was accused of working miracles by the power of Satan, he pointed to the results of his ministry as the verifivation of the work of the Holy Spirit within him. If he defeated the powers of Satan with his works of healing, let no one call the power by which he did these things the "power of Satan." That would be the worst blasphemy of all.

So, how do you know who's got the Spirit? Paul makes it clear: "... the fruit of the Spirit is love, joy, peace, patience, kindness, goodness, faithfullness, gentleness, self-control" (Galatians 5:22). Let no one claim that he has the Spirit until he has also those fruits in his life.

NOW IS THE TIME . . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Be Careful with Herbicide Equipment

There are many kinds of weed killers being used today by the farmer and the home owner. Many of these materials are very hard to wash out of the equipment and may injure the next crop that is sprayed for other purposes. We urge growers to recognize the danger of herbicides such as 2, 4-D sticking in the spray tank or lines for years unless it is removed by special materials such as household ammonia and hot water. Items such as sprinkling cans and small tank sprayers will hold the weed killer and carry some of the material to the next crop. The safest method is to have separate equipment for weed killer materials.

To Prepare for Corn Crop

The corn crop looks very promising and additional storage space may be needed on many farms. This is especially true for those making corn silage. The trench or horizontal silo will provide good storage for extra corn with careful management. Many producers use the horizontal silo for temporary storage and then move the silage to the tower silo later in the winter for automatic feeding. Extra corn cribs may be needed for ear corn storage. The method of shelling the corn in the field at harvest time and then drying before storage is getting more attention on some larger corn growing farms. Plans for corn cribs are available at our Extension Office.

To Clip Pastures

Weather conditions have been very favorable for lush growth of all forage crops and weeds. If the grass has gotten ahead of the livestock, the field can be mowed at this time and the extra growth used for grass hay or for bedding purposes. The mowing at this time will encourage new growth and increase the carrying capacity of the area. Also, if sudan grass or one of the sudan-sorghum hybrids have been grazed by livestock, this field also should be clipped in order to get more uniform growth of the new forage. Good pasture management suggests frequent clippings during a good growing summer.

To Recognize Safety Practices

Many producers are not giving sufficient attention to farm and home safety measures; too many hazards are not corrected. Unfortunately, we have not had much of an educational program on farm safety and most farmers are not interested in giving much attention to the various suggestions of caution. The use of hard hats, ear plugs, respiratory equipment, safety glasses and goggles, gloves, and safety shoes is not very common on most farms. As farming becomes more mechanized with greater hazards, it might be proper to give more attention to some of these things that may cause serious injury or death. More attention to the prevention of farm accidents and correcting the hazards is in order.

Farm Calendar

Saturday, July 28

Ephrata Young Farmers Stream Improvement project at the Cocalico Creek ¼ mile north of Ephrata behind the St. Clements Mission. Project will begin at 8:00 a.m. with lunch at noon.

Monday, July 28

Manheim Young Farmers field meeting on the mechanics of corn breeding.

Tuesday, July 29

Lancaster County 4-H Dairy Shows at the Guernsey Barn Pavilion.

FFA Hog Show at the Lancaster Stockyards beginning at 8:00 a.m.

Wednesday, July 30

Herbicide Field Day at the Southeast Research Center in Landisville at 1:00 p.m.

Thursday, July 31

Lancaster County Holstein Show at the Guernsey Barn pavilion.

Black and White Holstein Show at the Goshen Fair.

Friday, August 1

Entry deadline for the South Central Pa. Dairy Show.

American Viewpoints

The highest compass we can make with our fellow is,--"Let there be truth between us two forevermore"

Ralph Waldo Emerson

Fertilizer industry

(Continued from Page 10)

metric tons per year of ammonium for 10 years. The deal is to start in 1978.

Other nations are also involved in similar fertilizer deals. Japan will export 4 ammonia plants valued at $240 million to the USSR under an agreement between a consortium of 2 Japanese firms and the USSR involving the Export - Import Bank of Japan and Soviet Foreign Trade Bank. There are Franco - Soviet trade packages, and an Italian deal between Montedison and the Soviet.

"Western nations are subsidizing the USSR to build a fertilizer industry which will control 40 percent of world fertilizer production in the next 5 years," Berg continued. "North America now has 27 percent and the USSR-Eastern Bloc controls 30 percent of world fertilizer production. For many decades, the U.S. led the world in fertilizer production. Ten years ago, this nation produced 25 percent of the world's plant nutrients. At that time, USSR was producing slightly over 10 percent. In spite of our growth, the U.S. has been consistently losing in terms of the market share of production.

"In 1974, our share of the total world fertilizer production was less than 20 percent. Meanwhile, USSR production had increased to almost 19 percent of the total. There is little doubt that during the current year the USSR production topped that of the U.S.," Berg warned.

"This trend will continue for the next few years regardless of what action the U.S. takes. This is because of the huge buildup of new capacity now under construction and rapidly being completed in the USSR — with our help.

"Perhaps you are thinking that this is a question of 'international politics' and our industry has no responsibility for delving into this. Not true. It's our future that we're talking about," the editorial concluded. "We can't help but ask - 'in the spirit of detente' - why can't we get a deal like this?"

In short Farm Chemicals feels that the emergence of USSR as the No. 1 producer of fertilizer with long term contracts for the sale of fertilizer to the U.S. is cause for concern. The history of the fertilizer industry in the U.S. is cyclical and building up the Russian capability is bound to aggravate supply cycles.

Chester County Dairy Show winners announced

The Chester County 4-H Dairy Show was held Saturday, July 19 at the Kimberton Fair Grounds. One hundred forty-five head of cattle from six different breeds were exhibited.

In Holstein competition, a two-year old cow shown by Tina Acker, Chester Springs, won grand champion honors. Reserve grand champion Holstein was a three-year old cow shown by Dean Yarnall, Oxford.

Grand champion Ayrshire was a three year old cow owned by Sharon Henley, Cochranville. Her brother, Eddie, won the reserve grand champion ribbon with his four-year old cow.

Stephen Nolan and James Seacrist, both of Birchrunville, won champion and reserve champion honors respectively with their two-year old Brown Swiss cows.

Jeffery Staner, Berwyn, exhibited the grand champion Guernsey, a three-year old cow. A six-year old cow shown by Holly Scheib, Phoenixville was selected as reserve grand champion Guernsey.

In Jersey competition, a four-year old cow shown by Bruce Andrien, West Chester, was selected as grand champion. Cathy Wollaston, Toughkenamon, showed a nine-year old cow, which won reserve champion honors.

Doug Marsh, Sadsburyville showed a one-year old Milking Shorthorn calf that was also named grand champion.

In addition to their cattle being judged on conformation, the 4-H exhibitors were also evaluated on their ability to properly groom, train and show their cattle. Winners in the fitting and showmanship contests were as follows:

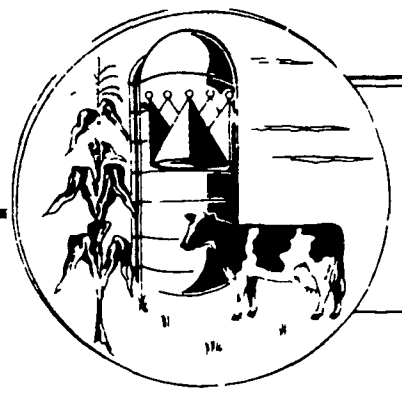
In the first-year division, champion fitter was George Renkert, Chester Springs. Reserve champion fitter was Gary Barton, Berwyn. Champion showman was Dale Keen, Glenmore, and his runner up was Jeffrey Welsh, Malvern.

In the junior division (members under 14 years of age), champion fitter-showman was Stephen Nolan, Birchrunville, and reserve champion was Bruce Heller, Downingtown.

Winners in the senior division were Dave Nolan, Birchrunville, champion fitter-showman, and Jeffery Staner, Berwyn, reserve champion fitter-showman.

The cattle exhibited at Saturday's show were owned by the 4-H members. They have the responsibility of caring for the cattle as their 4-H projects.

Dairy cattle are only one of the many varied 4-H projects available to all rural and urban youth between the ages of 8 and 18. For more information about 4-H, call the Chester County Cooperative Extension Service (696-3500).



KEY TO PROFIT
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.

Purebred Yorkshire Breeder

Edward H. Oswald
Lehigh County, PA

Edward talks about what he thinks of the Agri-King Swine Feeding Program.

"I thought my hogs were eating good before, but when I started on the Agri-King feeding program they really had an appetite. They can hardly wait for the next meal Their growth is more rapid and they have a smoother hair coat. This last batch of hogs, at three and one-half months of age, weighs around 150 pounds.

I feel it's very important to feed a balanced ration to my hogs. Not only is it important to balance protein and energy, but also the calcium, phosphorus, vitamins and trace minerals. These days you can't afford to feed your hogs something they can't efficiently utilize.

Agri-King is the first company that has taken interest in my sow and pig feeding operation. I really appreciate the service that Agri-King provides with their personalized ration formulations and nutritional consultation"

Jolly Caterers Cooking Club

The fourth meeting of the Jolly Caterers Cooking Club was held on July 21 at the home of Mrs. Harold Fry. Sharon Nolt, president conducted the business meeting.

Following the meeting, the first year girls made a two egg cake while the third year members made cloverleaf yeast rolls.

The next meeting will be held on Monday, August 4 at the home of Mrs. Harold Fry.

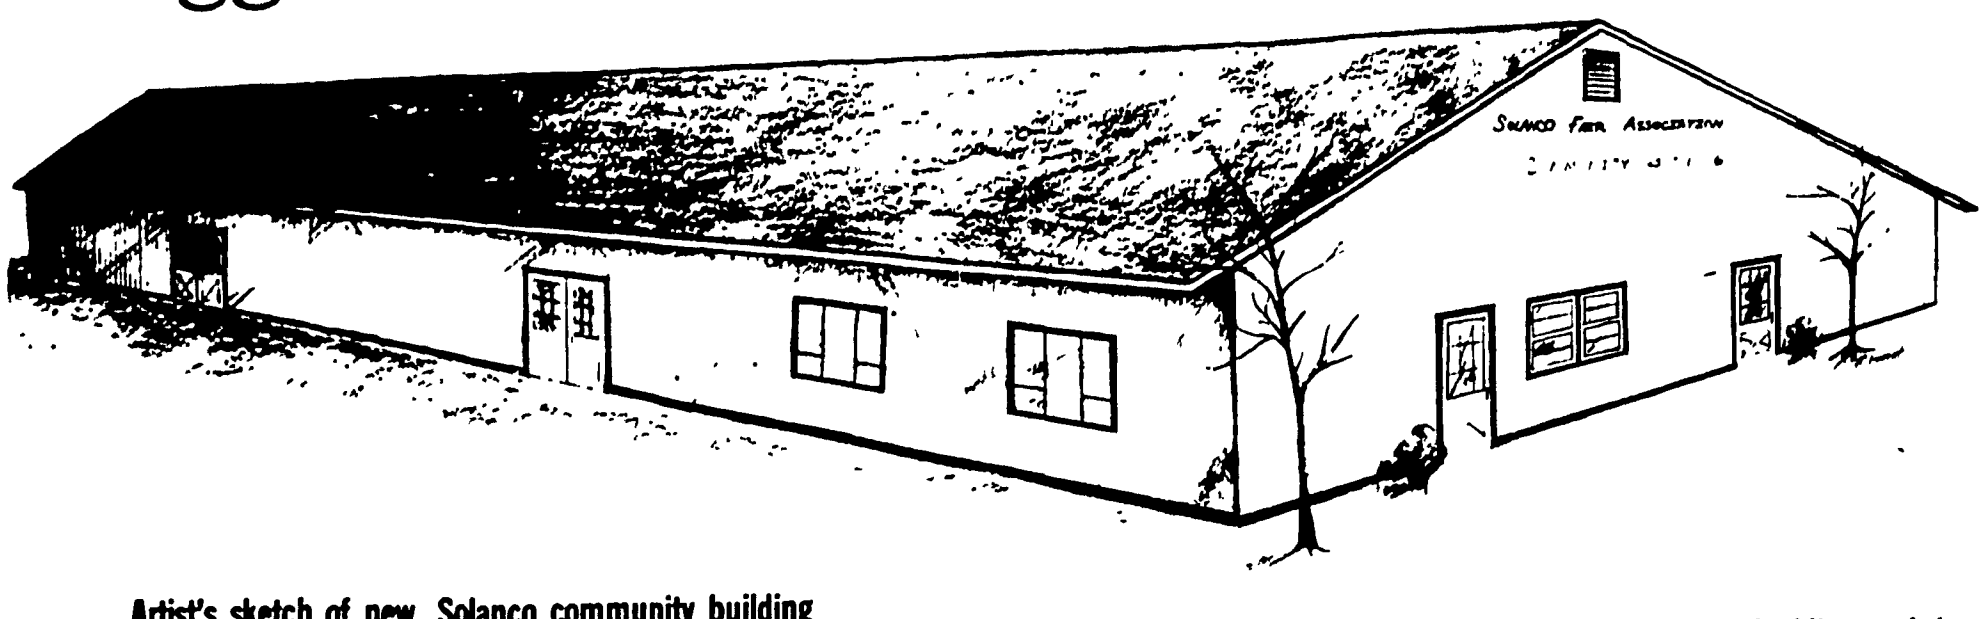
Solanco Fair spending $90,000 for improvements

Bigger and better than ever is their goal



Artist's sketch of new Solanco community building

By; Dieter Krieg

QUARRYVILLE - The Solanco Fair Association evidently has considerable confidence in the future, especially as far as Lancaster County agriculture is concerned. The non-profit organization is in the process of constructing two new buildings at an estimated cost of $85,000 to 90,000.

The new facilities are likely to make the annual event, which has grown at the rate of 40 per cent per year for the last several years, "bigger and better than ever." Kenneth Rutt, in his eighth year as general manager of the fair, says: "We are striving for facilities to have county beef, dairy, horse and 4-H shows, and at the same time be able to serve foods and accomodate the public."

An exhibit building, measuring 58 by 110 feet, and a pole barn with dimensions of 46 feet by 150 feet, are expected to be completed in time for this year's fair, which gets underway on September 17 and continues through the 20th. Rutt noted that the fair is open to anyone in or out of the county, and that those interested in exhibiting should contact the association by September 1.

The new exhibit building will have facilities for cooking and eating, complete with commercial-size stoves, dishwashers, serving room, and counters. Other rooms are designed for use as either offices or storage space, depending on needs at the time.

The Fair Association had been spending $5,000 per year on tent rentals alone. While this expense will not be totally eliminated by the new buildings, they will reduce some of the expense and the work of putting them up and then tearing them down again. Rutt commented that last year the dairy tent alone was 320 feet long and 40 feet wide - the largest tent ever erected by York Tent Company. Using that as an indication of the size and continued growth of the fair, he believes the construction of permanent buildings is a step in the right direction. "Three additional pole barns are planned for the future," he said, adding that they could be filled without difficulty.

The cost for the buildings are being funded three ways. Donations are being accepted and welcomed. Heading the list of community-minded people who are contributing to the building fund is John C. Hoffman, well-known resident of Quarryville and former owner of the Lancaster Bone Fertilizer Company. He has dedicated the foundation and superstructure of the exhibit building to his late wife, Sara H. Fuhrman Hoffman.

Persons interested in donating money to the fund may do so by mailing their contributions to either Ken Rutt, general manager, Solanco Fair Association, Quarryville; or Mrs. Henry Rohrer, treasurer, Solanco Fair Association, Quarryville.

The state has granted the association $15,000 towards improvements of the fiar, and an additional $30,000 was borrowed.

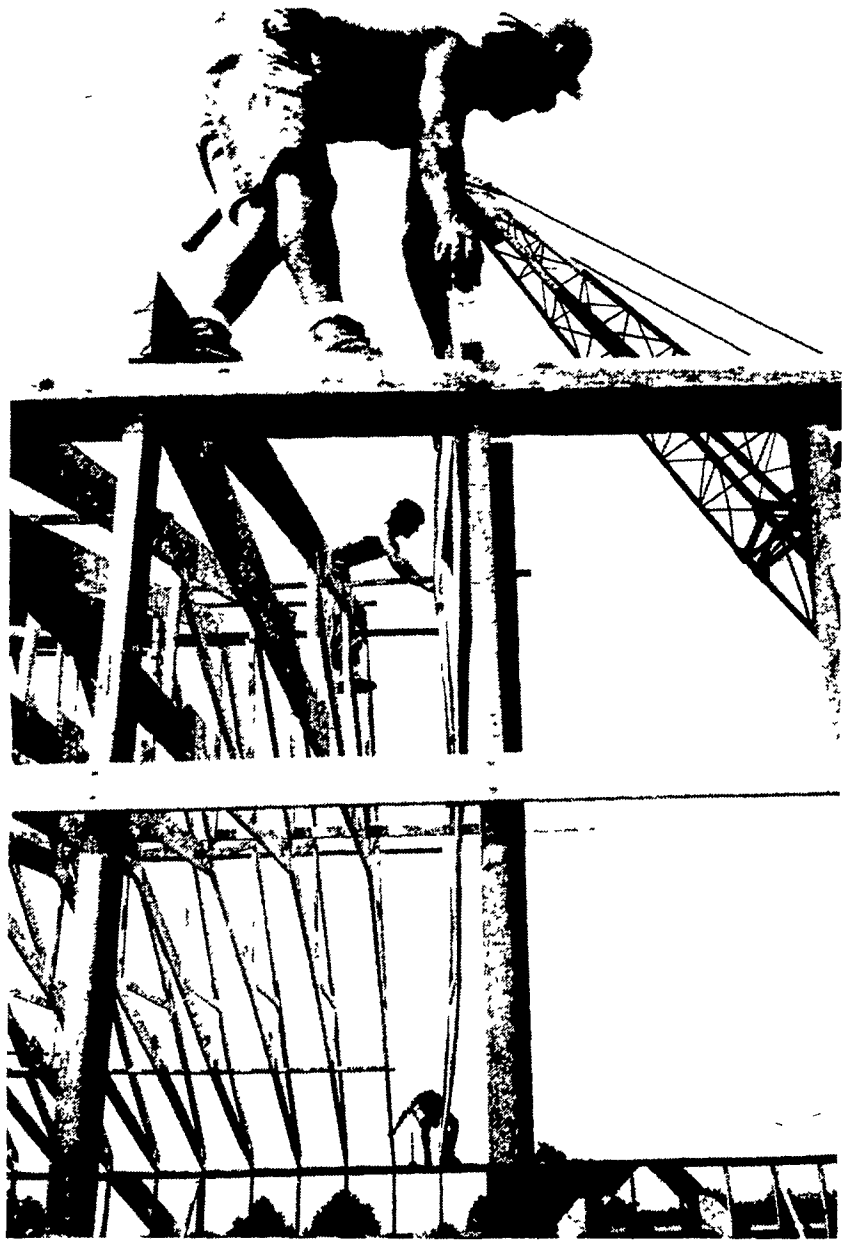
Paul Risk Associates of Quarryville donated time for drawing the original plans and are in charge of building. Once completed the hall is expected to be used at times other than fair time. Planners would like to have the facilities benefit not only the southern end, but the entire county.

In previous years the Solanco Fair rented a number of tents and several trailers to house exhibits. Starting this fall, and more so in future seasons, many of the dispalys, such as canned goods, flowers, and sewing projects, will be under one permanent roof. Most of the open area of the exhibit building could be used for that purpose, while at other times it would be suitable for holding large banquets for as many as 300 people.

The multi-purpose structure is being built to have a rustic appearance, with a weathered cedar-board siding and brown shingle roof. Although the new facility will not be completely furnished by fair time, most of it will be ready for use. The meeting room, for example, will have a crushed stone floor to begin with, until more money becomes available. It will not be used for meals this year, but the kitchen, to be furnished with used equipment out of a restaurant remodeled by Risk, will provide meals for "take-out"service.

While the community building is getting most of the attention now, plans are underway for the livestock barn, scheduled to go up next month. Relying largely on volunteers to build it, the open-air pole barn should have room for approximately 120 cattle, sepending on their size.

Rutt commented that the Solanco Fair has had "good participation and the interest of the community," and with the new facilities that may grow even more rapidly than in previous years. The dedication ceremonies will be on September 14.



Workmen installed roof trusses on the new community building Wednesday

Cowtown rodeo results

The Cowtown rodeo stock was in prime condition Saturday night and of the first 25 animals out of the shutes only 2 horses were ridden and 1 calf roped. The animals maintained the lead and at the end of the performance only 44 out of a possible 98 of them had been ridden, roped, or thrown.

The "Green Bulls" who entered the Rodeo Arena as a series of numbers last week had by now acquired such appropriate names at Cut Throat, Tuffy, Mistake, and Pain; none of which were ridden, but what's in a name? Rene Cosavante of Boston, Mass. could not hold a candle to a Brahma named Sunbeam, who was just as vicious as any of the others. Wyatt Crotta of Bethany, Conn. was one of the lucky cowboys and made a winning mark of 64 on a "Green Bull" Shish-Ka-Bob, for $299.88.

Andy Harris won $213.64 in the Steer Wrestling event in 9.6 seconds.

In the Bare Back Bronc Riding, Jack Meli was back in first place with a 60 marking for $135.24.

Saddle Bronc event was won by Roger Young with a mark of 58 for $135.24.

The winning time in the Calf Roping was 12.9 seconds, made by Carl Marino for $292.24.

The unbeatable Diane Sleeter topped the girls Barrel Race in 18.18 seconds for $160.72.

About 3,200 people came to see 118 contestants vie for a purse of $3,091.00.

Bare Back Bronc Riding

1 - Jack Meli, St. Cloud, Fla; 2 - Jimmie Lee Walker, Cowtown, N.J.;

Nine others failed to make a qualified ride resulting in a Ground Split with each cowboy recieving $11.27.

Saddle Bronc Riding

1 - Roger Yound, Gatesville, Tex.; 2 - Wyatt Crotta, Bethany, Conn.; 3 - Grant Harris, Cowtown, N.J.; 4 - Willie Ed Walker, Cowtown, N.J.

Bull Riding

1 - Wyatt Crotta, Bethany, Conn.; 2 - Phil Garrett, Meswuite, Tex.; 3 - Chris Risoli, South Plainfield, N.J.; 4 - John Risoli, Madison, Fla.

Steer Wrestling

1 - Andy Harris, Cowtown, N.J.; 2 - Harry Gerhardt, Laurel Springs, N.J.; 3 - Don Pagano, Bronx, N.Y.; 4 - Sherman Shidner, Sharptown, N.J.

Girls Barrel Race

1 - Diane Sleeter, Laurel Springs, N.J.; 2 - Dale Bibbo, Spring Valley, N.J.; 3 - Lorraine Alexander, Newton, N.J.; 4 - Judy Clement, Thorofare, N.J.

Calf Rpoing

1 - Carl Marino, Higganum, Conn.; 2 - Jeff Kassaway, Allentown, Pa.; 3 - Joe Merola, Panns Grove, N.J.; 4 - Paul Graham, Penns Grove, N.J.

Attendance: 3,200 - Contestants: 118 - Total Purse: $3,091.90.

Merrimaids meet

The Lampeter - Strasburg 4-H Merrimaids held their round-up and fashion show on July 21 at the Martin Meylin Junior High School.

Jan Hess and Lisa Bloom welcomed the members and parents.

Talent demonstrations were given by Connie Kiscaden, Kathy Sangrey, Cindy Sangrey, Kim Gerhart and Sharon Bloom.

Each girl modeled her garment and was awarded a certificate and ribbon. Following the show the members of the cooking club served refreshments.

Lewis honored

Kenneth Lewis, son of Mr. and Mrs. George Lewis of Landisville, Pennsylvania has been named to the Dean's List at Delaware Valley College. This announcement was made by Dr. Joshua Feldstein, Dean of the College.

Hall featured at Shindig

Tom T. Hall
by
Jack Hurst

The following is a sketch of Tom T. Hall who will be featured at Shindig on Aug. 2 with the Carroll Co. Ramblers and the Caffrey Family.

In country music, a genre whose lyrics always have told stories, he has come to be called The Story Teller. Described as "musical journalism" and "subjective reportage set to music," his most representative songs stand out as masterfully understated portraits of a seldom - heard - from America. It is an America his audiences recognize as home.

Tom T. Hall is a specialist at describing people, and he describes himself as "an old boy who picks a guitar and sings through his nose." He carries a five-piece band and performs to 15 or 20 audiences a month at county fairs, outdoor parks, country music nightclubs and college campuses. Generally he feels that the quieter the crowd is, the better he can entertain it.

Born near the Kentucky mountain town of Olive Hill, he was influenced early by two widely different men who both were artists. One was Ernest Hemingway, a story teller who fled from middle America in his youth and spent the rest of his life reacting to it, writing spare, stoic words which kindled feelings by ignoring them. The other was a tubercular Olive Hill guitar player named Clayton Delaney who was the first innovative musician Hall ever saw.

At least one song written by Tom T. Hall has been on country music's national popularity charts every week for more than eight years now. He has written hundreds of them, many on assignment, and he has prided himself on an ability to write them about whatever subject happens to be needed at the time.

Tom T. Hall, noted country western musical performer, will be featured at the August 2 edition of Shindig at the Barn at Cripple Creek. Hall will be sharing the stage with the Carroll County Ramblers and the Caffrey Family. This Saturday evening's performance will feature the Blue Ridge Quartet.

Fair schedule listed

August 11-15, Lebanon County, Lebanon Area Fair, Lebanon.

August 18-23, Berks County, Kutztown Fair, Kutztown.

September 1-6, Adams County, South Mountain Fair, Arendtsville.

September 5-13, York County, York Inter-State Fair, York.

September 15-20, Dauphin County, Gratz Fair, Gratz.

September 16-20, Lancaster, Southern Lancaster County Community Fair, Quarryville.

September 18-20, Berks County, Oley Valley Fair, Oley.

September 22-27, Columbia County, Bloomsburg Fair, Bloomsburg.

September 23-27, Lancaster County, Ephrata Fair, Ephrata.

September 24-26, Lancaster County, West Lampeter Community Fair, Lampeter.

October 1-4, Lancaster, New Holland Farmers Fair, New Holland.

October 8-11, Chester, Unionville Community Fair, Unionville.

October 8-11, Lancaster County, Manheim Community Fair, Manheim.

October 16-18, York County, Dillsburg Community Fair, Dillsburg.

Jan. 5-9, 1976, Dauphin County, PA Farm Show, Farm Show Building, Harrisburg.

4-H'ers meet

The fourth Elizabethtown-Donegal Community 4-H Club meeting was held July 21 at the home of Mrs. Sue Heineman with a corn roast and swimming party as entertainment.

The next meeting, a watermelon party, will be held August 18 at the Lowell Fry home, Manheim R7.

LANCASTER COUNTY DHIA MONTHLY REPORT

JUNE 1976

A Registered Holstein cow owned by J. Z. Nolt, R1, Leola, completed the highest 305 day lactation. Judy produced 23,860 pounds of milk, 1,072 pounds of butterfat with a 4.5 percent test. Second high lactation was completed by a Registered Holstein cow owned by Curtis E. Akers, R1, Quarryville. Vickie produced 22,443 pounds of milk, 983 pounds of butterfat with a 4.4 percent test in 305 days.

The herd of Rufus G. Martin, R1, Ephrata, had the highest daily butterfat average. This herd of 28.0 Registered Holstein cows averaged 55.2 pounds of milk, 2.12 pounds of butterfat with a 3.8 percent test. The herd of Ben K. Stoltzfus, R1, Gordonville, placed second. This herd of 35.0 Registered & Grade Holstein cows averaged 57.3 pounds of milk, 2.07 pounds of butterfat with a 3.6 percent test.

FIRST 305 DAYS OF LACTATION WITH 630 OR MORE POUNDS OF BUTTERFAT.

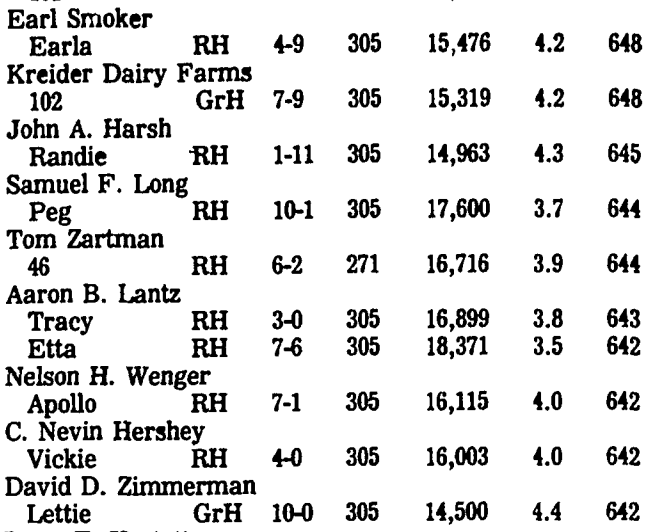
New Idea's NEW "Hay Thing"



Makes hay that cattle like better

Introducing New Idea's advanced 7-foot Cut/ditioner—a field-proven machine that makes quality hay in rank, heavy first cutting, or thinner later cuttings. It cuts cleanly and conditions gently Makes soft, palatable hay with rich, protein-filled leaves and tender tops that cattle prefer Won't plug—even in long, rank and down hay.

This new "Hay Thing" can also be used as a tedder or to turn windrows And it does a lot of other jobs, such as clipping, cutting and shredding.

All this, plus low first cost and trouble-free operation. New Idea's advanced Cut/ditioner — the new "Hay Thing."

FACTS FOR DAIRYMEN

by N. Alan Bair
Associate County Agricultural Agent

You, Timing and Oxytocin

Ever wished you could "beat" the milk out of a certain ornery cow? It just can't be done according to Steve Spencer, our PSU Dairy Specialist.

There is more to milking a cow than pulling four teats. Why can one milker get more milk out of a cow than someone else? Timing of the stimulation of the cow by the milker may be one of the answers.

Oxytocin (let-down hormone) is released by the pituitary gland at the base of the cow's brain upon proper stimulation. It enters the blood stream and shortly thereafter enters the udder. The presence of oxytocin causes muscles to contract around the alveoli or milk cells. Actually, the milk is forced out of these cells. If the cow is frightened or subjected to pain, adrenalin is released which is an antagonist to oxytocin. Thus, if a cow enters the parlor and is frightened, it is likely she won't have any milk for at least 30 minutes or until she calms down. This is why you need to be easy-going and gentle with your cows during milking. The effects of adrenalin can be felt in lower production if the cow is irritated by the man doing the milking.

Proper milking procedures involve washing the cow with clean warm water and then drying the teats with a paper towel. This stimulates the cow to release oxytocin. The teat cups should be applied 30-60 seconds after the initation of washing. At this time the concentration of oxytocin in the blood begins to build up and milk starts to flow.

After the oxytocin is released, it diminishes quickly. This is why it is important for the cow to milk out as rapidly as possible. Remember that the interval between stimulation and application of the teat cups should be short and constant each milking and Tender Loving Care is important.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

Egg program hatched

A proposed national promotion program for 1976 was one of the main discussion topics at the Executive Committee meeting of American Egg Board, according to Wentworth Hubbard, AEB Chairman, and Hubbard Farms, Walpole, New Hampshire.

Entitled a "Golden Opportunity" the new program will be presented publicly for the first time at AEB's Board of Directors meeting, Spetember 9-10 in Chicago. The program was recommended to the Board by the Executive Committee and includes a provision to expand activities in advertising, education, mershandising, information and market research, if additional funds are available for promotion during the last half of 1976. These staff recommendations were presented by Richard Kathe, AEB president and James Huening, vice-president. A portion of this consisted of a prototype of a national advertising media plan presented by Huening, and Bill Stein and Dave Seibel, senior vice-president and executive vice-president, Campbell-Mithun, AEB's advertising agency.

Revisions in expenditures were authorized by the Committee and will be implemented by the staff. Permanent changes in the budget will be confirmed by the Board at its next meeting. These changes reflect savings in personnel and operating expense without materially effecting program preformance, and are in keeping with the same adjustments required of other companies and organizations in the poultry and egg business, Kathe stated.

PIN-HEADED

"Oh dear!" sighed the distraught wife as she was dressing for a night on the town. "I can't find a pin anywhere Where do all the pins go to anyway?" "That's a difficult question to answer," replied a consoling husband "Pins seem to be always pointed in one direction and headed in another"

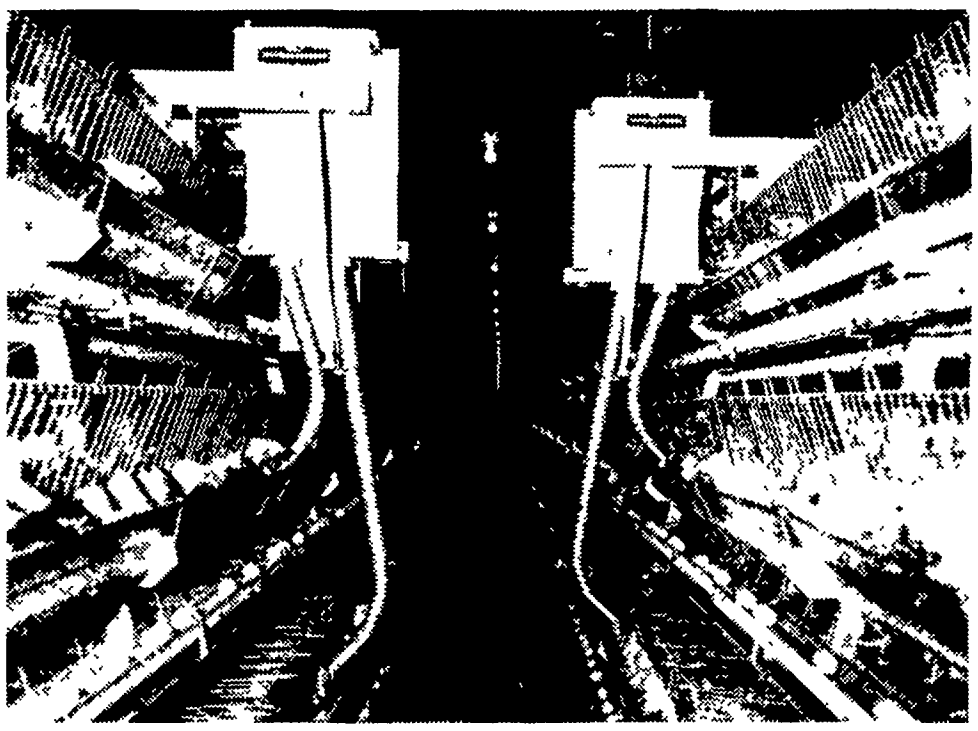
Learn How To Save 3 To 7% On Feed Costs...



The FEEDSAVER™

Keenco's new **FEEDSAVER** is the first truly controlled feeding system. It's all new — both mechanically and in principle.

FEEDSAVER doesn't use a chain. Instead, a traveling hopper rides above each Triple "A" Line cage row. As it moves along it meters a thin ribbon of feed in the trough

You control and restrict the amount of feed distributed according to a pre-determined plan.

The plan increases feeding efficiency — more eggs per pound of feed And, since there's never more than a minimal amount of feed in the trough, billing out is practically eliminated. No feed separation either. All birds get a complete ration.

With feed costs running about 67% of the cost of each dozen eggs, it's easy to see how the **FEEDSAVER** System could produce a healthier profit for you

We have a new idea in egg collection, too. A whole new front end on Triple "A" Line which gives you cleaner eggs, more accurate counting, and step-saving efficiency.

Of course, we've retained the patented, bird-shaped Keenco Contour Cage and the same watering, ventilation, egg collection, and manure removal systems that have made the Keenco Triple "A" Line Automated Cage Layer System the leader in productivity. And don't forget our **TOTAL HELP** program, the program that helps you with planning, financing, building, operation and training.

For more information about new FEEDSAVER, and free brochure use the attached coupon.

4-H horse show winners announced

The Lancaster County 4-H Horse and Pony Round-up was held on Saturday July 19 at the Lancaster Riding and Tennis Club. There were 126 horses entered in the show in the 32 classes. The top three placings in each class except two pairs and one county team, are eligible to compete in the Regional 4-H Horse Show on September 13. The winners are as follows: -

Grooming & Showmanship Junior

1 - Donna Simmons, E. Petersburg Pond, Lanc.; 2 - Rick Buckwalter, R1 Denver; 3 - Karen Himerdeer Kayo Ave. Lanc.

Grooming & Showmanship Senior

1 - Natalie Immel, R3 Lititz; 2 - Margaret Keeney, R4 Manheim; 3 - Dee Dee Rice, Box 142, Conestoga.

Pleasure Pony Driving

1 - Karen Himerdeer, Kayo Ave. Lanc.; 2 - Pam Simmons, E. Petersburg Rd. Lanc.; 3 - Paula Splain, N. 4th St. Columbia.

4 - Open Trail 13.2 hands & under

1 - Robin Tshudy, Fulton St., Manheim; 2 - Lou Simmons, E. Petersburg Rd. Lanc.; 3 - Pam Simmons - E. Petersburg Rd., Lanc.

5 - Open Trail Over 13.2 hands

1 - James Glick, E. Main St. Leola; 2 - George Metzler, Box 158, E. Petersburg; 3 - Brian Immel, R3 Lititz.

6 - County Team

George Metzler, Box 158, E. Petersburg; Susan Slater, Fruitville Pk., Lanc.; Brian Immel, R3 Lititz.

7 - Pleasure Pairs

1 - Donna Bare, Witmer; 1 - Vicki Bare, Witmer; 2 - Heidi Benley, R3 Quarryville; 2 - Carol Stimson, R1 Strasburg.

8 - Stock Seat Equitation - Jr.

1 - Leslie Sherman, Barrcrest Lane, Lanc. 2 - Cindy Burkey, 119 N. Queen St., Lanc.; 3- Rick Buckwalter, R1 Denver.

Stock Seat Equitation - Sr.

1 - Cherri Gochnauer, Centerville, Rd., Lanc.; 2 - Natalie Immel, R3 Lititz 17543; 3 - Jane Gregory, R1 Lititz 17543.

Western Pleasure Ponies 12.2 hands & under

1 - Connie Myers, Harrisburg Pike, Lanc.; 2 - Pam Simmons, E. Petersburg Rd. Lanc.; 3 - Sherri Myers, Harrisburg Pike, Lanc.

11 - Western Pleasure Ponies Only 12.2 & not over 14.0 hands

1 - Donna Simmons, E. Peterburg Rd. Lanc.; 2 - Cindy Burkey, N. Queen St. Lanc.; 3 - Sue Hafer, Blaine Ave., Leola.

12 - Western Pleasure Horses Over 14.0 hands

1 - Natalie Immel, R3 Lititz; 2 - James Glick, E. Main St., Leola; 3 - Rick Buckwalter, R1 Denver.

13 - Western Riding Contest

1 - Karin Risser - R1 Stevens; 2 - Sandy Hamilton Mentzer Rd. Lampeter; 3 - Lori Simmons, E. Petersburg Rd., Lanc.

14 - Pole Bending 13.2 hands & under

1 - Kim Bernhardt, S. Main St. Manheim; 2 - Deb Myers, S. Charlotte St. Manheim; 3 - Terri Mummau R2 Manheim.

15 - Pole Bending - Over 13.2 hands

1 - Terry Miller Corry Ave., Lanc.; 2 - Randy Glick E. Main St. Leola; 3 - Sandy Hamilton, Mentzler Rd. Lampeter.

16 - Clover Leaf Barrel Race 13.2 hands & under

1 - Kim Bernhardt S. Main St. Manheim; 2 - Terri Mummau R2 Manheim; 3 - Deb Myers S. Charlotte St. Manheim.

17 - Clover Leaf Barrel Race over 13.2 hands

1 - Randy Glick, E. Main St. Leola; 2 - Deb Carmeans, Box 158 E. Petersburg; 3 - Tammy Rhineer, R1 Willow Street.

18 - Saddle Seat Equitation - Jr.

1 - Daryl Friedricks, Hunsicker Rd., Lanc.; 2 - Debbie Huber, Poplar St. Columbia; 3 - Tammy Rhineer R1 Willow Street.

19 - Saddle Seat Equitation Sr.

1 - Betsy Reese, Urban Dr., Lanc.; 2 - Lenny Matroni, Whitney Road, Lanc.; 3 - Cindi Peters, Penn Grant Rd. Lanc.

20 - Hunter Seat Equitation Junior

1 - Greg Ziegler, Wabank Rd., Lanc.; 2 - Amy Lenker, Lauel Dr. Hershey; 3 - Michael Winperney, - Millcross Rd., Lanc.

21 - Hunter Seat Equitation - Sr.

1 - Sue Cassel, Adele Ave., Manheim; 2 - Sandra Bradley, R1 New Providence; 3 - Regina Kicera, N. Main St., Manheim.

22 - Hunter Seat Equitation One Jump - Jr.

1 - Elizabeth Abel, Smith Dr., Quarryville; 2 - Lisa Emes, Cedar Rd. Lanc.; 3 - Lyn Lenker, Laurel Dr. Hershey.

23 - Hunter Sear Equitation Over Jump - Sr.

1 - Donna Bare, Witmer; 2 - Vicki Bare, - Witmer; 3 - Carrol Flemming Park Ave. Columbia.

24 - Saddle Seat Pleasure Ponies 14.2 hands & under

1 - Daryl Friedricks, Hunsicker Rd. Lanc.; 2 - Debbie Rineda, R1 Quarryville;

25 - Saddle Seat Pleasure Horses over 14.2 hands

1 - Leslie Winpenny, Millcross Rd., Lanc.; 2 - Sue Baker, Stony Battery Rd.; Lanc. 17601; 3 - Debbie Huber, Poplar St., Columbia 17512.

26 - Hunter Under Saddle - Ponies 14.2 hands & under

1 - Amy Linker, Laurel Dr. Hershey; 2 - Elizabeth Abel, Smith Dr., Quarryville; 3 - Elizabeth Waldeck R2 Lanc.

27 - Hunter Under Saddle - Horses Over 14.2 hands

1 - Greg Ziegler Wabank Rd. Lanc.; 2 - Regina Kicera N. Main St., Manheim; 3 - Sandra Bradley, R1 New Providence.

28 - Working Hunter Ponies 14.2 hands & under

1 - Elizabeth Abel, Smith Dr., Quarryville; 2 - Vicki Bare, Witmer; 3 - Lyn Lenker, Laurel Dr. Hershey.

29 - Working Hunter Horses Over 14.2 hands

1 - Barb Helm, R2 Manheim; 2 - Carol Stinson, R1 Strasburg.

Counter Classes English Walk-Trot

1 - Russell Waldeck, R2 Lancaster.

31 - Western Walk Joy

1 - Jenny Cristle, Hamilton Rd. Lanc.; 2 - Julie Jenkins, R2 Conestoga; 3 - Kevin W. Kieffer, R2 Lititz.

32 - Three-Gaited

1 - Betsy Reese, Urban Dr. Lanc.

HISTORY REPEATS itself as Cyrus McCormick's 1831 model reaper comes out of the museum to cut grain at Steeles Tavern, VA, where it introduced the era of farm mechanization 144 years ago. British Broadcasting Company returned the museum piece to harvesting service for a TV documentary, "The Inventing of America". The star status accorded the reaper by 20th century British media contrasts with the London Times of 1851 which ridiculed McCormick's invention as "a cross between a flying machine, a wheelbarrow and a chariot."

Pickling problems discussed

Although food markets offer a wide variety of pickles and relishes, many homemakers today gain satisfaction from making their own pickles when garden vegetables and fresh fruits are in good supply.

Marceil A. Seckman, Ass't Ext. Home Economist in York County, says that pickling is a delightful art that well repays the time and care you must take for success.

The Cooperative Extension Service is offering a workshop on pickle making on August 7, from 10:00 a.m. to 12:00 noon at the 4-H Center near Bair Station. This workshop is open to anyone regardless of sex, race, color, or national origin. To register for the class call the Cooperative Extension Office at 848-3301 Ext. 276.

SOW CASTLE... the new economical, plug-up-and-go total farrowing environment

Models come 12 or 24 feet wide (24-foot model shown here), in lengths of 32 or 50 feet. All 24-foot wide buildings have an entry door in each end. See chart on back of this sheet for more specifications.

Built-in ventilation system keeps building dry and provides fresh air for animal health. Unique air flow system pulls air in at roof ridge line, circulates it over the top of the animals, through the pit, and out. Note that design of roof system eliminates the need for any massive bulkheads that could restrict air flow.

Each farrowing stall has an adjustable sow feeder and automatic water cup. Nipple waterer is optional in place of water cup. Stall sides are adjustable to size of sow. Nursery feeders are provided for pigs.

Farrowing stalls and nursery areas are equipped with aluminum T-slats in the floor, front and rear. Individual slats are 1" across the top and 1" high, with 3/8" spacing between slats

See Our Sow Castle on Display at:

E. M. HERR EQUIPMENT, INC. R.D.1, Willow Street 717-464-3321

Look at a few of the features we build into our structures.

Gary Harsman (foreground) was the first place showman and Corinna Moyer placed first in fitting during the recently held Berks County Junior Holstein Day. Phoebe Ruth (far left) and John Stump, helpers at the program, look on.

Some of the winners of the Berks County Junior Holstein Day are (from left): Penny Bicksler, 1st - fitting; David Schantz, helper; Helen Seidel 1st - showing and Mark Wicks, older member.

Berks Co. youths exhibit holsteins

Consider the little seeds

Today, as in countless past generations, Man depends more on the little seeds of the world for food, clothing, and shelter than any other source of the items we need to sustain life.

As you give that some thought, consider, too, that almost everything with any real lasting importance to Man is connected, in one way or another, with the seeds of the world. So many things come from seeds.

For example, consider the many wooden items around you which are direct results of tree seeds. Consider your cotton cloth items, and the host of other products that come from cotton seeds. Consider, too, all the products grown from seeds of corn, wheat, soybeans, rice, and the other cereal plants around the world.

Think about the countless seeds that once grew into plants, eons before Man ever walked this earth. Ancient plants that grew and fell with the massive reptiles that fed upon them. Through nature's time and pressure they were turned into the fossil fuels we use today to make our life more comfortable, more colorful, and more liveable.

Consider a glass of milk. The cow that produced the milk in her body could not have done so without the feed the farmer provided for her, be it the seed-produced grasses of a pasture, or a mixture of seed-produced corn and oats. The very same thing could be said, of course, for the other farm animal products — pork-chops, steaks, hamburger, drumsticks, eggs, lamb-chops, and other foods.

Consider your total lawn. Most of the living things that you see around the outside of your home either grow from, or depend on the products of seed-produced plants. This includes the multicolored birds that flutter into, fly over, or dart past your lawn.

Your pet, be it cat or dog, lying in the backyard sun, is as dependent on seed products as you are, since most pet foods come from byproducts of seed-produced cereal or seed-dependent meat sources. Your vegetable garden and flowers, the bushes, and the trees are all seed related.

For as long as the sun has beamed down on this earth, the seeds of the world have shown a remarkable ability to adapt to extremes. On the tundra of the cold north, with its lengthy and deep cover of snow and ice, lie little seeds which spring up into beautiful wildflowers during the brief moments of the warmer weeks of the year. In the pressure-cooker heat of the earth's desert sands, seeds lie dormant for years waiting for that brief but glorious moment when a freak rain springs them into life.

Living between these geographic extremes, Man has constantly used the natural adaptability of seeds for his own ends. Over the years, Man has made such dramatic changes in seed-produced plants that it is often impossible to compare new plants of today with fossilized remnants of the original parent plant lines.

Man-induced changes in plants and seeds sometimes are of a very minute nature. A plant breeder may well spend months or years working with a single kind of plant striving through cross-pollination and other methods to create one minor change in the germ plasm of a variety. When he fails, it's a weed to him, but when he succeeds, it is an achievement of consequence for all of us.

A plant breeder may just as well have a number of things he wants to accomplish in his work. He may seek the creation of the world's smallest blooming marigold, while he also seeks the world's largest single sunflower. Or, he may strive for new flower colors in blooms that have never been seen before.

With farm crops, research workers often try to increase a plant's resistance to predators and diseases to protect the plant naturally, which also gives us a greater yield from the plant at harvest. Sometimes their work is pointed more to a particular part of a plant, such as a new peanut variety which produces slightly more oil when the nut is processed.

Whatever the plant breeder is striving for, his work consumes a great deal of his time and energy. He keeps meticulous and methodical records for each step he has taken as well as each result he has achieved.

Grange Fair requirements published

The following rules are for the Keystone Grange Fair which will be held on August 2. For more information on the event contact the local grange organizations.

KEYSTONE GRANGE FAIR GARDEN SHOW
Saturday, August 2, 1975
(Or rain date)
Open To The Public
RULES:

1. Specimens must have been grown by the exhibitor.

2. One entry per household in any one class.

3. Plates, if required, to be supplied by exhibitor. They shall be made of sturdy paper, be plain white and without design. (Two plates together may be needed for better stability.)

4. Any entries not containing the proper number of specimens will be disqualified by the horticultural committee. (Bring an extra or two on perishable items for any damaged enroute.)

5. Entries will be received at the fair grounds between 9:30 and 11:00 A.M., Saturday, August 2, 1975.

6. Entries to be removed by the exhibitor between 6:30 and 7:30 P.M., Saturday, August 2, 1975.

7. Special parking pass will be provided for exhibitor paying initial parking fee and then returning to the grounds. It must be requested when placing your exhibits.

JUDGING

8. Specimens are to be the size most commonly used in home food preparation, unless a specific size is stated. Select your specimens for uniformity of size, shape, color, maturity and trueness to the variety. Specimens should be free of insect and disease damage.

9. Judge(s) will place entries within each class and make First, Second, Third and Fourth Awards if merited. Each award level will receive a point value - see Prizes, below.

10. If there is only one entry in a class, it will receive an automatic Second Award, unless in the opinion of the judge(s) the entry merits a First Award.

11. Decision of the judge(s) is final.

PRIZES

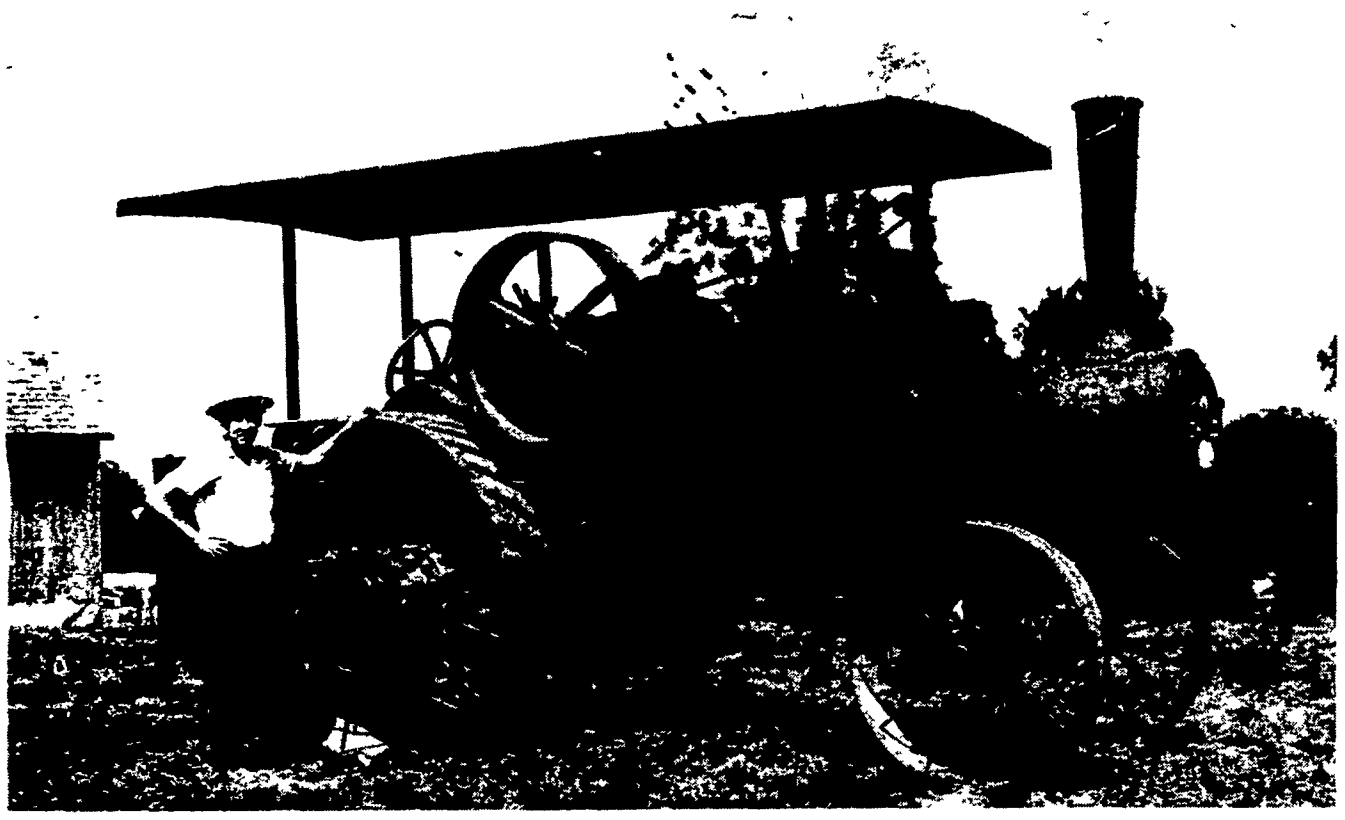
12. Place Point Values: First Award - 5 points, Second Award - 4 points, Third Award - 3 points, Fourth Award - 2 points.

13. Entry Point: Any entry not receiving a place Award, as in rule 12, will receive 1 point, for entering.

14. Points will be totaled for each exhibitor and prizes will be awarded as follows: Highest Total Points - $10.00, Second Highest Total Points - 7.00, Third Highest Total Points - 5.00, Fourth Highest Total Points - 4.00, Fifth Highest Total Points - 3.00. In the event of a tie, the entrants will split to cash value of the placing and the next lower one(s).

15. SPECIAL GRANGER'S AWARD: Additional prize of $5.00 will be awarded the Keystone Grange Member having highest number of points of Grange entrants. To be eligible, one must be a member or have application to the secretary as of August 1, 1975.

This horse-powered tread mill, manufactured by Heebner's of Lansdale, will be demonstrated at the Keystone Grange Fair on August 2.



Samuel Kriebel, Mainland, Pa., stands beside a 1917 Case steam traction engine which he will exhibit at the Keystone Grange Fair, Trappe, Pa., on August 2. The 40 horsepower giants were used for belt power to run various machinery in the past.

KEYSTONE GRANGE FAIR GARDEN SHOW EXHIBITION CLASSES
Description & Requirements

1. BEANS, green, snap - plate of 15 specimens.
2. BEANS, wax, snap - plate of 15 specimens.
3. BEETS - plate of 5 specimens (trim tops to approx. 1 inch).
4. CARROTS - plate of 5 specimens (trim tops to approx. 1 inch)
5. CORN, sweet - 5 ears, husked (suggest enclosing in clear plastic bag to retain freshness until judging).
6. CUCUMBERS, picklers, 3" and under - plate of 10 specimens.
7. CUCUMBERS, picklers, 3 - 5" - plate of 5 specimens.
8. CUCUMBERS, slicers - plate of 5 specimens.
9. EGGPLANT - 2 specimens.
10. PARSLEY, curled type - 1 bunch (15-20 stems) in water.
11. PEPPER, bell type - plate of 5 specimens.
12. PEPPER, long, thin, sweet - plate of 5 specimens.
13. PEPPER, hot - plate of 5 specimens.
14. SQUASH, any summer type except zucchini - plate of 3, young edible stage (usually 6-10" depending on type).
15. SQUASH, zucchini, green or golden - plate of 3, young stage.
16. TOMATO, large, red - plate of 5 specimens.
17. TOMATO, green ripe - plate of 5 specimens.
18. TOMATO, small fruited, red or yellow - plate of 10 specimens.
19. "THE HERBALIST" - collection of 5 or more kinds of culinary and-or garden herbs, in water. Please list common names and botanical names, where possible.

Classes 20 & 21 carry double point values. They are not limited to the vegetables listed in classes above.

20. "THE COLLECTOR" - Three or more varieties or cultivars of any one kind of vegetable, varieties must be identified, limit of 3 specimens of any one variety. Space not to exceed 24".

21. "HARVEST BOUNTY" - a collection of not less than 5 different kinds of vegetables arranged for effect in a basket. Space not to exceed 36".

Special class for exhibition only - no point awards.

22. "CAN YOU TOP THIS?" - a exhibit of the most unusual vegetable in your garden for shape, size, or some other peculiar characteristic.

The new Pennfield Laying Feed Program does!

It's as simple as that. You can't get 95% production out of your flock if the feed they are consuming contains only enough nutrients to allow them to produce at 85% capacity.

Each feed, in this tested program, has the density and quality to allow birds to peak at top ability — producing large egg size as early as the genetic ability of the bird allows.

A Pennfield poultry expert would like to explain how you can "challenge" feed your flock for maximum egg production. Give us a call.

Lid scarcity

(Continued from Page 1)

culprits become numerous enough, they could

An overall evaluation of this year's fruit crop revealed that the heavy rains which fell over most of these parts of the state did little harm, but may have, in fact, been beneficial The outlook calls for a big harvest of apples and peaches. Sweet cherry production suffered somewhat due to the heavy rains causing them to crack, but sour cherries did well. Pears and plums seem to be coming along a little bit lighter than last year. "They're scarce around here," Lucabaugh commented.

"Apples look really good now," an employee at Paradise Orchards, East Berlin, remarked, "but what we'll harvest depends on the next few weeks' weather. "He added that the crop has looked this good in other years, but by August things just didn't measure up anymore to what had been expected.

Mites are a potential threat to this year's apple crop, Lancaster Farming was told, and if the tiny stunt the growth of apples.

What's needed for the next six weeks to assure continued good development of apples is a good shower per week. The plentiful amounts of moisture so far this year have allowed crops to grow well, although it did create the necessity of having to spray more frequently. Paradise Orchards reported they've been out spraying once every seven days in alternate rows. At Lucabaugh's 140-acre Nunda Fruit Farm, spraying has taken place every ten to twelve days this year, compared to every 14 to 16 days in other years. "We have an average of 11 sprays on apples during most seasons," Lucabaugh revealed, "this year I've sprayed 13 times already and it'll continue right up until harvest time. The reasons for spraying are to keep ground rot, fungus, and insects under control

In explaining the comparatively low yields expected for pears, a crop amounting to only about 60 percent of what was picked last year, the Paradise Orchards employee noted that the trees are full on top, but practically bare at the bottom. "We had no frost while they were blooming," he noted.

Thursday was the first day for picking peaches at the 130-acre orchard, located just off route 234 near East Berlin. Asked what the price per bushel of peaches would be, the spokesman answered. "Eight dollars a bushel, if we can get it." He added that last year things weren't selling as well as they should have because of the canning-lid shortage and fruit producers were nervous about the situation this year.

Lucabaugh, who sells an estimated 75 percent of his crops at his own fruit stand, emphasized nobody would be able to stay in business if the present trend continues. In spite of the poor economic outlook, the middle-aged Lucabaugh kept a smile on his face, and shook his head slowly in what appeared to be an "I give up" gesture. "The consumers are hollering our products cost too much, yet they'll go down here and spend $3.50 at the track and think nothing of it"

The plight of fruit farmers has come to the attention of Congressman William Goodling, who represents parts of York, Cumberland, and Adams Counties, a noted fruit growing region According to his findings, the canning-lid shortage could leave housewives holding empty jars and orchardmen with full fruit baskets they can't sell Canning lids were supposedly manufactured and distributed, but none are showing up at the retail end.

"The consumer is willing to freeze and can, providing they find materials and supplies to can with," Lucabaugh insisted. "They're scarce."

Conservation day held

Continued from Page 1

winner in this contest will also be going to the state competition in August.

Judged in 14 categories - uniformity between furrows and rounds, even furrow ends, trash coverage, good pulverization, defacing tilled surface with the tractor or implements, plowing all land, depth of finishing furrow, smooth and level furrow bottom, clean furrow walls, adhering to boundary, uniform depth, depression in center, furrow straightness, and quick penetration - contestants had two hours to plow a plot equalling about one acre in size.

In the land judging competition, which had students from four Lancaster County high schools represented, Tom Jackson of Solanco walked off with first place honors, with team mate Jim Krantz placing third. In between them for second place was Garden Spot's Tim Weaver. Elvin Huyard, also from Garden Spot, came in fourth; fifth place was a tie between Solanco's Ken Wiker and Garden Spot's Dan Witwer; and in sixth place was Robert Sanders, Garden Spot.

A tractor driving contest for County 4-H'ers was won by 18-year-old Ron Nolt from Donegal High School. He is now eligible to compete at the State 4-H Days at Penn State on August 11, 12, and 13. Carl Thomas of Millersville, and Allen Ackley, Lititz, took second and third places, repectively, in the tractor driving event.

Concluding the day's events were a pig chase for youngsters between the ages of nine and 15 and a rooster chase for those eight and under. Eight year old Paul Archibald emerged as the triumphant winner of the rooster chase, proudly holding up his feathered prize. The young pig, which raced dumbfoundedly through a stubble field, couldn't outmaneuver Dan Witwer, who put his arms around the squealer and returned it to the temporary cage. He and Archibald were allowed to keep their "prizes."

DER selects ag advisory council

HARRISBURG - The Department of Enviromental Resources has named an Agricultural Advisory Committee to strengthen its lines of communication with the farming community.

In appointing the committee, Secretary Maurice K. Goddard said some farmers have been misinformed or are confused regarding environmental protection regulations which relate to farming, giving rise to misunderstandings and false interpretations.

He said the purpose of the new committee would be to:

—serve as a consultative body concerning environmental rules, regulations, policies and procedures relating to agriculture;

—suggest educational and informational programs to meet the needs of the agricultural community and the public at large; and

—assist in maintaining communications between the Department and the agricultural community.

Named to the group were Sens. Partick J. Stapleton and William B. Lentz, chairman and minority leader, respectively, of the Senate Agriculture Committee; Reps. Kent D. Shelhamer and Marvin D. Weidner, chairman and minority leader, respectively, of the House Agriculture Committee; Ted Fairbanks, Pennsylvania Farmers Union; Chester Heim, Director of Public Affairs, Pennsylvania Farmers Association; and Harry Ulrich, President, Pennsylvania Council of Farm Organizations.

Also, Aaron Stauffer, Pennsylvania Association of Conservation District Directors, Inc.; J. Luther Snyder, Master, Pennsylvania State Grange; Ed Osborne, Director, Bureau of Markets, Pennsylvania Department of Agriculture; and Walter N. Heine, Associate Deputy Secretary for Mines and Land Protection, and Afton V. Schadel, Chief, Division of Soil Resources and Erosion Control, both of DER.

Goddard said Heine and Schadel were chosen to represent the Department not only because of their professional positions but because they each own operating farms and thus are quite familiar with the problems of farmers in relation to DER.

"I believe this committee will fulfill a real need in clarifying the relationship between farmers and environmental protection," Goddard said. "Both sides should be working toward the same ends and to the extent that there are problems, we want to work them through. I look forward to much productive work from this group."

Terraced fields and tea plantation (top) on Chingkang Hill, Anhwei Province, China, formerly an uncultivated area. Lower scene, depects grain storage area in Heilungkiang Province. The 1974 grain harvest was reported to be 500,000 tons greater than in 1973. This year Red China reported a bumper crop, although the communist - government did not list specific figures. Winter grains, primarily wheat, comprise about one fourth of the total grain production in Red China.

Growing degree days

The average temperature for the week ending July 21 in Lancaster was 77 degrees. Degree days for those crops beginning at 40 degrees numbered 2629 nearly 100 days over the normal. For 50 degrees the days numbered 1637 which is over the normal.

Rainfall for the week was .66 inches and from April 1 was 18.30 inches.

Weather Summary

Since this is normally the warmest week of the year, it was not too suprising to find this the hottest week in nearly two years throughout the Keystone State. Typical July weather with continuously humid conditions coupled with increasingly warm temperatures, partly cloudy skies, and scattered showers and thunderstorms were the rule throughout the week. Daytime temperatures climbed mostly into the 80's with nights cooling only into the 60's and 70's averaging near normal in the extreme West and North Central Counties to 2-4 degrees above normal most Eastern areas. Extremes ranged from 46 degrees at Slippery Rock in Butler County Tuesday morning to 92 degrees at Loysville in Perry County Sunday afternoon. For the second consecutive week thunder shower activity was wide spread in Eastern sections of the Commonwealth the first half of the week and weekend. Two-three inches of rainfall was common from Allentown to Philadelphia and west into Berks County. Nearly 3½ inches rainfall was recorded in the Philipsburg area while less than 0.5 inch was recorded in most South Central and Southwestern Counties.

Manheim young farmers attend summer conference

Members of the Manheim Young Farmers Association attended the ninth annual Pennsylvania Young Farmer Summer Conference on July 18 - 19 at Shippensburg State College. This year's conference was sponsered by the Shippensburg and Big Springs Chapters.

Donald Hershey, a farmer, from Manheim R6 Participated in the first ELANCO Public Speaking Contest. Don spoke on Agriculture: America's Greatest Success Story. Through out the speach the listener was informed of how and what the American farmer has contributed to make the American life style as we know it today. Don placed second and will be the stand by speaker for the state of Pennsylvania at the National Convention in Atlanta, Georgia.

All the Young Farmers attending the convention were involved in the farm tours on Friday and Saturday. The Friday tours were in the Shippensburg area. The highlights of the day included the Smithdale Farm and Gro-Lan Farm where new 8-stall Bou-Matic Carousel parlors were in use while the tour was taking place. Touring Young Farmers saw automatic prep stalls, various types of feeding systems, manure handling systems, parlors, milking stalls and a farm dairy outlet store. Farmers also saw feed being mixed and weighed by a computerized system at the Cumberland Valley Cooperative.

On Friday evening the convention banquet was held. Following the dinner entertainment was provided by the Jesus Folk Quartet and many of the people and business who made the convention possible were introduced. Elmer Hawbaker, a farmer and former state Senator, gave a very thought provoking speech to end the banquet. A skit by Young Farmer wives and dancing ended the evening.

Tours started early on Saturday morning in the Newville area. Young Farmers toured the farrow to finish swine farm of Fred Chestnut and a 500 head beef finishing farm of Walter Fickes. Two dairy farms were toured and the Fickes Silo Plant. The day was ended with a picnic at the Huntsdale Fire Hall and tours were available at the neighboring fish hatchery.

Pennfield promotes T. Trupe

EPHRATA, Pa. - Pennfield Corporation's Egg Division has promoted Tyler W. Trupe to Distribution Supervisor. Trupe will report to the Egg Division Marketing Manager.

In his new post, Trupe will be responsible for all delivery functions and equipment. He will also supervise certain areas of customer service and order department activities and act as a liaison with contract farmers.

Before joining Pennfiled, Trupe was a salesman for a consumer products company. He began his tenure

with the Ephrata firm in 1973 as a sales representative.

The Lancaster County native resides in Akron where he serves on the Borough Council. He is married to the former Gladys Romig of Ephrata. They have three children.

PATIENCE PLEASE

Patient "Doctor, will I be able to read when I get my glasses?" Doctor "Indeed you will" Patient "That's great I never knew how to read before"

Members of the Cloister FFA in Ephrata help prepare a portion of the Hunter instruction trail located in the Middlecreek Waterfowl area. The only one of its kind in the area, the trail will help supplement the in class hunter safety instruction. Members (from left) are: Dan Hollinger, Glen Beiler and Glenn Martin.

Hunter trail constructed by Ephrata FFA'ers

The Cloister FFA is nearing completion of a hunter education instruction trail at the Middlecreek Waterfowl area. The trail was developed to supplement the in class hunter safety instruction that is being offered by the Pennsylvania Game Commission and several hunter safety instructors in local and nearby school districts. The trail developed with the cooperation of the Pennsylvania Game Commission is approximately ¾ of a mile long and offers many realistic obstacles and safety situations that could arise in the field while hunting. Hunter safety students will walk the trail in small groups with their instructor and react to the different situations. Their reactions will be scored by the instructor, and the results will help to determine the competency of the student while hunting.

The beginning of the trail is located at the rear corner of the sunfish pond parking area at the Middlecreek Waterfowl area.

NOTE: First of its kind in area. Only a few in state.

THE EFFICIENCY FACTOR

helps you get better conception and larger litters at weaning

Good sow feeding programs can go a long way toward improving herd health conception and survival of baby pigs

Use a flushing feed with AUREO S P 250 (In an Iowa study 18 5% more gilts fed AUREO S P 250 at breeding conceived during the first estrus than non medicated gilts)

Then during the critical farrowing period use a sow feed fortified with AUREO S P 250 to control many enteritis causing bacteria in sows before they spread to pigs Lower mortality among pigs from medicated sows can mean an extra pig per litter at weaning

Finally remove still another drag on efficiency by worming with feed containing Tramisol

For complete details contact any of the feed manufacturers listed below or call or write The Fox Company

Chester Holstein breeders hold field day

By: Melissa Piper

COCHRANVILLE - Area Holstein breeders and their families took time from their busy schedules to attend the annual Chester County Holstein Field Day held Tuesday at the Harry Troop Farm near Cochranville.

Nearly fifty people attended the event, which featured a judging contest in the morning followed by a noon luncheon.

During the afternoon session, speakers included the Chester County alternate Dairy Princess, Gwen King, and Harry Troop. Guest speaker for the program was John (Jack) King from the King Lee Farms in Maryland. King spoke on his dairy operation and his interest in the selecting of bulls. King has provided numerous bulls for stud service throughout the years. King also served as judge for the judging contest.

Also during the afternoon program, the winners of the judging contests were announced with the top ranking individuals receiving gift awards.

In the men's contest, first place went to Donald Hostetter with Rick Mellinger placing second. A three way tie for third saw Dale Hostetter, Dick Brown and Les High sharing the prizes.

Joyce Hershey was the top woman judge with Dorothy King placing second and Cathy King capturing third.

In the children's competition, first place went to Ed Breckbill with second place being awarded to Bev Hostetter. Brad Hershey placed third.

Victor Stoltzfus, the ten-year-old son of Mr. and Mrs. Herman Stoltzfus was the winner of a registered Holstein heifer calf which was purchased by the Holstein association from Harry Troop.

Those companies and businesses donating gifts or money for the event included: Lloyd Kreider, Penn-Jersey Harvestore, Richard Breckbill, Stoltzfus Farm Service, Atlantic Breeders Co-op, Brown and Rea Feed, Pennfield, Dependable Motors, Agway and Select Sites.

Master of ceremonies for the program was Paul King, a Holstein breeder from Chester County.

Jack King (center) gives his placings for the judging contest held during the Chester County field day.

King, a noted Holstein breeder from Maryland, was also the guest speaker for the afternoon session.

Victor Stoltzfus, the ten-year-old son of Mr. and Mrs. Herman Stoltzfus, Cochranville, was the proud owner of a registered Holstein heifer calf following a drawing at the Chester County Holstein Field Day.

Lebanon fair scheduled

The Lebanon fair, scheduled for August 11 to 15, is going into the final planning stages as areas for tents and outside commercial exhibits are being measured within the next ten days. Tents will be erected and arranged on August 7 and 8.

There will be a $1.00 parking fee this year on Monday, Tuesday, Wednesday, and Friday evenings. An admission charge of $2.00 per person will be in effect for the state sanctioned Class A tractor pull scheduled for the evening of August 15.

Poultry groups looking for additional support

The Northeast Egg Marketing Association and the Pennsylvania Poultry Federation are jointly launching a campaign in order to raise support for needed funds for the American Egg Board (AEB) and NCEN.

This action is specifically important since it comes at a time when egg producers are still realizing the shock waves generated by NCEN's Gallup poll concerning the attitudes toward eggs.

The poll reports that eggs have been seriously damaged and bears out that the voices were right in calling for no let up in voluntary support for the AEB and NCEN.

Cómplicating the problem is the fact that many producers have been under the impression that there has been a flow of funds from the national check off plan to AEB and NCEN. There has been none.

Given a successful referendum, that proposition is still months away.

Pa. Egg Producers active in the Northeast Egg Marketing Association and the Pa. Poultry Federation want to see renewed efforts to gather funds - one that will go forward without delay.

John Hoffman, director of the Pa. Poultry Federation and Paul Fisher of NEEMA have jointly announced that "the home stretch stride aimed at production and allied industries that have not as yet pledged funds will start at once."

As in other regions, the Northeast is planning an egg support breakfast at Hershey during the NEPPCO convention in October.

AEB and NCEN will have displays concerning the problems and services against the backdrop of the NEPPCO annual gathering.

A cleanup campaign is underway in other Northeast states seeking to add to the funds already underway at a target level of ½ cent per bird from producers or coming from voluntary contributions from allied industries. Each $100 contribution will entitle the donor to two places at the breakfast.

For tickets contact John Hoffman at the Pa. Poultry Federation, 3807 Paxton St., Harrisburg, PA 17711 or C. A. O'Reilly at the Northeast Egg Marketing Association, 136 Herron Ave., Hightstown, NJ 08520. All checks should be made payable to the American Egg Board Fund Drive.

It is hoped that the 90 day drive will help bridge the gap that could last until Spring of 1976.

Produce exchange re-opened

HARRISBURG - Produce Information Exchange (PIE), a service of the Pennsylvania Department of Agriculture to assist in the sale of Pennsylvania grown fruits and vegetables, will be available again this year, Secretary Jim McHale announced recently.

"Both buyers and sellers indicated last year's trial effort was a success," McHale said. "Growers and packers were able to sell produce they could not dispose of through normal channels. At the same time, buyers were able to locate new or additional sources of supply. The service this year will be available to consumer buying clubs and co-ops as well as to wholesale buyers and brokers."

The Department of Agriculture's Bureau of Markets will serve as headquarters for PIE. Growers and packers with something to sell and buyers looking for supplies can call 717-787-4210 and provide information, which will be made available to all interested parties. The service is now available and will continue through the 1975 fruit and vegetable season.

McHale pointed out the Bureau of Markets will serve only to bring buyers and sellers together. "It will make no deals and collect no fees," he said. "The sole purpose of PIE is to help sell more state-grown produce."

Bank notes

LANCASTER, PA - National Central Financial Corporation, parent company of National Central Bank, closed the first half of 1975 with a 4.9 percent net income gain as senior executives of that company predicted the development of a resurgence in the national economy.

Wilson D. McElhinny, company president, and John C. Tuten, board chairman, reported that NCFC net income for the first two quarters of 1975 was $4,460,189 compared to $4,248,812 one year ago. Income Before Securities Gains and Losses for the corporation also rose in 1975, up 3.58 percent for the six month period compared to the like period last year.

In announcing the second quarter figures, the two corporation executives expressed optimism with regard to an improvement in the economy and said that NCFC is ready to take advantage of the predicted upturn.

"With national indicators suggesting a gradual resurgence in the economy, National Central Financial Corporation has positioned itself to benefit from the opportunities and economic upturn will afford," the report said.

The two men pointed to increased bank liquidity as evidence of the corporation's preparation for general improvement of the economic climate.

National Central was a net purchaser of Federal Fund during the second quarter of 1974, averaging $29,890,000 during that period. But, during the second quarter this year, National Central sold an average of $4,716,286 in Federal Funds. This shift for NCFC in the Federal Funds Market has increased the liquidity of its investment portfolio by freeing U.S. Government securities from pledging.

The two National Central top managers also reported an increase in total deposits and the opening of the 49th and 50th full-service offices in the National Central Bank system.

On June 30, 1975, total deposits were $820,244,177 as compared to the year ago figure of $808,836,017, for an increase of 1.4 percent.

National Central opened banking offices during the second quarter in suburban Coatesville in Chester County and at Newmanstown in southeastern Lebanon County.

Penn-Jersey prepares Midwest tour

By: Dieter Krieg

O'Hare International Airport, the first stop on a tour taken by Penn-Jersey Harvestore representatives on July 9, is a city in itself. Complete with multi-level ribbons of superhighways that snake their way to and through the huge complex, it is known as the world's busiest airport - approximately 3,000 flights per day.

Modern hotels, terminals and parking garages spring up out of the flat expanses of northern Illinois terrain. There's bumper-to-bumper traffic on the highways; rows of buses and taxis, not to mention thousands of people and several hundred airplanes ranging in size from a Piper Cub to huge jumbo jets.

The occasion for the Harvestore tour was two-fold: The A.O. Smith Company, manufacturers of the familiar blue Harvestore silos, recently opened the doors to a new all-electric plant which covers more than nine acres of America's "heartland." Nearby is the site for the 1975 Midwest Farm Progress Show. considered to be the largest of its kind in the world.

The James Willrett Farm, near DeKalb, Illinois, will be the site of the Midwest Farm Progress Show, billed as the greatest on Earth.

Penn-Jersey Harvestore of New Holland is making plans to charter jet transportation to the big show, and was previewing the site. The show is scheduled for late September and will feature all kinds of agricultural machinery in action. Farmers and agri-businessmen who wish to join the Midwest tour this fall may make their reservations now by calling Penn-Jersey Harvestore.

After arrival at Chicago's O'Hare airport - only 90 minutes away from Harrisburg by jet - the group drove by car to DeKalb, Illinois, the home of the new Harvestore manufacturing plant.

Harvestore's new plant draws most of it's energy from the area's nuclear power companies. There's a direct high-tension line leading right into it. And for good reason. The new facility depends entirely on electricity to run the furnaces, motors, and lights. The cost of this energy requirement is $100,000 per month.

Features of the new 298,500 square-foot plant include a million - dollar press which exerts up to 2,500 tons of pressure to stamp the plates used in making the blue silos. A bolt machine turns - out bolts at the rate of 6,300 per hour. The electric furnaces fire up to a temperature of around 1,600 degrees Fahrenheit. Staring through it from a good distance, yet still close enough to feel the heat, one observer noted "You'd get a suntan in a hurry if you decided to streak through there."

When in full operation, the new facility will turn out two new Harvestore silos per hour, and use up 1,500 gallons of the company's unique glass-coating flormula in less than six hours. Electronically - controlled "guns" spray the glass coating on to sterile, electrically - charged sheets of steel. Later the metal plates proceed through the furnace where the glass coating is permanently fused with the steel. This is also the time when the grey-blue color turns to the characteristic blue. "It's the cobalt in the powdered - glass mixture which gives it the color," explained Charles Enloe, who heads Penn-Jersey Harvestore.

"There's not many people working in the plant," one visitor commented. Another responded: "Machines don't talk back or go on strike." Considering the size of the factory, there were only a handful of people working, and once the plant is in full operation, only approximately 300 people will man the monstrous machines and furnaces.

After lunch in down-town DeKalb, served by waitresses dressed in colonial costumes, the group proceeded to the Farm Progress Show site. Travelling mostly on straight, flat country roads, we were surrounded by tall corn and bushy soybeans that stretched as far as the eye could see. Although it was only the ninth of July, some of the corn was eight feet tall already. James Willrett, owner of a 1,400 - head beef cattle operation, noted that "things have never looked better for this time of year." Hopes for bumper crops and lower cattle feeding prices were high.

Willrett's 1,150 acre farm will be the site for the two-day Farm Progress Show on September 30 and October 1. He has kept all of his beef cattle in total confinement on slatted floors for the past ten years and averages about two and a half pounds of gain per animal per day.

The 60 by 225 foot barn allows for 18 square feet of space per animal and has a capacity of 550 head. Numerous fans provide ventilation. A cluster of nine Harvestore silos provide feed. The ninth one was just built last month, with the inscription: "50,000th Harvestore Silo, built June 11, 1975."

Willrett, a friendly, tanned individual feeds his cattle on corn silage and high moisture corn and figures eight pounds of feed to be equivalent to one pound of gain on a 90 percent air-dried basis. As is, the feed to gain ratio is 12:1.

Manure storage below the building has a capacity of five months, although Willrett pumps it out more frequently.

Most farms in northern Illinois appeared to be very well taken care of. But there were no dairy farms. Here and there the visitor could see the remains of a dairy barn and barn yard. Close to town there were abandoned barns with sagging roofs and broken windows. Urban sprawl was evident in Illinois, as it is most anywhere.

Frank Possessky, standing 6 feet 3 inches tall, is dwarfed by Illinois corn on July 9, 1975.

James Willrett, right, talks with, left to right: Frank Possesski, Narvon, Joe Kelly, western regional sales manager for Harvestore, and Charles Enloe, of Penn Jersey Harvestore

NOW from

Purina Dairy Research

The complete Milking Ration Pellet that offers Dairymen a Golden Opportunity to increase milk production and lower feed costs.

"the milking rations that Out Perform their Feed Tags"

Through the years, Purina Dairy Research scientists have developed many "firsts" in the business of feeding dairy animals more efficiently. For example, Purina was first to develop a dry calf starter, first to establish feeding and management studies on a large, commercial dairy operation and first to make long-time comparisons on high energy milking rations.

Now Purina Dairy nutritionists have formulated milking rations they call their "Purina Golden Chows" because these rations have a golden appearance but also because they offer dairymen a "golden" opportunity to market extra milk with a milking ration that is formulated and priced right.

THE RIGHT "GOLDEN CHOW" FOR YOUR HERD IS AVAILABLE THROUGH YOUR PURINA DEALER.

Brenda Maulfair

Plans to educate public on milk's value

by Sally Bair
Feature Writer

"You don't know how much I really wanted to be Dairy Princess," Brenda Maulfair said just minutes after she received the crown at the Lebanon County Dairy Princess contest last month. With that candid statement she expressed what many winners must feel but never put into words.

Brenda added that she was very surprised, but she was obviously quite happy that she won. Later Brenda said, "I didn't want to enter the contest this year, I wanted to wait another year so that I would have a better chance. However, someone suggested that I enter this year so I will be in the county to make appearances."

"I really wanted to be Dairy Princess - I still can't believe it," she says again with an unbelieving shake of her head.

Sixteen-year-old Brenda is the daughter of Mr. and Mrs. Paul Maulfair, Jonestown Route 1. The Maulfairs farm about 130 acres and have a milking herd of 40 Holsteins and Ayrshires. This gives Brenda a particular distinction, since it seems the majority of Dairy Princesses come from Holstein herds.

Although the Maulfairs have been in dairying for 22 years, they are relative newcomers to Lebanon County, having purchased their present farm about four years ago. They formerly lived just over the line in Dauphin County where their children were active 4-H'ers.

Brenda feeds some hay to her three-year-old Ayrshire 4-H animal, "Girl."

Brenda has three older brothers, Paul, 23; Bruce, 21; Dale, 19; and three sisters, Juanita, 18; Diane, 14; and Elaine, 12. So there's a few more Dairy Princesses to come!

When asked about her plans as Dairy Princess, Brenda said, "I want to do all that I'm asked to do. I think the main thing is promoting milk - informing consumers about its nutritional value. I hope to promote it and just tell people about it."

To get the idea of using dairy products across to teenagers, Brenda suggests just "setting a good example by using them." She emphasizes here that there are many dairy products so if someone doesn't enjoy drinking milk there are other ways of getting the food value.

"One thing that really bugs me," Brenda said, "is the problem of non-dairy products versus dairy products. The consumer is getting ripped off, and often doesn't realize they may just be getting chemicals whipped up. The consumer must be informed as to what they are buying." She added, "They would be wiser to use the real thing than just to get all those empty calories."

This week Brenda met with all the county dairy princesses at a seminar to help prepare them for their jobs in the coming year. Before she went, she said, "I think it will be very worthwhile, because I'm not that well informed. I think it is needed for all the girls if we are to do the job as well as we should."

Brenda took much needling during the contest about her Ayrshire cows, and she said that of course the milk she drinks contains both Holstein and Ayrshire milk. But her 4-H projects are Ayrshire - all three of them. She has one three-year-old and two heifers she will be showing this year. She said one reason she likes to show Ayrshires is that she has "a better chance of going further." But she adds, "The competition is there at district and state shows."

She is a member and secretary of the Norlebco Dairy Club. Last year she won a Gold Medal at 4-H State Days with her demonstration on the breeds of dairy cattle. She said, "It was a lot of work, but I'm glad I did it. You have to have a lot of time to prepare a demonstration like that."

But all the work was worth it for several reasons. First of all Brenda said that State Days were really interesting and a lot of fun, and it was great to get to know other people - both from the state, and from Lebanon County.

Another benefit of the demonstration was being selected to attend the Royal Winter Fair in Toronto, Canada as a guest of Eastern Milk Producers Cooperative. Brenda said, "I really enjoyed it. The horse show was really great and the neatest thing of all was a sculpture made of butter of Princess Anne on a horse jumping over a wall." Brenda suggested that this might be the start of a new use for dairy products. Another thing about the fair, she said, "There were a lot of cattle - and a lot of Ayrshires."

A senior at Northern Lebanon High School, Brenda is a member of the senior chorus, the National Honor Society and she is president of the Bible Club. She explained that next year she will be on the newspaper staff and will be a hall monitor.

The Bible Club, she said, was begun last year, and they meet every two weeks. Their programs consist of special speakers, Bible games and devotions. She said, "It is the only school where it is allowed to meet during school." They meet during an activity period.

About her future, she says, "I really have no idea, but I will probably go to College."

Her church plays a large part in Brenda's life. She is a member of the Fredericksburg United Methodist Church, where she sings in the choir, plays piano for Sunday School and is devotional leader for Christian Endeavor.

She just completed a stint teaching Bible School for 20 children going into first grade. Her comment was, "It was fun, but I'm glad it was only two weeks."

Another activity for her this summer was being a youth leader at Gretna Glen camp during their junior high program. She said she worked for one week, with one other couple, and it was an eye-opening experience. She said, "It was different from working with little kids - sometimes it was worse. It was really rough. We had some campers from Center City Philadelphia, and discipline was a real problem. I think we did get through to them though.

Brenda thinks that dairying "has a great future. It's an industry that we won't be able to do without." She says, "Farmers must do their best to get better cows and produce dairy products as cheaply as they can so the consumer won't have to pay a lot." She quickly added, "Milk is a cheap product for what's in it, compared with what you get nutritionally from other foods. It is a cheap, really good food."

Brenda enjoys being a dairyman's daughter - one of her favorite gifts from the Dairy Princess contest is a T-shirt proclaiming, "I'm proud to be a farmer's daughter." Of course, there are chores on the farm, and Brenda helps with the milking every evening, washing udders, carrying milk and washing milkers. She helps with other work, such as unloading hay, and assists her mother in cleaning and working in their capacious garden. Mowing the lawn is also her job and her "other job" is doing a lot of baby-

(Continued on Page 41)

Growing flowers is a favorite hobby of Brenda's.

Select a Mini Vacation

Summer months here in southeastern Pa. find farmers quite busy with haying, planting and the everyday barn chores. There are some special upcoming events however that area farmers and their families may be interested in attending as a "mini vacation."

Lancaster 4-H Dairy Shows

The annual Lancaster 4-H Dairy Round-up will be held on July 29-30 at the Guernsey Barn Pavilion, Rt. 30 East. The colored breeds will be judged on Tuesday the 29th with Holsteins to be judged on July 30. John Harris, Dauphin County will serve as type judge with Eugene Sherman as the fitting judge. Mrs. Carol Ocker Sherman will be judging showmanship.

Lancaster County Holstein Show

The Lancaster County Holstein show for open classes will be held on July 31 also at the Guernsey Barn Pavilion. Jake Emig will be the judge The show starts promptly at 10:00 a.m.

Guernsey Field Day

The annual Lancaster County Guernsey Field Day will be held on August 5 at the farm of Fred Kreider in Nottingham, south of Lancaster. Judging contest will begin at 10:30 a.m. with Steve Leiser, officiating. A chicken barbeque will be held at noon with an afternoon program to follow.

Ray Weber, public relations chairman, for the Dairy Council will be the featured speaker.

Holstein Field Day

Lancaster County Holstein breeders are invited to attend the annual Field Day to be held at the Shelley Shellenberger farm at Mt. Joy R1 on August 7.

The judging contest will begin at 10:30 a.m. with Bob Pepple from Chester County officiating. A chicken barbeque will be held at noon. Tickets will be $4.25 with reservations and checks sent to Clyde Martin, R1, East Earl, Pa.

Directions to the Shellenberger farm are as follows: From Lancaster travel west on Route 283 and get off at the first Elizabethtown exit (Elizabethtown-Rheems). Turn left at the exit, cross route 230 after which you will cross over a railroad bridge. Traveling straight ahead you will be on Colebrook Road. Follow Colebrook Road about ½ mile, around an "S" curve, and the Shellenberger farm is the first farm lane on the right.

FFA Hog Show

The FFA market hog show will be held on July 29 at the Lancaster Stockyards beginning at 8:00 p.m. Showing will continue through the morning with the sale to be held in the afternoon.

Lancaster dress revue slated for July 29

"A Country Fair" is this year's theme for the Lancaster County's annual 4-H Dress Revue. Approximately ninety girls, ages ten to eighteen, will be participating on Tuesday, July 29 at the Farm and Home Center at 1383 Arcadia Road, Lancaster.

In the morning, while the girls are busy judging themselves and being judged by professional judges, Mrs. Debbie Rounsaville, Fashion Coordinator and Pattern Maker for Spadea Patterns, Lancaster will be the featured speaker at 11:00 a.m. in the Farm and Home Center auditorium. Her program will be a demonstration on how patterns are designed by the draping method. At 1:15 p.m., Mrs. Ruth Nierenberg, proprietor of Nimble Thimble, Lancaster, will speak on the latest sewing techniques. The fashion show begins at 2:00 p.m. in the auditorium, at which time the Dress Revue winners will be announced. The public is invited to all of Tuesday's programs, which will be held in the Farm and Home Center Auditorium. Lunch reservations are available; please call the Penn State Extension Office, 394-6851.

This year, eight Senior and three Junior Dress Revue winners from Lancaster County will be able to attend the Capital Area 4-H Dress Revue which will be held on Thursday, July 31 at the Holiday Inn East, York. The Regional winners will then compete in the State 4-H Dress Revue, held in conjunction with 4-H State Days on August 11-13 at the Pennsylvania State University, State College, Pennsylvania.

Grangers crown new prince and princess

HARRISBURG - Barbara Harrison, 19, of West Chester, and Fred Rudy, 18, of Sewickley R4, have been named the 1975-76 princess and prince of the Pennsylvania State Grange.

They were selected at the 23rd annual State Grange youth camp and will succeed Jane Hill, 19, of Kutztown R3, and George Rodgers, 18, of Slippery Rock R3.

Miss Harrison, a 1973 graduate of Henderson Senior High School, is a daughter of Mr. and Mrs. T. Hartley Harrison and a member of Goshen Grange, Chester County. She is a student nurse at the University of Pennsylvania Hospital.

Rudy, a son of Mr. and Mrs. Carl F. Rudy, graduated from Quaker Valley High School. He will attend Pennsylvania State University this fall and major in horticulture. He is a member of Mt. Nebo Grange, Allegheny County.

Rudy and Miss Harrison will compete for national prince and princess honors at the annual session of the National Grange at New Jersey in November 1976. Jane Hill and George Rodgers, the 1974-75 princess and prince, will compete for the national titles this year at the Grange convention on Columbus, Ohio in November.

Runners-up for this year's state titles were Anna May Snyder, of 126 S. 17th St., Camp Hill, Cumberland County, and Dale Weisz, Fombel R1, Lawrence County.

Mt. Joy Cooking Club

The Mount Joy Home Economics Club held their roundup on July 22 at St. Mark's United Methodist Church with approximately 250 persons present. The different projects were exhibited and ribbons were awarded to the members finishing their projects.

The projects included - sewing, cooking, knitting, crocheting, macrame and cake decorating. The awards given in cake decorating were: Class One - 1st. Twilla Brubaker, R2 Manheim, 2nd (tie) Connie Frey, Manheim R1 and Sherry Groff, R1 Mount Joy, and 3rd Cheri Ney, 720 Water St., Mount Joy. Class Two - 1st. Judy Stoner, Manheim, 2nd Lois Miller, R4 Elizabethtown, and 3rd Marian Becker, R4 Elizabethtown. Best of show of all cakes went to Twilla Brubaker, Reserve best of show tie Connie Frey and Sherry Groff.

Refreshments made and served by the 4-H girls include Petti Fors, cherry tarts and cookies, and punch was also served.

Miss Debra Gregory, from the Lancaster Extension Service attended and gave a few remarks.

It was announced that three new projects would be started this Fall. They are Design with Textures, Crewel, and Grooming and Modeling. If anyone is interested please contact Mrs. John H. Nissley, R1 Mount Joy, 717-653-4149. All the 4-H leaders of the club wish to thank the members and parents for their participation and support during the past season.

Plans to educate public on milk's value

(Continued from Page 38)

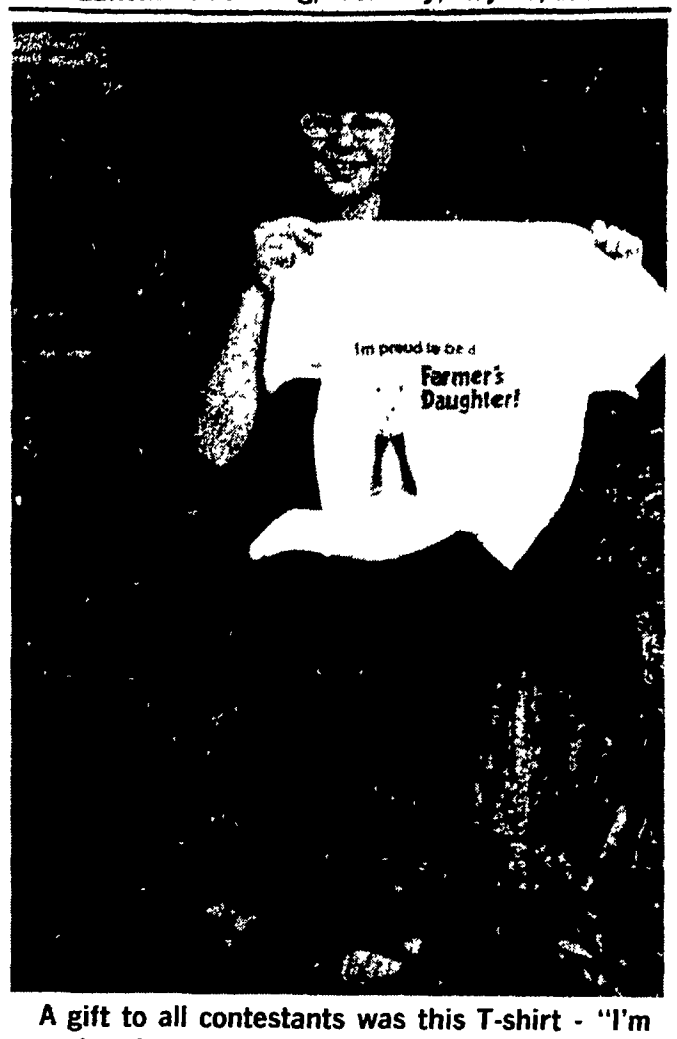
sitting.

"I really like living on a farm. I don't know what I'd do if I didn't live here. There is always something to do - the barn to clean or something else. And a farm is a good place to learn responsibility," she adds thoughtfully. "I know what work is, and I think kids from the farm don't have so much trouble adjusting later on when they have to earn a living."

In her few minutes of spare time Brenda says she likes to sew and crochet and a special interest is growing flowers and drying them. She also likes to do "craft things" and enjoys playing the piano.

Brenda credits 4-H with helping her gain some of the confidence and ability which paid off when she won the contest. She said she feels her demonstration gave her experience in being before a group which will stand her in good stead when she must answer questions. Another thing which makes her feel at ease is a lot of singing which she and her sisters have done in church. She said, "I'm not really scared anymore - I've been scared so often before. So I don't think being before groups will bother me."

"Really wanting" to be dairy princess will be a big asset as Brenda begins her year representing Lebanon County's dairy industry. And her candor and ability to speak will gain friends for both Brenda and the industry.



A gift to all contestants was this T-shirt - "I'm proud to be a farmer's daughter."

Farm Women Calendar

Saturday, July 26
Farm Women Society 5 meeting at 1:30 p.m.

Monday, July 28
Farm Women Society 5 of Berks County game night at 7:30 p.m.

Recipe Exchange

Home on the Range

Welcome to another edition of Home on the Range. This week we have a special recipe which was sent in by one of our readers who evidently liked the Watergate Cake too!

We have two requests which we hope you can give us some help on. One of our readers would like a recipe for funnel cakes. Also a reader would like to have a recipe for homemade spaghetti sauce to can. If you have any of these requests please send them along to us and why not enclose one of your own favorite recipes?

For more cooking ideas see our Junior Cooking Edition.

Lazy Daisy Oatmeal Cake

1¼ cup boiling water
1 cup oatmeal
½ cup shortening
1 cup brown sugar
1 cup white sugar
1 teaspoon vanilla
2 eggs
1½ cup flour
1 teaspoon soda
½ teaspoon salt
¾ teaspoon cinnamon
¼ teaspoon nutmeg

Mix oatmeal and water. Let stand 20 minutes. Cream shortening and sugar. Blend in eggs and vanilla and oatmeal. Add rest of ingredients. Bake at 350 degrees to 50-60 minutes.

Frosting:

Mix ¼ cup melted butter, ½ cup brown sugar, 3 tablespoons light cream, ½ cup nuts and ¾ cup coconut. Take cake out of oven and spread frosting on top. Put under broiler until bubbly.

Mrs. Noah Kreitzer
Lebanon, PA

xxx

Pineapple Fluff

1 pound marshmallows
2 cups crushed pineapples
1 cup milk
1 cup whipped cream
16 graham crackers (rolled fine)
one-third cup butter (browned)

Heat marshmallows and milk in the top of a double boiler until marshmallows are melted. Cool and add the pineapple and cream. Pour mixture into a dish lined with graham crackers. Chill and cut in squares.

Mrs. Sam Stoltzfus
Madisonburg, PA

xxx

Honey Drop Cookies

1 cup shortening
1 cup brown sugar, packed
2 eggs
one-third cup honey
1 teaspoon vanilla
3 and one-third cups flour
2 teaspoons soda

Mix shortening, sugar, and eggs thoroughly. Stir in honey and vanilla. Blend soda and flour; stir in. Chill until firm, heat oven to 350 degrees. Roll dough into balls or drop unto ungreased baking sheet. Bake 10 to 12 minutes. Makes about 6 dozen.

xxx

Watergate Salad

1 box dry Instant Pistachio Pudding
1 large container of whipped topping
1 16-oz. can crushed pineapple
½ cup chopped nuts
½ cup miniature marshmallows

Put all ingredients in bowl and mix together.

Chill before serving. Do not drain pineapples, add all to dry pudding.

Mrs. Miriam Jamison
117 Murry Hill Drive
Lancaster, PA

xxx

Best Tomato Catsup

1 cup vinegar (white)
1½ teaspoons whole cloves
1½ teaspoons broken stick cinnamon
1 teaspoon celery seed
8 pounds ripe tomatoes (about 25 mediums)
1 tablespoon chopped onion
¼ teaspoon red pepper
1 cup sugar
4 teaspoons salt

Combine vinegar and spices, cover, heat to boiling; remove from heat; let stand. Scald and peel tomatoes, mash; add onion and red pepper, heat to boiling. Cook 15 minutes, stirring occasionally. Put through food mill or course sieve. Add sugar, heat to boiling. Cook until mixture is reduced to one-half; 45 to 60 minutes. Strain vinegar and spices, discard spices. Add vinegar and salt to thickened sauce, heat to boiling. Simmer to desired consistency, 30 to 40 minutes, stirring frequently. Seal in hot, sterilized jars. Makes 2 pints.

Route 1
Kempton, PA

xxx

Granola Cereal Mix

½ cup sunflower seed meal
1 cup stone-ground corn meal
½ cup unsweetened coconut
½ cup soya flour
12 cups quick or old-fashioned oats, uncooked
½ cup chopped dates
½ cup raisins
1 cup chopped pecans or walnuts
½ cup sesame seeds
½ cup wheat germ

For second mixture:

½ cup granulated or brown sugar (optional)
1 cup water
1 cup honey
1 cup sesame seed oil

1. In large mixing bowl, combine sunflower seed meal, corn meal, coconut, soya flour, oats, dates, raisins, pecans, sesame seeds and wheat germ. Mix well to blend.

2. In smaller bowl mix together the sugar, water, honey, and sesame seed oil, then add to the first mixture, stirring until the mixture is moist but still retains its crunchiness. If it is too moist, add more oatmeal; if too dry, add more honey and water. If you wish, you may also sprinkle on a little cinnamon and add a little bit of vanilla flavoring.

3. Spread this mixture on baking sheets, then bake at 225 degrees for one hour, turning occasionally. Mixture should become light brown. Makes one gallon, which can be stored in the refrigerator in tightly covered jars. To serve, add milk, applesauce or fresh fruit. This also makes a great snack!

New Tripoli, PA

No-bake Cheesecake

Crumb Mixture:
6 tablespoons melted butter
2 cups graham cracker crumbs

Mix and place in the bottom of a pan.

Filling:

2 envelopes gelatine (plain)
1½ cups sugar
4 eggs separated
2 cups milk

Cook together for a few minutes.

Add:
2 tablespoons lemon juice
And 1 large package of cream cheese

Cool and beat whites of 4 eggs stiff and add ½ cup sugar. Fold in gelatine mixture and fold in 2 cups whipped cream. Place in pan of crumbs and refrigerate until set.

Replaces belly-slung mowers

The Yazoo Rider

The Yazoo Rider is already well known to commercial cutters. They bought twice as many of them this year as they did the year before.
It's a completely industrial-standard machine. Yet it costs about half as much as the tractors they've been using, with their belly-slung blades and huge, unwieldy gearcases.
Why are we telling residential owners about it?
Because the Yazoo Rider actually costs less than well-known "homeowner" brands of belly-slung tractor mowers.
In residential use it should last a lifetime.

Try these with a belly-slung mower

• UNDER FENCES • 12" TURNING RADIUS
• UNDER SHRUBS • TO WATERS EDGE

Comes with 76 60 48 42 or 36 cut Other attachments available

Junior Cooking Edition

This week brings another edition of Junior Cooking with our readers sending in some interesting recipes to try. A variety of recipes are featured this week and we hope you'll try one!

We'd like to make a correction on a recipe that was printed recently. In the ingredients for the Zippy Beef Casserole, the amount of catsup should be two-thirds cup instead of 3 cups. We apologize for this mistake.

For more recipes and cooking ideas, see our Home on the Range column!

Root Beer Drink

1 teaspoon yeast dissolved in ½ cup warm water
2 quarts sugar and
1 bottle of root beer extract

Mix together and put in bottles. Let stand in warm place for two days. Refrigerate and serve.

Johnny Stoltzfus
Age 9
Honey Brook, PA

xxx

Graham Cracker Fluff

2 egg yolks
¼ cups sugar
two-thirds cup milk
1 package gelatine
one-third cup cold water
2 egg whites
1 cup whipping cream
1 teaspoon vanilla
3 tablespoons butter
3 tablespoons sugar
12 graham crackers

Beat egg yolks, sugar and milk. Cook in top of double boiler till slightly thickened. Soak gelatin in cold water. Pour hot mixture over softened gelatin and stir till smooth. Chill until slightly thickened. Add stiffly beaten egg whites, vanilla and whipped cream to chilled mixture. Combine melted butter, graham cracker crumbs and sugar to make crumbs. Sprinkle half in bottom of serving dish. Add gelatine mixture and top with crumbs. Chill to set.

xxx

Barbequed Chicken

½ cup corn oil
½ cup lemon juice or vinegar
¼ cup water
2 teaspoons salt
¼ teaspoon pepper
1 teaspoon paprika
1 tablespoon minced onion
3 broiler fryer chickens

Combine ingredients for sauce and let stand for one hour. Makes 1¼ cups enough for three chickens. Brush on chicken while baking.

Harlan S. Martin
Age 7
New Holland, PA

xxx

Watermelon Cake

2 cups sugar
1 cup shortening
1 cup cold water
3 cups cake flour
3 teaspoons baking powder
2 teaspoons vanilla
1 teaspoon salt
whites of five eggs

Cream sugar and shortening. Add vanilla. Sift flour, baking powder, and salt. Add alternately with water to first mixture. Fold in beaten egg whites. Bake at 375 degrees for 30 minutes. Coloring may be added to resemble watermelon.

LADIES, HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Cantaloupes Can Enhance Summer Meals

Cantaloupes are in season now and make delicious additions to summer meals. Served with thin slices of Italian prosciutto, they can be used for an elegant first course Filled with cottage cheese, a half melon is a filling, low-calorie lunch To use it as a dessert, try filling a half melon with ice cream, or chunks of other fruits

Cantaloupes make a perfect snack anytime high in Vitamin A and low in calories. (Half of a 5" cantaloupe has 60 calories.)

Now that you know its value, and have some ideas about what to do with it, you want to be sure to choose your melon wisely

USDA marketing specialists say selecting a melon for maximum quality and flavor is tricky, and there is no absolute formula There are, however, several guidelines that will be of help to you

There are three major signs of full maturity:

1. The stem should be gone, leaving a smooth, symmetrical shallow basin

2 The netting, or veining, should be thick, coarse, and corky

3 The skin color between the netting should have changed from green to a yellowish-buff, yellowish gray, or pale yellow

While the above three signs indicate maturity, you also want to be sure that your cantaloupe is ripe The rind should have a yellowish cast and a pleasant cantaloupe odor when held up to the nose It should also yield slightly to light thumb pressure on the blossom end of the melon

Most cantaloupes are quite firm when freshly displayed in stores Therefore, it is usually a good idea to hold them at room temperature for a few days to allow for completion of the ripening process Then put them in the refrigerator

An overripe cantaloupe will have a pronounced yellow rind color, and the entire rind will be soft. Mold growth indicates decay Small bruises, however, normally will not hurt the fruit, but large bruised areas should be avoided because they generally cause soft, watersoaked areas underneath the rind.

With these few indicators in mind, you should have no trouble in selecting delicious, juicy melons to perk up your summer meals

Imitation Chocolate

Next time you buy some chocolate, look carefully at the label. Chances are the ingredient listing will show "chocolate flavored" rather than chocolate.

Most consumers either are unaware of the difference or, if they are eating more chocolate and enjoying it less, they aren't sure why Harold Neigh, Extension consumer marketing specialist at The Pennsylvania State University, points out that candy makers and food processors using chocolate suffered two economic blows last year — high prices for both sugar and cocoa butter. High prices of ingredients made it necessary for candy manufacturers to either reduce the size of candy bars, raise prices, or both. Most companies did both and then started looking around for substitutes.

Three of the nation's top five chocolate-bar manufacturers have begun to market products in which cocoa butter, the definitive ingredient for chocolate, has been replaced by a vegetable fat system made entirely of domestic oils and costing only 20 to 45 percent as much as the cocoa butter.

Nobody in the industry is suggesting that the days of pure chocolate are numbered, but most agree that substitute coatings will take a larger share of the chocolate-bar market.

Klassy Klippers

The final work meeting of the Landisville Klassy Klippers was brought to order at 9 a.m. July 17, by President Cathy Brubaker. She then led the members in the 4-H Pledge. The minutes of the last meeting were read and roll call was taken with each member responding by telling how far she is with her project. A treasurer's report and a report from the round-up committee were given Ruthann Irwin, Cathy Brubaker, and June Grube commented on their exchange trip to Colorado. The members then selected Ruthann Irwin and Leslie Grove as their senior and junior queen candidates, respectively A county council report was also given by Ruthann Irwin. The meeting was then adjourned and demonstrations were given by Kamie Fabor, Andrea Hess, and Theresa McVey The members used the remainder of the session to finish their projects

Lincoln Sewing Club

The eighth meeting of the Lincoln Sewing Club was held Wednesday morning, July 23. Carol Balmer, president conducted the business meeting. Game and song leaders Nancy Nolt and Tonya Lehman respectively lead the group in recreation and group singing.

Members then worked on their projects. The next meeting will be July 30 at the Ephrata High School.

Farm Women Societies

Society 3

Members and their families of Society 3 held their summer picnic in the Ephrata Park on July 20

A picnic lunch featuring barbequed chicken and pork chops was served at noon

The afternoon program was spent by participating in different forms of recreation Winners of the games were Mrs John Edwards, Mr and Mrs Melvin Nolt, Mrs Robert Hackman, Jack Lee, Willie Stober, Mrs Kelly Horst and Mrs Carroll Meyer

Following the activities, Mrs Jesse Balmer conducted a short business meeting

The next meeting will be held on August 16 at the Paradise Lake Retreat, Denver Mrs Ronald Meck and Mrs Carl Meck will be the hostesses. The members of the northern Lancaster Home Economists 4-H club will be guests.

Society 5

Farm Women Society 5 will hold their next meeting at the home of Mrs. Harold Herdwig on July 26 at 1 30 p m in East Petersburg.

The Lancaster County picnic for farm women will be held Wednesday, August 6 at the Penn Central Manor starting at noon Bring your own place setting and a covered dish.

Society 5 will be traveling to Ocean City for a day at the shore on August 18 The price will be $8 00 with children under 12 at half price Anyone wishing to go should contact Mrs Abram Weidman Manheim by August 4 The group will leave the Roots Auction parking lot at 6 00 p m

Society 10

Farm Women Society 10 met recently at Longs Park with Mrs Lucy Miller and Mrs Cyrus Neff serving as hostesses.

President, Mrs. Jay Hacbecker conducted the business meeting. Donations will be given to "Big Brothers" and the county project. Mrs. Doris Thomas, representing the extension service, related many changes during the 62 years of service. She told of the service rendered by some of the early officers such as Dutch Bucher, Anne Forbes and Yvonne Cook. Mrs Thomas discussed the change of the extension from merely agriculture needs to urban and consumer facets.

The annual picnic for the group will be held at Central Manor Camp Grounds on Wednesday, August 6 at noon

Society 30

Society of Farm Women 30 met July 21 at the home of Betty Neff of Christiana for an evening of volleyball At the business meeting following - a $25.00 donation was voted for the county project The increase in dues was discussed as well as the county board meeting to be held Aug 6 The next meeting will be a day at the shore - Aug. 9.

Ida Risser

Sometime ago, the Conestoga Creek had its name changed officially to the Conestoga River It s difficult to remember this until it overflows its banks and muddy water 200 feet wide rushes past our front lawn and over the meadow

The cows, standing in water up to their bellies, investigate the unfamiliar surroundings and I fear they will step off the steep bank into the swift current We watch trees, logs and debris float rapidly downstream and as night falls the sound of surging water seems to deepen.

When morning comes, we see the Creek; oh, River, is again in its banks and we are left with a fresh supply of mud on the grass.

I've just planted my second garden and it takes determination to find the time to do it Without those few minutes planting seeds there will be no harvest in the fall

More beans cucumbers, squash parsnips and turnips are now sprouting all over again There are celery brussel sprouts, cauliflower and sweet potato plants to keep them company. Guess I'll worry about storage space when they are mature.

You see, I have a tendency to feel I must use every scrap of vegetation - be it tiny ears of corn (nubbins), the last small strawberries or even imperfect apricots which I am presently canning. Not being able to buy lids doesn't worry me too much as I use many of them over and over again. I'm not recommending it but it's worked fine for me

Pequea Valley 4-H Club

The members of the Pequea Valley 4-H Sewing and Cooking Club met for their last project meeting this year on Monday, July 21. The meeting was opened by the President, Sally Martin. Each year the club bakes cookies in an old-fashioned stove at the Threshermen's Reunion held at Rough and Tumble in Kinzers, Pa. Everyone is encouraged to help at one of the times . Thursday, August 21 and Saturday, August 23, are the dates to help Each day has four shifts to work in nine to twelve; to three three to six; and six to nine

Club Fashion Show is scheduled for Thursday, July 24 at 7 00 in the Pequea Valley Intermediate School auditorium. The theme will be "Happiness Is . ", being centered around Charlie Brown and the other Snoopy characters. The date for judging the projects will also be Thursday, July 24 at 1 00 p.m.

The Pequea Valley 4-H Sewing and Cooking Club met on Monday, July 14 for their fifth project meeting. Sally Martin, president conducted the business meeting.

It was decided that during this year members would receive different awards depending on their year in project work. First through third year members will be receiving pins with fourth year members receiving a charm bracelet. Each year after the members will receive charms for the jewelry

The date for the club picnic will be August 25 at the New Holland Park. The raindate is Tuesday, August 26

City 4-Hers view Berks County farm life

Lucy Trexler
Berks Correspondent

KUTZTOWN — A merging of country and city took place July 19 when the Kutztown Community 4-H Club hosted the Cloverleaf 4-H Club from inner-city Philadelphia. The two clubs met at the Kempton Community Center to begin the day with a picnic and general get acquainted period. Wading in the adjorning creek proved thrilling to the youngsters used to hot concrete sidewalks. After games were played and songs sung the group walked over to the Kempton Farm Museum for a personal tour from the curator, Howard Geisinger, Kutztown. Here all of the children had an opportunity to learn exactly how the surrounding hillsides were farmed one hundred or more years ago. Included on the tour were glimpses of homelife from the past-rocking washing machines, gas clothes irons and wood stoves.

After the Farm Museum a slightly longer journey was made by the joint 4-H Clubs. They boarded a special touring car of the WK&S Railroad for a trip through the valley along the banks of the Ontelaunee to Wanamakers, a small village three and one-half miles north of Kempton.

These two clubs were able to share this day together through the initiative of their leaders, Mrs. Mabel Wilson, Philadelphia and Mrs. Barbara Stratton, Kutztown. Mrs. Stratton and Mrs. Willson met two years ago at a 4-H club leadership conference in Washington, D.C. That summer the Kutztown group sold pizzas to bring the Philadelphia club to Kutztown for a tour of Kutztown State College, lunch at Kutztown Park and a visit to Crystal Cave. The city youngsters also were able to visit an operating dairy farm. The following year the Philadelphia group raised money to bring the Kutztown club to the city for a tour of Philadelphia landmarks. This year again, the exchange trip was funded by a pizza sale.

In the future the two clubs hope to continue this event, presenting aspects of city and country life to young 4-H members while they have a fun-filled day also.

Berks County Holstein day planned

The Berks County Holstein Club will hold its annual field day on August 1 at Elwood Ohlinger's Reu-Hel Farms located north of Leesport, between Mohrsville and Dauberville on Railroad Road.

Judging of dairy classes will begin at 10:00 a.m., with a noon lunch immediately following and a short program after that. Members are asked to bring their own chairs.

Field day slated at research center

A field day on the topic of herbicide weed control in different crops will be held on July 30 at the Southeastern Research Center of Penn State near Landisville. There will be two programs one at 1:30 p.m. and another at 7:00 p.m.

Speakers on the subject will be Dr. Richard Cole - soybeans; Dr. Nathan Hartwig - corn and John Yocum - tobacco. The public is invited to attend the program.

Cloverleaf 4-H Club

The Weisenberg Rainbow Clover Community 4-H Club met on July 17, 1975 at the Seipstown Grange Hall. Twenty-two members and 5 leaders were present. Project books were checked and arrangements were made to enter our projects at the Allentown Fair and for round-up.

Our club attended the Lehigh County wide Annual picnic and field day at Neff's Valley Park for the first time as we are a newly organized club. A good time was enjoyed by everyone, especially swimming. Our club won the challenge in the Pyramid.

For future plans we are going to attend Brunch at Walp's Restaurant on October 11, 1975, and also in the planning stage of going to Hershey Park in August.

John Masters
News Reporter

Lincoln 4-H Club

On July 14 the Lincoln Community 4-H Club went to the Elm-Penryn 4-H Club. A demonstration was given by a member of the Elm-Penryn club on planting seeds for the Outdoor Flower Gardening project.

At the last meeting of the Lincoln Community 4-H Club they went to William Martin's pool for a swimming party. A short meeting followed after the swimming party.

At the next meeting of the Lincoln Community 4-H Club they will host the Lititz-Manheim 4-H Club.

The meeting will be held on August 19, 1975 at the Mt. Airy fire hall at 7:30 p.m.

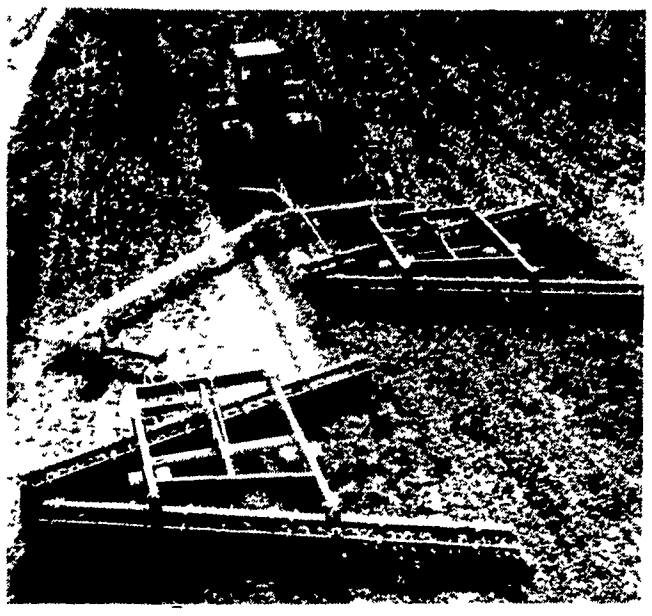
What's New . . .

Hydra-Hitch released

BJ Manufacturing Co., Inc., of Dodge City, Kansas announces the addition of the Hydra-Hitch to the growing line of BJM products. Designed to pull multiple drill and tillage equipment this unit eliminates the need to buy larger implements to accomodate larger horsepower tractors. Now you can hook smaller implements together and still fold them easily for transport. Available in three different models, the BJM Hydra-Hitch allows you to change from field to road position (and back to field position) right from your tractor seat in a matter of seconds - at a touch of your hydraulic lever.

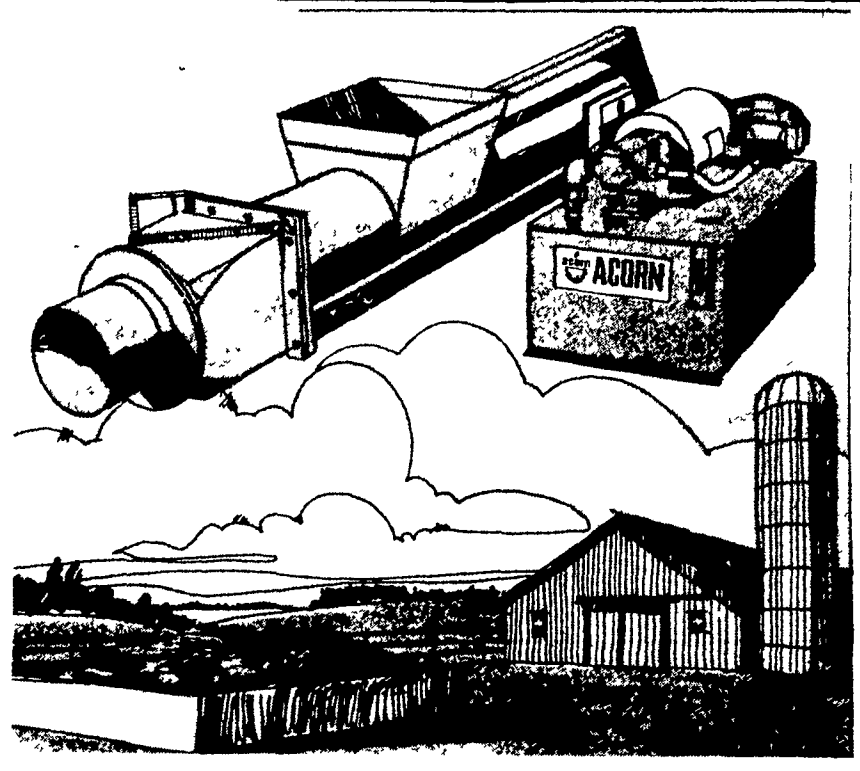


The Model 2100 is designed to handle two drills. Telescoping hitch arms adjust to most disc drill sizes, and up to 16 feet of hoe drills. Built of durable 4" x 6" tubing, this unit has a rating of 100 h.p. at 5 m.p.h.

The Model 3150 is capable of handling three drills up to 16 feet of over-all width. Rated at 150 h.p. at 5 m.p.h. the Model 3150 main frames are constructed of heavy wall 5" x 7" and 4" x 6" tubing.

The Model 2215 main frame is constructed of 6" x 12" tubing and is designed primarily to pull two tillage tools. This model is rated at 215 h.p. at 5 m.p.h. and can handle two chisels, sweepers, dics, ets., with a working width up to 36 feet.

For further information contact BJ Manufacturing Co., Inc., Box 370, Dodge City, Kansas 67801. Telephone 316-227-8173.

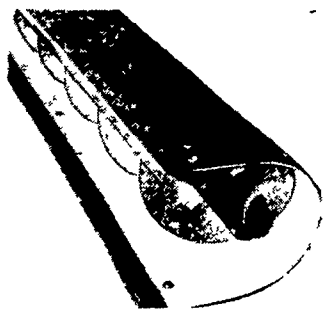


Hydraulic Manure Pump System

Acorn Equipment Corporation Stevens Point, WI, recently introduuced this hydraulic manure pump system. Animal wastes, with or without bedding materials, are pumped under hydraulic pressure, through a 10-inch PVC pipe below the frostline, to a remote holding area up to 200 feet away from the barn. Fresh manure is forced up and into the pile from the center bottom. Old manure at the surface forms a crust to reduce odors and fly problems.

Heart of the Acorn manure pumped storage system is a massive, hydraulically-operated piston. The hydraulic pump reciprocates at approximately 9 cycles per minute. The machine, cylindrical piston forces liquids, slurry and straw-filled wastes through a one-way gate which prevents backflow. The pump is powered by a 10 hp motor.

Acorn further reports that the system has not only been extensively field-tested under all weather conditions; it is already in daily operation on many farms throughout the diary belt



Trough Liner

An economical thermoplastic U-Trough liner has recently been introduced by P & D Mfg. Co., Inc., for new and worn U-Troughs.

The liner is exceptionally easy to install by inserting the liner under the augers. Saves wear from metal rubbing against metal, less friction, noise, horsepower and comes in 10' lenghts. Comes complete with installation hardware and instructions. For additional information write P & G Mfg. Co., Inc., Dept. L, Plainfield, Illinois 60544.

SENIOR CITIZENS

Each day 4,000 Americans turn 65 When offset by the death rate the elderly population increases by 1,000 each day By the year 2000 there will be 28 million persons over 65 as compared with about 20 million in 1970

COUNTY DHIA MONTHLY REPORT

JUNE 1975

A Holstein at the Wernersville State Hospital, number 1376, heads the list of production records completed in 305 days or less for June. The four-year-old Holstein produced 23,712 pounds of milk and 866 pounds of butterfat.

The second highest production record completed belongs to Teen Chal Farm's number 146 with 18,348 pounds of milk and 853 pounds of butterfat.

Following is a list of Berks County's DHIA herds which produced 1.5 pounds of butterfat per cow per day.

With Many Features That Add More to Free Stall Housing...

Martin Custom FREE STALLS

EASY INSTALLATION

Installation is faster, simpler and less expensive because of the unique features built into each Martin Free Stall. Pre-drilled, rear angle brackets allow easy fastening to wooden headboards, walls—or for placement that is independent of any support.

Only the Martin Free Stall has that "extra bend" that provides a straight downward leg into a narrower concrete curb. Concrete curbs that hold and retain the bedding—as well as anchor each free-standing stall—need not be constructed wider than six inches.

KILL FLIES

NOW USE THE BIG 4 IN DAIRY FLY CONTROL FROM SHELL

CIOVAP®
INSECTICIDE EMULSIFIABLE

For easy control of:

- flies
- lice
- mosquitoes
- chorioptic mites
- Quick kill . . . plus residual control
- Mix with water for spraying . . . or with oil for back rubbers

Quick Kill...

- flies
- mosquitoes
- gnats

VAPONA®
INSECTICIDE EMULSIFIABLE

Use for

- fogging
- spraying
- misting

on beef and lactating dairy cattle and animal buildings

BUSTER THE DUSTER
and RABON® Livestock Dust

- Controls Horn Flies and Lice and aids in the control of Face Flies on lactating dairy cattle and beef cattle
- Buster has a weatherproof cover
- He's refillable with easy load cartridges
- Easy-to-hang—just one rope to tie

Fly control that works fast...

and lasts for

- buildings
- manure piles

RAVAP®
INSECTICIDE EMULSIFIABLE

fast knockdown residual control

Horse jamboree winners announced

Baltimore county senior 4-H members rode off with a big share of the honors at the second annual state 4-H Horse Jamboree earlier this month (July 1 & 2) at the Maryland state fairground in Timonium.

Some 240 teen-agers from 16 counties were represented in the two-day equestrian event, which featured judging contests, knowledge and skills competition related to horsemanship, as well as educational displays and clinics.

The Baltimore county riders corralled first-place honors in team competition for both the senior 4-H horse judging contest and the senior 4-H horse bowl knowledge team competition. They were also a close second in the junior 4-H horse judging team event. And Denise Dlugokenski, 17, of Joppa was runner-up in the senior individual 4-H horsemanship contest.

Teams from neighboring Carroll county placed first in the junior 4-H horse judging competition and second in the senior 4-H horse judging event.

Prince Georges county fielded the champion junior team in the 4-H horse bowl knowledge contest, and Patricia Kriemelmeyer, 19, of Waldorf won the senior 4-H horsemanship event. Miss Kriemelmeyer lives in the Green Acres Farm development, northwest of Mattawoman, in extreme south central Prince Georges county.

Anne Arundel county representatives did well in the Horse Jamboree junior 4-H events. They lassoed the top two placings in junior horsemanship and a fifth-place finish in individual junior 4-H horse judging. Their team was runner-up in the junior 4-H horse bowl knowledge competition.

Top competitors in the various events were as follows:

Horse Judging

Senior individuals - 1. Elizabeth ("Tally") Pappas, 19, of Cherry Hill (Cecil county); 2. Betsy Arrington, 17, of Glen Arm (Baltimore county); 3. Tom Kiddy, 15, of upper Marlboro (Prince Georges county); 4. John Kanzler, 17, of Accoceek (Prince Georges county); 5. Dan Shirley, 15, of Westminister (Carroll county).

Senior teams - 1. Baltimore county; 2. Carroll; 3. Montgomery; 4. Cecil; 5. Prince Georges. Members of the winning Baltimore county team were Betsy Arrington; Kim Dum, 15, of Lutherville, and Diane Gitschier. 17, of Parkville. Alternate team member was Peri Ann Keiser, 15, of Ruxton.

Junior individuals - 1. Sue Brandt, 13, of Ruxton (Baltimore county); 2. Beth Phaup, 14, of Bel Air (Harford county); 3. Dora Weaver, 13, of Perryville (Cecil county); 4. Pam Patterson, 14, of Parkton (Baltimore county); 5. Joseph Bregman, 13, of Davidsonville (Anne Arundel county).

Junior teams - 1. Carroll county; 2. Baltimore county; 3. Harford; 4. Cecil; 5. Queen Annes. Members of the winning Carroll county team were Sally Shirley 13; Laura Green, 13, and Patty Kram, 11. Alternate team member was Ricky Foltz, 12. All live near Westminster.

Horse Bowl

Senior teams - 1. Baltimore county; 2. Talbot county. Members of the winning Baltimore county team were Cynthia Stern, 16, of Randallstown; Cindy Dietz, 15, of Catonsville, and Lana Ratlief, 15, of Phoenix.

Junior teams - 1. Prince Georges county; 2. Anne Arundel county. Members of the winning Prince Georges county team were Jean Spivey, 13, of Mitchellville; Donna Stacey, 12, of Bowie, and Ann Morschauser, 14, of Bowie.

Horsemanship

Senior individuals - 1. Patricia Kriemelmeyer, 19, of Waldorf (Prince Georges county); 2. Denise Dlugokenski, 17, of Joppa (Baltimore county).

Junior individuals - 1. Burrell Davidson, 14, of Annapolis; 2. Michelle Maker, 14, of Linthicum. Both are Anne Arundel county residents.

Members of the winning horse bowl team and the captain of the runner-up team will represent Maryland in northeast regional competition on Nov. 8 at the PennRam Motor Inn on Carlisle Pike near Mechanicsburg, Pa.

Four of the top eight individuals in the state senior 4-H horse judging event also will be selected to carry Maryland and hopes in regional judging competition the same day at the Farm Show building in nearby Harrisburg, Pa. Both of the regional events are being held in conjunction with opening day activities at the nineteenth annual Keystone International Livestock Exposition, set for Nov. 8-14.

Maryland dairy princess to be selected July 31

Who will be the new "first lady" of Maryland's dairy industry?

Seven young women from throughout the state of Maryland will compete July 31 for the title of Maryland Dairy Princess with the coronation to be held at the Hunt Valley Inn, Cockeysville.

Competing for 1975's honors will be Miss Robin Rhoderick, 18, daughter of Mr. and Mrs. Arthur Rhoderick, Hagerstown (Washington County); Miss Susan E. Ensor, 13, daughter of Mr. and Mrs. James Ensor, New Windsor (Frederick County); Miss Terry Lynn Leppo, 18, daughter of Mr. and Mrs. Melvin Leppo, Skyesville (Carroll County; Miss Patricia Dougherty, 17, daughter of Mr. and Mrs. James Dougherty, Pylesville (Harford County); Miss Susan E. Snyder, 18, daughter of Mr. and Mrs. Reed S. Snyder, Gaithersburg (Montgomery County); Miss Pamela M. Clark, 20, daughter of Mr. and Mrs. David M. Clark Sr., Centreville (Queen Annes County); and Miss Emma Jean Saathoff, 17, daughter of Mr. and Mrs. Bernard Saathoff, Easton (Talbot County).

Miss Melissa Dudrow of Lime Kiln (Frederick County) is the reigning Maryland Dairy Princess and during the evening of July 31 will preside over the coronation of her successor.

The coronation will conclude a full day's program of judging and activities for the contestants each of whom was selected earlier in the year as an Area winner in the Dairy Princess Program sponsored by Maryland's total dairy industry.

Coronation festivities will begin at 8 p.m. at the Hunt Valley Inn with the completion of the judging. Each contestant will be interviewed and then give a short talk. Entertainment will feature skits and presentations by the contestants and then will come time for the awards - forst Miss Congeniality as voted by the contestants, then the first runner-up and finally the coronation of Maryland's Dairy Princess for 1975.

The winner will receive a scholarship award from the dairy industry, a wardrobe and the opportunity to serve as spokesperson for milk and other dairy products for the coming year.

Buck track announces pull results

Two separate tractor pulling contests were held last Saturday at the Buck, with the first one being open to all farmers, followed in the evening by a state sanctioned class A pull featuring seven superstock and modified classes.

A spokesman for the Buck Tractor Pulls Inc., noted that the first contest, which began at 1:00 p.m., had many local farmers competing, some of them for the first time. The class A competition got underway at 7:00 p.m.

Following are the results in the farm tractor classes:

7,000 pounds farm

1. Dave Frey, Millersville, PA, Co-Op E4, 247.11; 2. Chester Eckman, Peach Bottom, PA, Farmall 400, 241.6; 3. Baadley Dickmyer, Lionboro, MD, AC180, 237.0.

9,000 pounds farm

1. Walter Schnetzka, Freeland, MD, AC180, 225.7; 2. Herb Frey, Marietta, PA, JD4010, 205.4; 3. Craig Frey, Conestoga, PA, 706 Farmall, 204.7.

12,000 pounds farm

1. Robert Myer, Womelsdorf, PA, 1150 MF, full pull; 2. Paul Kreider, Palmyra, PA, 856 IH, 297.7; 3. Joe Wivell, Columbia, PA, 1070 Case 279.1.

12,000 pound turbo

1. Arthur Tracey, Freeland, MD, 1066 IH, 266.3; 2. Jim Robinson, Windsor, PA, 1066 IH, 250.5; 3. John Risser, Hershey, PA, Ford 8000, 243.6.

15,000 pound turbo

1. Arthur Tracey, Freeland, MD, IH 1066, 195.1; 2. Jim Robinson, Windsor, PA, IH 1066, 187.2; 3. John Larrimore, Centerville, MD, IH 1066, 176.11.

Unlimited farm class

1. Bob Palmatory, Centerville, MD, IH 1066, 182.3; 2. Jay Foreman, Lititz; PA, IH 1466, 173.8; 3. Arthur Tracey, Freeland, MD, IH 1066, 168.4.

Following are the results of the Class A competition featuring modified and super stock tractors.

12,000 pound S.S.

1. Harry Griest, Coatesville, PA, IH 1456, full pull; 2. Ed Horman, Frederick, MD, IH 1466, full pull; 3. Thomas Bedgar, Freeland, MD, IH 806, 256.6.

5,000 pound S.S.

1. Dale Smoker, Cochranville, PA, AC 180, two pull pulls; 2. Bedgar, Freeland, MD, Farmall 450, f.p., 267.11; 3. Charles Welsh, Gap, PA, Case 800, f.p., 225.3.

9,000 pound S.S.

1. Michael Wright, New Freedom, PA, IH 1060, full pull; 2. Thomas Bedgar, Freeland, MD, IH 806, 278.4; 3. Harry Griest, Coatesville, PA, IH 1456, 276.2.

7,000 pound modified

1. Galen Spickler Inc. Team, Mt. Joy, PA, CK40 w-2-440's, f.p., 231.0; 2. Lester Houck, Kinzer, PA, CK40 w-2-440's, f.p. 228.7; 3. Glenn Darnell, Laytonsville, MD, CK40 w-2-454's, f.p. 225.2.

7,000 pound super stock

1. Craig Leggett, Boonesboro, MD, Deere Power 2, 282.1; 2. Marlin Brubaker, Quarryville, PA, ACD21, 237.4; 3. Craig Leggett, Boonesboro, MD, Deere Power 1, 222.4.

5,000 pound modified

1. Elwood Flowers, Manheim, PA, Farmall M w-427 Chev. 287.1; 2. Ozz Arment, Ephrata, PA, F-20 w-430 Lincoln 284.1; 3. Galen Spickler, Elizabethtown, PA, Massey 44 w-2-327's, 282.7.

9,000 pound open

1. Glenn Darnell, Laytonsville, MD, Cockshutt 40 w-2-454's, f.p.; 2. Lester Houck, Kinzer, PA, CCK40 w-2-440's, 280.0; 3. Lester Landis, Lititz, PA, Massey 55, 268.1.

Egg quality studied by 11 countians

Eleven county residents were among the class of 44 adult students from nine states that graduated from the 44th NEPPCO Egg Quality School held recently in Airlie, Virginia.

Receiving certificates of proficiency for achieving high scores in both their written and practical examinations were: Fred Lahr, of Duthland Farms, Rheems, David Hess, John Leonard, Jay Weaver and Larry Weaver of Hess Bros. Farms, Inc., Ephrata; Roger Bryson and Henry Hess of Plain & Fancy Egg Ranch, Inc., Elizabethtown; Fred Raffensperger and Mrs Mary Updike of L.M. Sheaffer Company, Ephrata; and Ralph Griffith and Pablo Ortiz of Weaver Quality Eggs, Inc., New Holland.

Keystone Fair features antique farm machinery

Keystone Grange Fair has become an annual event in the historic Trappe & Collegeville area. The fair will be held on August 2, 1975 from 11:00 a.m. until dusk at the Boro Park, West 1st Avenue, Trappe. Raindate is the following Saturday.

General fair chairman, Albert Zvarick of Collegeville has announced the approximate schedule of events for the day. Grounds open at 11:00 a.m. Parking fee is $1.00. No other admission charge. 12:00 Noon Opening ceremonies including mayors of the boroughs of Trappe and Collegeville and the introduction of Grange Fair Queen, Miss Robin Jackson.

1:00 p.m.: demonstration of antique farm machinery, engines, and grain threshing.

2:15 p.m.: introduction and recognition of guests including Montg. Co. Dairy Princess, Miss Judy Batista, King of Prussia.

2:30 p.m.: antique car parade.

3:00 p.m.: repeat of threshing demonstration, childrens games.

4:15 p.m.: walking plow demonstration.

4:45: cow milking.

5:15p.m.: musical and variety show.

The old time farm machinery and engines have been a highlight of the last two fairs and will be continued on a larger scale. Samuel Kriebel, Mainland, is a collector of many pieces of equipment and engines dating from many years ago. A special feature will be a 1917 Case traction engine (tractor) which was used originally in eastern areas as a 40 horse power source of belt power to run various farm machinery. Sam and his son Roger will be exhibiting a number of engines circa 1909, an 1892 Heebner thresher manufactured in Lansdale, and an 1884 corn grinder, among other items.

Assisting Kriebel will be Albert Zvarick and Robert Hess of Collegeville demonstrating a horse operated treadmill. Horse trainer is Ira Hall, Spring City. Some other engine collectors exhibiting will be Robert Kerstetter, R. D. West Chester; Harold Stump, Souderton; Paul Seachrist and Clarence Kooker of Quakertown.

The antique car parade list is not completed but nine or more autos of varying types are expected to be on display and to parade briefly.

Pony rides and children's games should appeal to the youngster plus several kinds of farm animals and perhaps even a baby deer.

A music and variety program will complete the day. Banjo duo Eugene Claycomb and "Huntz" Keyser will return from a previous fair, and another special treat will be a male barbershop quartet. Final program will be announced the day of the fair.

For those gardeners specializing in growing vegetables there will be a vegetable show competition, open to the public.

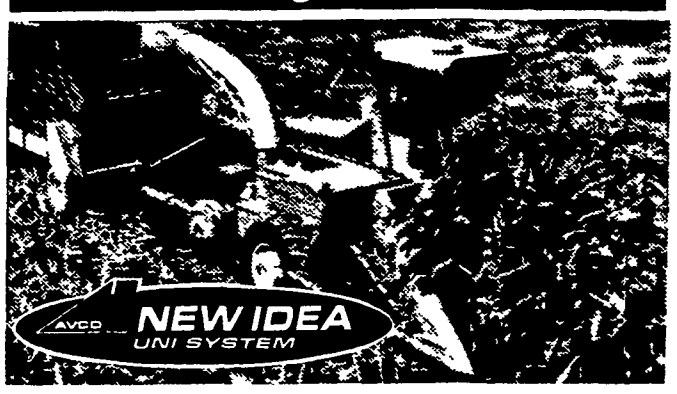
New Idea's
Uni-Forage Harvester



Superchopper
Best selling Forage Harvester
15% more capacity!

The Uni-Forage Harvester has non-stop cutting and plug-free chopping ability, too. More than 60 tons an hour in corn.

Four feed rolls and six spiral knives give you top performance hour after hour—with a more uniform cut (down to 3/16" for better silo packing).

And it's part of a great system of self-propelled harvesting equipment requiring only one interchangeable Power Unit.

The Uni-Forage Harvester, with 2-row wide or 3-row narrow row crop heads, cornhead adapter for making ear corn feed, windrow pickup, direct cut attachment . . . all good reasons why

Uni-System just plain makes more sense.

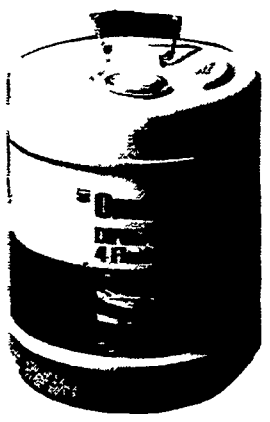
DIFOLATAN®
THE FLOWABLE FUNGICIDE
THAT HELPS STOP
PLANT DISEASES.

Chevron
ORTHO
Chevron Chemical Company



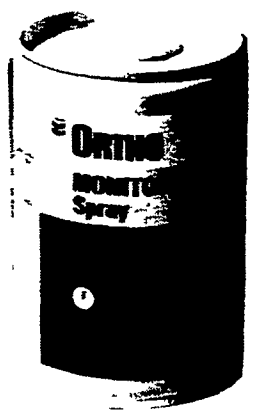
When used as directed,
ORTHO DIFOLATAN 4 Flowable
offers vegetable and melon
growers these pluses...

- ☐ Effective, broad-spectrum disease control.
- ☐ A convenient liquid formulation that eliminates the messy, time-consuming job of mixing slurries.
- ☐ A built-in spreader-sticker that resists washing off . . . to assure full protection between recommended spray intervals.
- ☐ A flowable formulation that sprays fast and evenly.
- ☐ Full-season protection – you can apply it up to the day before harvest.
- ☐ Is compatible with several commonly used pesticides.
- ☐ Stays in suspension with only a minimum of agitation.

KNOCKS OUT EVEN RESISTANT GREEN PEACH APHID

- OUTSTANDING CONTACT KILL
- RESIDUAL ACTION
- LOCAL SYSTEMIC ACTIVITY
- EASY TO HANDLE FORMULATION

MONITOR.
THE MORE
EFFECTIVE
INSECTICIDE FOR
POTATOES.



If you grow potatoes, cucumbers, melons or mechanically harvested tomatoes, there's a broad-spectrum fungicide that can improve and simplify your disease-control program It's ORTHO DIFOLATAN 4 Flowable, which has proven highly effective in protecting these crops against many major fungus diseases – including hard-to-control Anthracnose on tomatoes, cucumbers and melons, and Early and Late Blight on potatoes.

Recent registration clears the way for use on cucumbers, to also combat Fruit (Belly) Rot in southeastern states. Here's what you can gain by putting DIFOLATAN 4 Flowable to work for you in your disease control program for vegetables and melons.

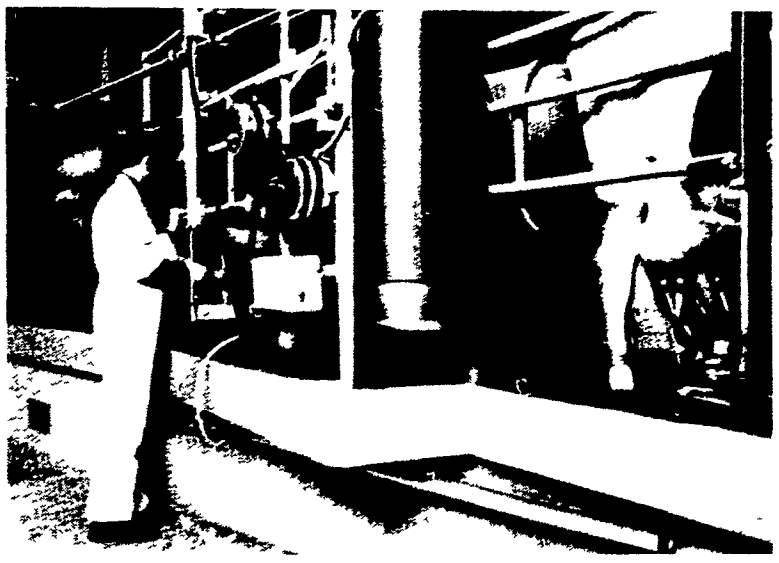
SURGE QTO AUTOMATIC MILKER SYSTEM

PATENT PENDING

. . . the Most Advanced System of Automatic Cow Milking!



Milking in a Surge Diagonal Stall Parlor with Automated Prep Stalls—one operator can efficiently use up to six Surge QTO Breaker Cup Milker Units.* Automatic prepping, genuine Surge milking, automatic teat cup removal—all make for better, faster, more profitable cow milking.

*Ratio of milker units per operator may exceed above recommendations, depending on capability of operator and efficiency of the parlor.

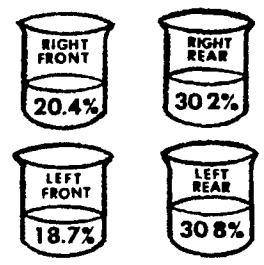
There's nothing like the QTO Automatic Milking System . . . especially when you're milking in a Surge Automated Diagonal Stall Parlor.

Cows are first washed and stimulated in the automated prep stalls. The operator need only flip a switch to move a "prepped" cow into the milker stall. After wiping the udder dry and using a strip cup, the QTO Milker can be attached immediately By adjusting the Surge Randel® milker support, the QTO Milker is kept in the ideal milking position with proper downward, forward milking action.

From this point on, the QTO Milker does the rest. As individual quarters milk out—the QTO senses when milk stops flowing and removes the teat cup automatically. There's no guesswork as to when the cow's quarters are milked out. No chance for overmilking milked-out quarters. No harmful fluctuations of vacuum levels which may lead to an incomplete harvest of the milk crop. Just good, sound cow milking, performed with a Surge QTO Breaker Cup Milker that is designed for fast, safe removal of all the milk.

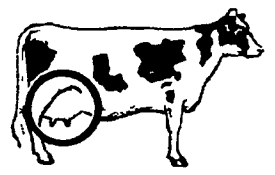
QTO quarter indicator lights tell you when each teat cup is removed and when the cow is finished milking. The operator then checks the udder, dips the teats and flips a switch to let the cow out.

Cows are milked individually . . . and each quarter is given the special attention needed to maintain Money Making Milking®.



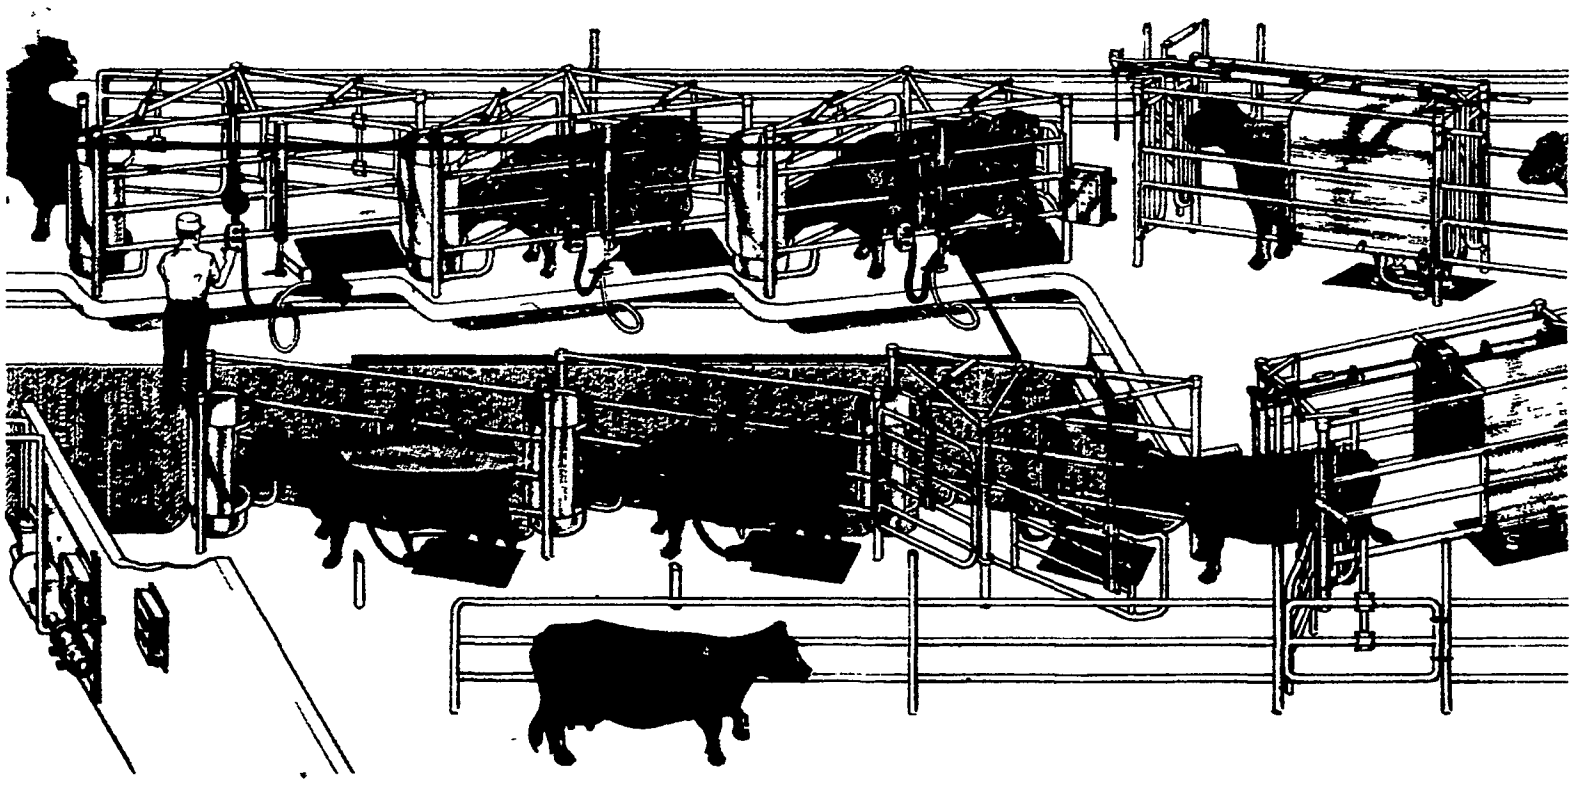
Automatic Removal of Individual Teat Cups . . . as each Quarter Milks Out!

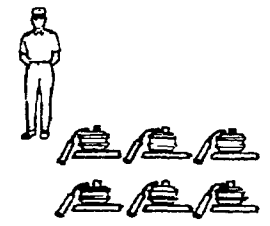
Assures a Good Job of Cow Milking for Top Milk Production!



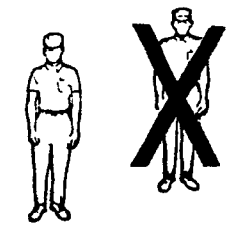
Safeguards Your Cows and Helps Maintain Udder Health!

Automatic QTO Milking in Automated Surge Diagonal Stall Parlors





Permits Increased Ratio of Milker Units Per Operator!



Reduces Labor Costs and Eases the Milking Job!

Grape shoot positioner evaluated at Penn State

Tractor-mounted devices for mechanically positioning grape vine shoots in large vineyards have been found efficient in studies by agricultural engineers and horticulturists of The Pennsylvania State University. Shoot positioning gives maximum sunlight to the entire grape vine grown under the Geneva double curtain trellis system, a common method of producing grapes commercially.

The shoot positioner also promises to make harvesting and pruning operations easier, the work at Penn State indicates. Several of these mechanical shoot positioners have been built and are being used by grape growers in Pennsylvania, New York, and Michigan. The commercial grape crop in Pennsylvania alone is valued at over 8 million dollars annually.

Several prototype positioners were built and tested from 1970 to 1974 at Penn State's Erie County Field Research Laboratory at North East. The latest models use moving plastic fingers to position shoots on the outside of the rows, with hanging chains to open up the area between the two top wires of the Geneva double curtain trellis. The system has been equally successful in single curtain no-tie vineyards.

Heading up the research are C. T. Morrow and M. D. Shaw, agricultural engineers, and C. W. Haeseler, pomologist, all with the College of Agriculture. Details on the positioner, including photographs, are featured in the Spring issue of "Science in Agriculture," the quarterly magazine of the Agricultural Experiment Station at Penn State. Free copies are available from the Mailing Room, 112 Agricultural Administration Building, University Park, Pa. 16802.

The hanging chains are 5-16 inch log chains, about 5 feet long, which did an effective job in the experiments with little damage to the vines. The chains should be coated with a flexible plastic to reduce damage to the vines and trellis.

Data have been collected on yield per vine, cluster weight, berry weight, soluble solids, and vine vigor or pruning weight. Plans for constructing a mechanical shoot positioner are available from the Cooperative Extension Service at Penn State. In grape producing areas, county agents will generally have copies.

Results to date are not completely conclusive, but mechanical shoot positioning appears to be a real possibility, especially with the labor situation as it exists presently, Dr. Morrow stated in "Science in Agriculture."

It appears, he said, that the mechanical operation would be most successful if conducted early in the season. Each succeeding year since 1970 the positioning was done at an earlier stage of vine development. In 1974 the vines were mechanically positioned about 5 days before full bloom. At this early stage there was little damage to the vines. There were indications, however, that the operation should have been repeated a week or 10 days later to obtain maximum benefit.

Although the principle of positioning has been incorporated successfully into the machine, Dr. Haeseler said a positive vine response has not been evident to date with respect to positioning shoots mechanically. Hand positioning of shoots has produced positive responses in the vine with respect to yield, cluster weights, and berry weights. Hand positioning once per season may be sufficient.

The cost of constructing a Penn State grape shoot positioner, using a slider-crank mechanism, should be less than $1,000, Morrow and Shaw reported. They indicated additional studies are needed to relate shoot positioning operations to other cultural practices, to determine the optimum time for shoot positioning, and to establish pruning procedures most compatible with machine positioning.

Fulton Grange meets

Fulton Grange 66 met July 14 with Master Donald Trimble presiding. The Youth Committee is sponsoring a bus trip to a Phillies ball game on August 15.

The Grange voted to oppose House Bill 1198 and Senate Bill 208, which would stifle the use of parttime help and migrant labor. Farmers affected by this resolution have no way to recover increased production costs, especially in the wholesale and contract markets where buyers determine prices. The Grange agrees that seasonal farm workers must be protected against abuse and exploitation but feels that protective legislation must be reasonable without endangering vital food production.

Lecturer Joyce Holloway opened the program with group singing of America the Beautiful, Mr. Jack Teaman, representative on Inter-County Hospitalization spoke on the change in some of the policies. The program was held on ritualism, beginning with the reading of scripture found in the four degrees. A ritualism quiz was given between the men and the women, with the men winning. Charles McSparran demonstrated code reading.

The next meeting will be the picnic at 7:00 p.m. The committee in charge consists of Mrs. Jesse Wood, Mrs. DeWitt Bacorn, and Mrs. Donald Trimble. The Grange will furnish rolls, butter and iced tea. Each family is to bring their own place settings, a meat dish and another dish.

No more free admission to Cecil County Fair

The 22nd annual Cecil County Fair will be held at Fair Hill, Md. (Rt. 273), from Wednesday, July 30 thru Saturday, August 2.

The fair was started in 1954 as a 4-H Fair and has grown through the years with the support of the County Commisioners, State Fair Board, and civic organizations, as well as donations from local merchants. This year will be the first year that admission will be charged. The charge is due mainly to the Fair Board's concern over providing the type of program the county as a whole would want plus the necessary security and services to the exhibitors and public. Admission charges will be $1.00 per person per day or $2.00 per person for a pass for all four days. 4-H and FFA will be admitted free on your membership cards and all children under 12 will also be admitted free.

Attractions this year are cattle, pony, horse, goat, hog, and sheep shows; farm and home exhibits; art and handiwork exhibits; organizational and commercial exhibits; demonstrations by homemakers groups; an animal kindergarten for children of all ages, who may never have seen baby farm animals; plus grandstand shows every evening.

This years tractor pull has been expanded to two big nights - Wednesday, July 30 at 7:00 p.m. and Thursday, July 31 at 7:00 p.m. Wednesday's pull will include field stock, modified, open, and super stock while Thursday's pull will be garden and 4-wheel drive tractors.

Also on Wednesday a chicken bar-b-que will be held from 4-7:30 p.m. Tickets may be purchased at that time.

Thursday will be a really big day for mom and the kids, with demonstrations by the Colora Homemakers, a bicycle rodeo, a family machinery safety program all taking place in the morning hours with dairy cattle and dairy goat shows in the afternoon followed by the pretty animal contest, Thursday evening. The evening program will be climaxed by the crowning of the Cecil County Farm Queen for 1975 followed by music by the ever popular Perryville flash, Shorty Nesbitt.

Friday will be another jam-packed day with demonstrations by the Kenmore Homemakers, both 4-H and open Horse and Pony Shows and the 4-H tractor driving contest. Happy the Clown will be entertaining the kids while their parents watch the antics in the air by the three plane airshow. Happy will be back in the evening with his magic show for the whole family. Friday's music will be furnished by the U.S. Navy's Country and Western Show.

A unique glass-blowing demonstration by Andrew Beideman starts Saturday's program with more Horse and Pony activities plus lots of 4-H doings - automotive driving contest, 4-H dog show, and the 4-H Float Parade. Acrobatics will round out the evening with members of the University of Maryland Gymkana Team bringing their famous show to Cecil County. Saturday's music will be provided by Ephrata, Pa. disc jockey, Ken Lightner and his group.

Rural population growing

WASHINGTON - Large numbers of Americans are moving to rural areas and small towns, reversing the massive rural-to-urban migration that occured from World War II through the 1960's, according to a report released today by the U.S. Department of Agriculture.

Between 1970 and 1973, nonmetro population grew by 4.2 percent, compared with an increase of only 2.9 percent in metro areas, reports demographer Calvin Beale of the Department's Economic Research Service. This new trend, he notes, will have a continuing impact on U.S. population distribution at least to the end of this century.

Both economic and attitudinal factors are drawing people away from big cities and into less densely populated areas. Some reasons for the growth of nonmetro countries are increased settlement there of retired people, improved job opportunities created by decentralization of manufacturing and other industry, expansion of state colleges, and increased recreation activity. Nonmetro counties adjacent to metro areas have shown rapid growth. In addition, the birthrate seems to be higher in nonmetro than in metro counties.

Even in those areas where population is still decreasing - such as heavily agricultural or predominantly black nonmetro counties - the rate of outmigration is slowing down.

Aside from economic factors, the appeal of major urban areas has diminished for many people, including the young and mobile as well as those at or near retirement age. Easier transportation and communication and the modernization of rural life have helped make rural areas, small towns, and the small metro area appealing, Beale says.

LEBANON COUNTY DHIA MONTHLY REPORT

MAY 1975

M. Luther Bennetch's grade Holstein, number 56, topped the Lebanon County DHIA charts for May with 789 pounds of butterfat and 21,910 pounds of milk.

Coming in second, only three pounds behind the leader, was Mervin Horst's grade Holstein, number 13. She pumped out 786 pounds of butterfat and 19,273 pounds of milk.

The Isaac Zimmerman herd had the highest herd average for May at 2.11 pounds of butterfat per cow per day. Second high for the month was Robert Martin's herd with 2.05 pounds of butterfat.

The following is the Lebanon County DHIA Report for May. Listed are those herds with a butterfat production average of over 1.25 pounds per cow per day, and individual records which exceed 600 pounds of butterfat produced in 305 days or less.

Thoughts in Passing

INTERGRATION
Jerry L. Oglino
Hinkletown
Alternative School

The word "integration" is a very common word in the United States today. The term integration is normally used when law-makers and educators are striving to achieve racial balance in our public schools. This article is going to be devoted to integration; however, it will not be used in the same context as law-makers usually view it. Instead, I will deal with integration as a means of relating vocational and academic education.

The human race portrays an inherent instinct to protect whatever we value as our territory or property. This protectiveness, regretfully, is many times carried over to the field of education, and often times it leads to a serous breakdown in communications among educators. For years, academic and vocational educators alike have been promoting the idea of teaching their own seperate areas of subject matter - ie Math, Science, English, Animal Science, Soil Chemistry, Mechanics, etc. without ever trying to correlate the two curriculums. I would like to see a stronger effort among academic and vocational educators to coordinate their subject units and make both curriculums more meaningful to students. Many times when students see the relationship of vocational and academic subjects they respond by putting forth the effort required to them to accomplish the task, whether it be a math problem or mastering a skill in-mechanics. Examples of integrating subjects would be: 1) Math - a. proper reading of rules in the academic area in order to apply their use in the vocational area; b. figuring board feet in the academic area to use in a vocational setting; c. the study of ledger entries in the academic area to aid students in project book programs in the vocational area. 2) Science - a. collecting and identifying foliage of trees agricultural field crops, and various weeds customarily found around the home, affording the vocational instructor more time to spend on values and uses of these plants. 3) English - a. Explanation and spelling of various terms used in vocational areas - such as TDN, concentrate, roughage, environment, habitat, etc; b. writing of appreciation letters to business establishments where vocational students have visited; c. writing of essays dealing with individual student interest areas rather than having all students writing about a particular subject. 4) Animal Science - a. studying the life cycle of bees, cattle, or other forms of livestock rather than the drosophila fly or the spaghum moss. 5) Soil Chemistry - a. discussing and studying soil nutrients and abbreviations, allowing more time to deal with specific needs of specific plants.

I am the Agriculture teacher at the Hinkletown Alternative School where many of the aforementioned, and some unmentioned, methods of integrating were put to practice in the 74-75 school year. Integration of Academic and Vocational Education is a very important part of the philosophy at the Alternative School, and perhaps this is why it has been sucessful. The academic teachers at this school have demonstrated that with cooperation and initiative this philosophy of integration can be implemented and proven successful. Integration of subjects at the Alternative School has not been limited to Academic and Vocational, we have also coordinated several very successful projects by integrating vocational with vocational - ie. Agriculture and Homemaking, Carpentry and Nursing, and Agriculture and Homemaking, was the slaughtering, packaging, and freezing of a lamb. Many more examples could be cited, however, I feel the point has been made that integration can be a very successful part of the philosophy of education in our public school system.

Many opponents of this article will say that the academic teacher knows very little about vocational subject matter, therefore, why put forth the effort. If you re-read the examples cited for integration, you will see that all are very basic and require skills that many academic teachers possess. I feel that with the vocational and academic teachers cooperating their efforts gainful progress can be made toward a more compatible working relationship between academic and vocational educators.

Cattlemen's field day slated for August 16

The first summer Field Day co-sponsored by the Pennsylvania Cattlemen's Association, the Department of Animal Science, at The Pennsylvania State University, and the Pennsylvania Charolais Association will be held at Doverspike Brothers, Punxsutawney, Pa., August 16. Doverspike Brothers Farm is located on Pa. Route 536 about 12 miles South of Brookville at Ringgold.

Many features of the operation will be highlighted during the farm tour. The feedlot includes pre-conditioning building and lots, where cattle are brought before they go into the main feedlot for finishing. The Doverspikes also use pasture both for pre-conditioning and for finishing cattle. Most of the steers are carried to a choice grade weighing 1,050 to 1,200 pounds at sale time. Both wilted grass silage and corn silage are stored in upright silos, and both grass and corn silages are fed with high moisture corn grain throughout the finishing period. There will be a special demonstration of different slaughter cattle grades during the tour.

For both the finishing cattle and the cow herd, Doverspikes use several permanent and portable corral systems, which will be shown and discussed by Dr. L. A. Burdette, Chairman of the Summer Field Day Planning Committee.

The commercial herd is composed of several different types of straight bred and crossbred cows, and has been bred to some of the top performance tested bulls available from private breeders as well as through the Meat Animal Evaluation Center program conducted by the Pennsylvania Department of Agriculture, Penn State University and the Cattlemen's Association. In the first sale, held in March of 1974, Doverspike Brothers purchased the top-performing Charolais and Angus bulls for their commercial herd and for their purebred Charolais herd. Visitors to the farm on August 16 will see cows resulting from different corssbreeding programs.

The Doverspike purebred Charolais herd, upon which polled Charolais bulls are used, provide some of the bulls for the commercial herd, as well as for sale to other breeders and producers. The purebred herd is maintained similarly to the commercial herd, and has been on performance test for the past four years.

Most of the 330 acres of corn has been planted by no-till methods, which will also be discussed by specialists. Some of the pasture and hay land has also had legume introduced by sod-seeding techniques. The advantages of sod-seeding are the reduced cost compared to conventional seed bed preparation, decreased erosion risk since the ground is not tilled conventionally, and a quicker recovery of the pasture for grazing or for hay.

Probably one of the most outstanding features of the Doverspike operation is that much of the land had been previously strip-mined for coal and reclaimed. Most of the really productive pasture has had the coal removed, regarded to contour, limed, fertilized and seeded. During the reclaiming process, ponds and lakes have been constructed for cattle water and for recreation.

According to Lowell L. Wilson, Secretary of the Pennsylvania Cattlemen's Association, much of the reclaimed land is more productive for pasture and grain than before it was strip-mined. "The Doverspike operation shows what can be done with conscientious removal of the top soil and other material over coal, and then carefully replacing the land to an even more useful state," Wilson stated.

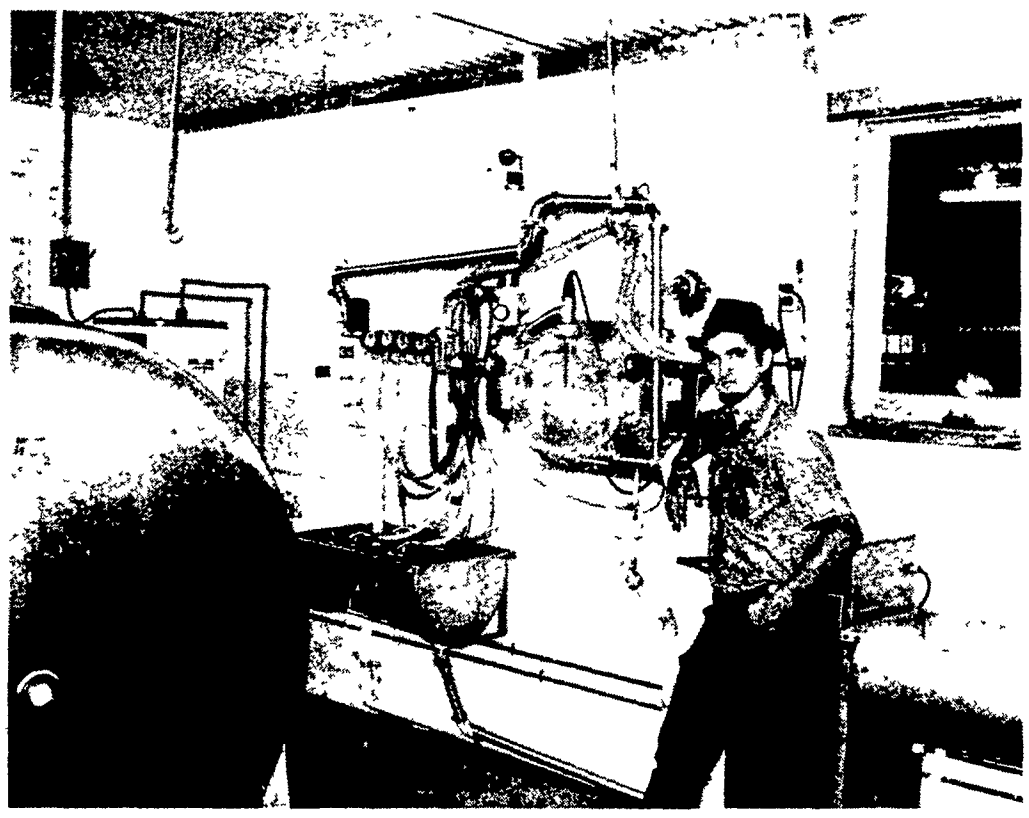
Many other new techniques will be seen, such as the use of large round bales, during the tour. There is something for everyone involoved with any type of beef production on the summer cattlemen's tour. A beef pit barbecue luncheon will be served, and special activities are planned for the ladies. More information on the tour may be obtained by writing to The Pennsylvania Cattlemen's Association, 862 Webster Drive, State College, Pa. 16801.

AGWAY

ANOTHER SATISFIED USER OF

STA-RITE Milking Equipment

and SUNSET Milk Tank



Tom Lapp, Gap R D , says he likes the simpleness and compactness of the design of the system

"It's pretty simple," he comments, "as far as getting ready to milk, and wash-up are concerned. It's quick and easy. Also this 800 gallon round Sunset tank takes up only about the same space as my old 450 gallon square tank "

Tom also says, "the Agway installation and service crews are very efficient, and after installation, the servicemen were always prompt in handling any question or problems that came up."

See these men for expert help in designing a milking system to fit your operation.

Co-op group supports grain sale to Russia

WASHINGTON, D.C., July 17 - The nation's grain cooperatives today commended Secretary of Agriculture Butz on his handling of the sensitive issue of another major U.S. grain sale to the Soviet Union.

In a letter to Secretary Butz, Glen D. Hofer, vice president, grain division, National Council of Farmer Cooperatives, said that grain cooperatives are campaigning to increase public awareness of the positive aspects of such a trade.

The NCFC grain spokesman noted that U.S. grain sales to Russia of some 10 to 20 million tons were well within our capability and should be welcome news to the U.S. public as well as to the farm community.

Hofer added that with prospects of 2 billion bushels of wheat and 6 billion bushels of corn this year, the U.S. should have plenty of grain to meet domestic needs and still have ample stocks to compete aggressively in the world market with Canada, Australia and other major grain-producing countries.

"Given the sensitivity of world grain prices to the supply-demand balance," Hofer said, "it's obvious that substantial export sales must continue if U.S. farm prices are to balance production costs."

Reduce Impact of Oil Imports

The farmer cooperative official emphasized that consumers and the media shouldn't lose sight of the fact that agricultural exports have helped reduce the impact of increasingly expensive oil imports.

In 1973, he said, agricultural trade of $17.7 billion outpaced oil imports of approximately $15 billion. This helped result in a U.S. trade surplus of about $1.2 billion. Last year, agricultural exports of $22 billion kept $25 billion in oil imports from becoming a trade deficit disaster.

Hofer also noted that in order to keep productive capacity viable, a reasonable return on agricultural investment is essential. "This means that export sales must be made," he said.

"Over 50 percent of our wheat, and about 25 percent of our corn must find a home in foreign markets," Hofer added. "Otherwise, the price structure which furnishes the American farmer with his only incentive to produce, will fall to non-profit or loss levels."

The grain division of the National Council of Farmer Cooperatives represents the major grain marketing cooperatives of the U.S., with total annual sales of 1.7 billion bushels.

Tractor pull slated for Cecil Fair

Cecil County Fair's expanded tractor pull promises excitement galore!

Wednesday, July 30's pull, starting at 7:00 p.m., will begin the show with field stock, modified, open, and superstocks competing for cash and trophies for winners of each class; plus $200 for the winner (tractor and driver) from Cecil County of the largest 2 wheel drive class and $50 for the winner (out of county) of the largest 2-wheel class.

The action will continue on Thursday, July 31 at 7:00 p.m. with garden and 4-wheel drive tractors. Cash and trophies for winners for each class will be presented, plus $100 for the winner (tractor and driver) from Cecil County of the 4-wheel drive class.

The tractor pulls are produced by the Cecil County Young Farmers with Towson P.C.A. furnishing trophies and the extra $350 cash prizes donated by Swede Swenson of Lewisville Supply, downtown Lewisville.

Crafts display set for Allentown

"The Crafts Affair" is a brand new feature at this year's Allentown Fair, July 31 - Aug. 9. Located between the Bier Garten and the Free Stage at the east end of the grounds, a pavilion will house 25 booths at which skilled artisans will display their talents 11:30 a.m. to midnight daily throughout the fiar.

"Many have exhibited in shows throughout the East, including the Kutztown Folk Festival, and are members of the Pennsylvania Guild of Craftsmen," according to William Savacool, show coordinator, who also manages the Village Center Shoppes in Trexlertown where some of the fair exhibitors show their awares.

Among the craftsmen who have signed for "The Craft Affair" are: Mary Jane Haaf, sewing patchwork toys, bonnets, aprons and Raggedy Ann dolls; Mr. and Mrs. Richard Mahorsky, of Nazareth, copper and brass sculpture in abstract and realistic designs; Evelyn Sornisky of Telford, making stained glass lampshades and unusual window hangings.

George and Pauline Kline, Hamburg, noted Pennsylvania Dutch artists and designers specializing in hand-painted benches, chairs, milk cans and wall plaques; Joanne Skilton of Emmaus, working with macrame and sand terrariums; Kathy Brashears, Applehead and bottle dolls; Mary Herring, Slatington, cermacis, painted stones and dried flowers.

Patricia Kuhns, Trexlertown, stained-glass artist, creating wedding bells for newlyweds and storks for new babies; Paul Dautruch, Reading, working in copper, brass and tin to make pole lights, sconces and pitchers; Maur and Doe Levan will recreate the Village Ice Cream Parlour with all the old delights; Patty Frantz, Allentown, creating sand terrariums.

Mergery Zeller, Emmaus, and her daughters create silver, trinket and stained glass jewelry and plaster of Paris epoxied plaques; Eleanor Ficek, Allentown, hand-crafted decoupage plaques and wall hangings; John and June Best, Pleasantville, N.J., candlemakers; Walter Squyres, Orwigsburg, broommaker; Bill Treon and Tom Doering, silver and gemstone jewelry; E. Stratton McCloskey Jr., sculpting glass miniatures.

There are still a few spots open for the "Crafts Affair," Savacool said. Any interested craftsmen may call him at 395-3658.

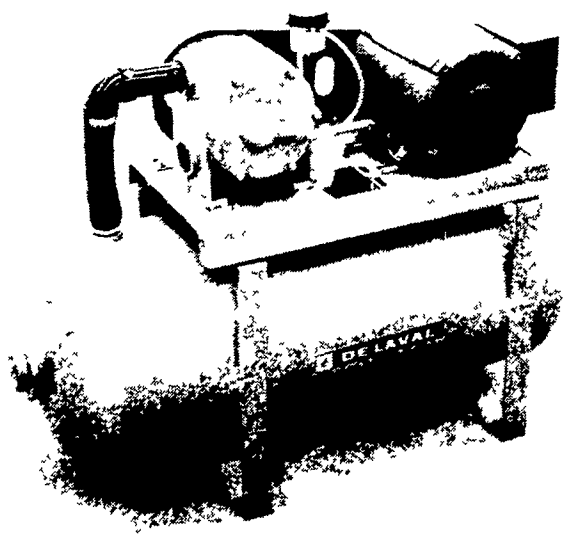
The De Laval Unitized Vacuum Group



OUR RUGGED Space Saver

Because the tank and pump are "unitized", the De Laval vacuum pump takes up less space. That means more room in the parlor. We designed it for easy cleaning and maintenance, ruggedness, long pump life, and quieter operation. With a sufficient capacity for every dairy farm. See one today.

Berks Co. junior Holstein day held

by: Lucy Trexler
Berks Correspondent

BERNVILLE: The John Stump Farm, Bernville, R2 was the location for the Berks County Jr. Holstein Field Day held July 17. The day began with registration at 8:30 followed by several hours of fitting and working with calves, supplied by John Stump. Each member in the 8-14 age group was paired with an older member between 15 and 21.

The knowledge and skills of the older members aided the younger members in the cleaning and clipping of their assigned animals. The finer points in showing cattle were also reviewed and practiced.

After lunch the showing began with the 8-11 year olds competing in the fitting category. Judging the youngsters and their calves was Carl Brown. Corinna Moyer placed first in the fitting competition followed by Cathy Ohlinger, second; Donna Stump, third; Gary Houseman, fourth; Jan Adams, fifth and Charles Seidel, sixth. Immediately following was the competition for showmanship. The first place winner was Gary Hauseman. Scott Troutman was second, Donna Stump, third; Jay Bicksler, fourth; Todd Miller, fifth; and Cathy Ohlinger, sixth.

The ninety degree temperature did not keep the show from continuing despite some occasional trouble from the hot and weary calves. In the 11-14 division first place in fitting was awarded to Penny Bicksler, second went to Scott Miller; third, Eileen Rohrbach; fourth, Alan Rohrbach; fifth, Mark Moyer and sixth, Bruce Gauker.

The showmanship Judging, which rounded out the day, was won by Helen Seidel. Daryl Harnish won second, Luke Wicks, third; Penny Bicksler, fourth; Scott Miller, fifth; and Bruce Latshaw, sixth.

Instrumental in organizing the day's events were Sue Seidel, president of the Jr. Holstein Club and Phoebe Ruth, vice-president. Joe Ruth, Fleetwood is the club's advisor.

Agronomists receive honors

UNIVERSITY PARK - Agronomists of Penn State University won three of the four top awards for achievements during meetings of the Northeastern Branch, American Society of Agronomy, July 14 in Guelph, Ontario. The occasion was the branch's annual meeting held at the University of Guelph.

The awards honor Northeastern agronomists for exceptional contributions to science, education, and service. The outstanding graduate in agronomy was also named.

The research award went to Dr. Louis T. Kardos, professor of soil physics. Dr. John E. Baylor, professor of agronomy extension, received the extension-industry award. Jeffrey A. Risser of Leola was named the outstanding agronomy graduate in the Northeast. Last year the Northeastern Branch award for outstanding teaching went to Dr. Joseph D. Harrington, professor of agronomy.

In 1962 Kardos became coordinator of the waste water renovation and conservation research program at Penn State. He has been extremely active in experiments involving the "living filter" concept of waste water disposal.

Kardos has served as a consultant to other universities and metropolitan sanitary districts.

The career of Dr. John Baylor has been largely in the area of forage crops production and management. Since 1957, he has conducted the Pennsylvania Hay Show program. He introduced chemical analysis as a guide for judging hay in competition. This program was selected by "Farm Technology" magazine as one of the top 20 agricultural programs in the nation.

Baylor reorganized and up-dated the Pennsylvania Grassland Club, which evaluates the efficiency of forage production, preservation, and utilization of diary and livestock farmers.

Jeffrey A. Risser, outstanding June graduate, produced a grade point average of 3.6 out of a possible perfect 4.0. In addition to the traditional courses in agronomy and biological science, Risser completed advanced undergraduate courses in chemistry, mathematics, and physics.

At the end of his junior year he was awarded a travel grant. The Leola youth was the only undergraduate with a graduate student and faculty group touring several agronomy departments in the midwest. The remainder of the summer was spent working for the Penn State agronomy department on special problems relating to ongoing research in soil chemistry and environmental quality.

Risser promoted

Commonwealth National Bank announces the promotion of Mr. John W. Risser to the office of Assistant Manager of the Agri-Loan Department. Prior to his promotion, Mr. Risser had served as Agricultural Representative since coming with the Bank in 1973.

Born in Lebanon, Mr. Risser is a graduate of Annville Cleona High School. He attended McPherson College and graduated from Kansas State University where he majored in Agricultural Economics. He is a member of the American Institute of Banking.

Mr. and Mrs. Risser presently reside in Manheim and are members of the Zion Lutheran Church.

Record grain crop will not drop consumer prices

INDIANAPOLIS, IN-DIANA, - Prospects of record U S grain crops this year are not likely to result in any appreciable decline in consumer food prices, William J Kuhfuss, president of the American Farm Bureau Federation said here today He addressed a luncheon meeting of the Indianapolis Downtown Kiwanis club.

The head of the largest general farm organization in the nation with 2 4 million member families said that continued high labor, processing and transportation costs involved in moving farm goods to the consumer will offset any anticipated drop in farm commodity prices that might result from record output

'Farm commodity prices are only a part of the total consumer price," the national farm leader said, 'and as long as we have continued federal budget deficits and resulting inflation, there is not much prospect for a decline in costs at the supermarket '

Kuhfuss noted, however, that the U S Department of Agriculture was predicting a rise of 6 to 8 percent in food prices throughout 1975 as compared with increases of more than 14 percent in the past two years

The Federation president said that the announced sales of 3 5 million metric tons of wheat to the Soviet Union by two grain companies this week would have little if any impact on American consumer food prices

On the basis of July 1 conditions, the U.S wheat crop is estimated at 2 2 billion bushels or 59.5 million metric tons, a 22 percent increase over last year's record crop, Kuhfuss said, and our domestic needs normally run approximately 800 million bushels

"Our corn crop is estimated at more than 6 billion bushels, or 154 6 million metric tons, so that even if the Soviet Union splits its grain purchases between wehat and corn, and increases its total purchases to 10 million tons, it will not put a strain on our supplies

"Certainly there should be no reason for the baking interests to repeat their scare tactics of 1974 when they predicted that record wheat exports would mean $1 for a loaf of bread

' Export markets for U S farm commodities are vital to the entire economy, as well as to the farming sector Our farm exports have played a major role in improving our balance of payments and in paying for the skyrocketing costs of increased oil imports Farm exports have brought a sharp reduction in government farm program costs for the taxpayer These costs have dropped from some $4 billion in calendar 1972 to an estimated $800 million this year

Farm exports also mean more jobs for those assembling, processing and distributing agricultural exports In 1973, more than 450,000 people had jobs in these categories

'Our farm economy depends heavily on exports Production from one out of every four harvested acres in the United States moves into the export market. In fiscal 1974, we exported 67 percent of our wheat production, 47 percent of our soybeans, 24 percent of our corn, and 44 percent of our cotton," Kuhfuss pointed out

Reporting on the spectacular production job of American farmers, Kuhfuss said that a recent study shows the wide variety of food supplied to the average U S family in a period of a year This includes 694 pounds of meat and fish: 598 pounds of fresh, frozen and processed fruits and juice; 1 154 pounds of vegetables; 592 pounds of grain products; 349 pounds of poultry products; and 1,136 pounds of dairy products

And although food proces have risen in the past several years, Kuhfuss pointed out that the average family spends 17 percent of its disposal income for food as compared with 23 percent 25 years ago

"Much of the increases in food and other consumer items is the result of excessive government spending, the major cause of inflation. Higher food prices are not the cause of inflation - they are the result

' It took this country more than 180 years to reach its first $100 billion budget in 1962 For fiscal year 1976, which started July 1, spending estimates point to $358.9 billion, and the federal budget deficit is projected at more than $60 billion for this fiscal year.

' The future potential for renewed inflation based on current budget projections demands firm action by this Congress to demonstrate fiscal irresponsibility and determined inflation control

"The American Farm Bureau Federation has called for the House and Senate to adopt a concurrent resolution mandating that so-called uncontrollable expenditures in the 1976 Administration budget be reduced by a minimum of 5 percent through basic changes in legislation where necessary. At the same time, Appropriations Committees of both Houses are being called upon to reduce the controllable programs by 10 percent If these actions are taken a savings of $25 billion can be expected While this would not eliminate the estimated 1976 deficit, it would reduce sharply and cut down its potential for fueling runaway inflation "

Fiddler's picnic well attended

Lucy Trexler
Berks Correspondent

Banjos rang in the hills of northern Berks County Sunday, July 20, as the Lehigh Valley Folksong Society presented its First Annual Old Time Fiddler's Picnic.

A crowd of over five hundred enjoyed the music of 25 musicians as they played and sang traditional folk and bluegrass music. Beginning the day were the Shimerville Sheiks, of the Lehigh Valley and Judy Voehringer, Kempton, performing oldtime gospel songs. All sorts of instruments appeared on the stage throughout the course of the day - concertinas, autoharps, banjos, tin whistles, Irish pipes but primarily fiddles and guitars. The types of music ranged from modern folksongs to very old ballads and even a few traditional Pennsylvania Dutch songs

The musical highlight of the day was Pop Hafler, an eighty-four year old fiddler from Quakertown who performed old reels and fiddle tunes accompanied by a banjo and guitar Despite the heavy storm and thunder and lightning outside the covered pavilion Pop performed splendidly, completely unshaken. Another noted fiddler was Bruce Young of State College who just got up on the stage and fiddled in the tradition of all great fiddlers

As an accompaniment to the music outside the pavilion were craftspeople from the Lehigh Valley and as far away as Ravenna, Ohio and Cazenovia, New York Stained Glass work, corn husk dolls, carved spoons and bowls, custom made wood furniture and sand candles represented only several of the crafts represented among the twenty craftspeople exhibiting

Young and old alike came and enjoyed the festivities presented by the Lehigh Valley Folksong Society Responsible for planning the day's events were Marcie Reusch, Easton, Lucy Trexler, Trexler and Keith Brintzenhoff, Mertztown Despite the rain and high winds the Fiddler's Picnic will undeoubtedly continue in the years to come

Bank Notes

LANCASTER, PA - James E. "Ted" Watt has been named commercial loan officer for National Central Bank, according to an announcement by J. Barry Myers, bank executive vice president and regional administrator.

Watt joined National Central in 1974. Most recently he has been working in the bank's credit department in York. He began his banking career as a credit analyst for Manufacturers Hanover Trust Company He later became a commercial loan officer for the Bank of Maine, Waterville, Maine and in 1973 he was named assistant vice president of the Central National Bank in Waterville

Watt is a graduate of Manheim Township High School and Hobart College and has completed several professional banking courses

While living in Maine, he was active in a variety of civic and community affairs. He served as a volunteer and fund raiser for the Community Chest and the Boys Club, and was a member of the Kiwanis Club and the Chamber of Commerce

Watt is the son of Mr and Mrs. David Watt of 145 North Concord Street, Lancaster

He is married to the former Ellen Arnold of Delhi, New York She is the daughter of Mrs Barbara Arnold Kennedy of Delhi, N.Y. and the late Rev. Alfred C. Arnold, former rector of the St. James Episcopal Church in Delhi.

They have two children and live at 349 College Avenue.

Allentown fair features energy exhibit

ALLENTOWN, Pa. - ENERGY, a free exhibit opening July 31 at the Allentown Fair, is for those who have heard much about the energy crisis, but want a better understanding of what the problem is and what can be done about it.

ENERGY comes to the fair in a caravan of three 50-foot trailers filled with animated exhibits, films and visitor-operated consoles. A specially trained science teacher from the American Museum of Atomic Energy in Oak Ridge, Tenn., will be available to answer questions. The exhibit located at the eastern end of the fairgrounds will be at the fair until August 9.

ENERGY is a major educational exhibit of the U.S. Energy Research and Development Administration (ERDA). ERDA operates several traveling exhibits from the American Museum of Atomic Energy.

All types of energy currently in use are covered by the exhibit. So are possible future energy sources. Thus by seeing ENERGY the visitor can gain an overall picture of the nation's energy problems and their effect on America's standard of living.

For example, present natural gas supplies are expected to be depleted within 15 to 40 years, and several exhibits explain how additional natural gas can be obtained from the nation's huge coal reserves.

Petroleum, the mainstay of America's transportation and major fuel for generating electric power, is expected to be exhausted in about 50 years. But, as one exhibit explains, petroleum may be obtained from the processing of oil shale.

Through other exhibits, visitors may observe the process of developing power through magnetohydrodynamics, a sort of "supercharger" for conventional power generators. They can also see exhibits on solar heat collection and geothermal electric power generation.

Several other exhibits demonstrate the principles of uranium fission nuclear reactors currently generating electricity around the country. Those being studied for future use, such as the breeder reactor, which would make more fuel than it consumes, and the hydrogen fusion reactor, which would operate on the same principle as the sun are also demonstrated.

Besides exhibits there are many question and answer consoles where visitors can measure their "energy quotients."

The exhibit, like the American Museum of Atomic Energy, is operated for ERDA by Oak Ridge Associated Universities, a nonprofit educational and research organization of 42 Southern Colleges and universities.

Six Atlantic Breeders Cooperative employees, totaling 175 years of service, recently received the Quarter-Century Award from the National Association of Animal Breeders.

They are (from left): Willis Ritchey, Service Manager; J. Floyd Weidler, Production Manager; Robert Crissman, Controller; Roger Emig, Marketing Director; David Yoder, General Manager; and Sterling Ferree, Records Director. All are employed at the Cooperative's headquarters near Lancaster.

Each man was presented a handsome engraved plaque recognizing his record of "devoted service in livestock improvement."

Computer satellite serving Iran's farms

BLUE BELL, Pa. - Sperry Univac, a division of Sperry Rand Corporation, announced receipt of its first order for a computer system to be supplied to Iran. It will be the largest single computer installation in the Middle Eastern country.

Iran's Ministry of Agriculture and Natural Resources, which is undertaking an ambitious program to expand agricultural production through the computer processing of satellite data, has acquired a large SPERRY UNIVAC TM 1110 computer system. The schedule calls for the system to go live in October.

The Government of Iran, which plans to achieve a steady seven percent growth rate in the agricultural sector, is embarking on what is considered the most advanced project the world has yet seen in the use of satellite-generated data to analyze scientifically the optimum use of natural resources.

Years of research demonstrate value of lime and fertilizer

Ninety-four years ago studies began at The Pennsylvania State University which determined the best lime and fertilizer conditions for growing crops profitably. The fields became famous as the Jordan Soil Fertility Plots, an outstanding example of achievements within the nation's agricultural experiment stations observing their 100th anniversary this year.

During 77 years of continuous soil treatments, the Jordan Soil Fertility Plots showed the need for a combination of lime and commercial fertilizer to grow crops profitably. Farmers by the thousands visited the plots yearly, observing effects of lime, fertilizers, and manure. Scientists from all over the world visited the plots for knowledge and inspiration.

The soil fertility plots at Penn State were laid out by Dr. Whitman H. Jordan in 1881. Before field experiments were discontinued in 1957, they became famous as the oldest extensive soil fertility studies in the nation. Dr. Jordan's work was the first analysis by an American scientist of the effect upon crops of different commercial fertilizers and manure.

The work is being recalled this year as scientists with the Agricultural Experiment Station at Penn State join researchers in the 50 state universities in observing the Centennial of the stations. Each station is the research division of the college of agriculture.

The research demonstrated, among other things, that phosphorus deficiency is typical of many eastern American soils.

Limed land produced yields with cash value averaging nearly double that of crops on unlimed soil. The research proved it is equally uneconomical to apply lime to acid soil without adding fertilizer. Where lime and complete fertilizers were applied, the increased value of crops over untreated soil was over 8 times that of lime alone and 6 times that of a complete nitrogen-superphosphate - potash fertilizer without lime.

The soil experiments were largely responsible for greatly increased use of agricultural lime in Pennsylvania. In 1926, some 357,000 tons of agricultural lime were used in the Commonwealth. By 1946, lime use had increased to 1,436,000 tons - an increase of over 300 per cent in 20 years. Today, with less land under cultivation, Pennsylvania farmers are using over 1 million tons of lime annually.

In pre-automobile days, the Pennsylvania Railroad conducted farmers' excursions to the University, enabling farmers to study the Jordan plots. The farmers were greatly impressed, for example, in comparing plots growing only weeds such as sheep sorrel with nearby plots supporting dense growth of clover.

Over the years, Penn State scientists found that 75 per cent of the Commonwealth's farmland contains acid soils. In one area of the Jordan Soil Fertility Plots, no lime was used over a 64 year period. Corn yields decreased from 79 bushels to 18 bushels per acre, oats from 51 to 30 bushels, wheat from 27 to 12 bushels, and mixed hay from 5,000 to 500 pounds per acre. Soil acidity increased even through the plots received a complete fertilizer annually.

Another study covering 56 years examined loss in cash values where a complete fertilizer was used without lime. Prices in 1941 showed corn crop shrank in value from $53.38 to a minimum of $8.07 per acre. Oats fell from a value of $25.34 to $12.50 per acre, wheat dropped from $29.29 to $1.65,and hay value went from $23.88 to a minimum of $1.62 per acre.

This steady decline in cash value could be reversed by liming, the experiments proved. Despite 40 years of cropping without lime, sulfate of ammonia fertilizer and lime restored plots to their orginial cash value through renewed fertility. The results also showed that barnyard manure, the farmer's old standby, was less productive than sulfate of ammonia in supplying nitrogen.

Experiments in the early 1900's examined the merits of the various forms of lime products such as pulverized limestone, hydrated lime, ground burnt lime, marl, precipitated lime carbonates from industrial plants, and blast furnace slag. The studies concluded that the various forms of lime have similar crop producing value when applied to the soil in equal units of lime oxides in similar degrees of fineness. Farmers were advised to purchase the cheapest form of available lime oxides per unit applied to the land.

REVERED

A man from Boston spent a whole evening listening to a Texan boast about the heroes of the Alamo Finally the Texan said, "I'll bet you never had anyone that brave in Boston." "Did you ever hear of Paul Revere?" asked the Bostonian "Paul Revere?" said the Texan "Isn't that the guy who ran for help?"

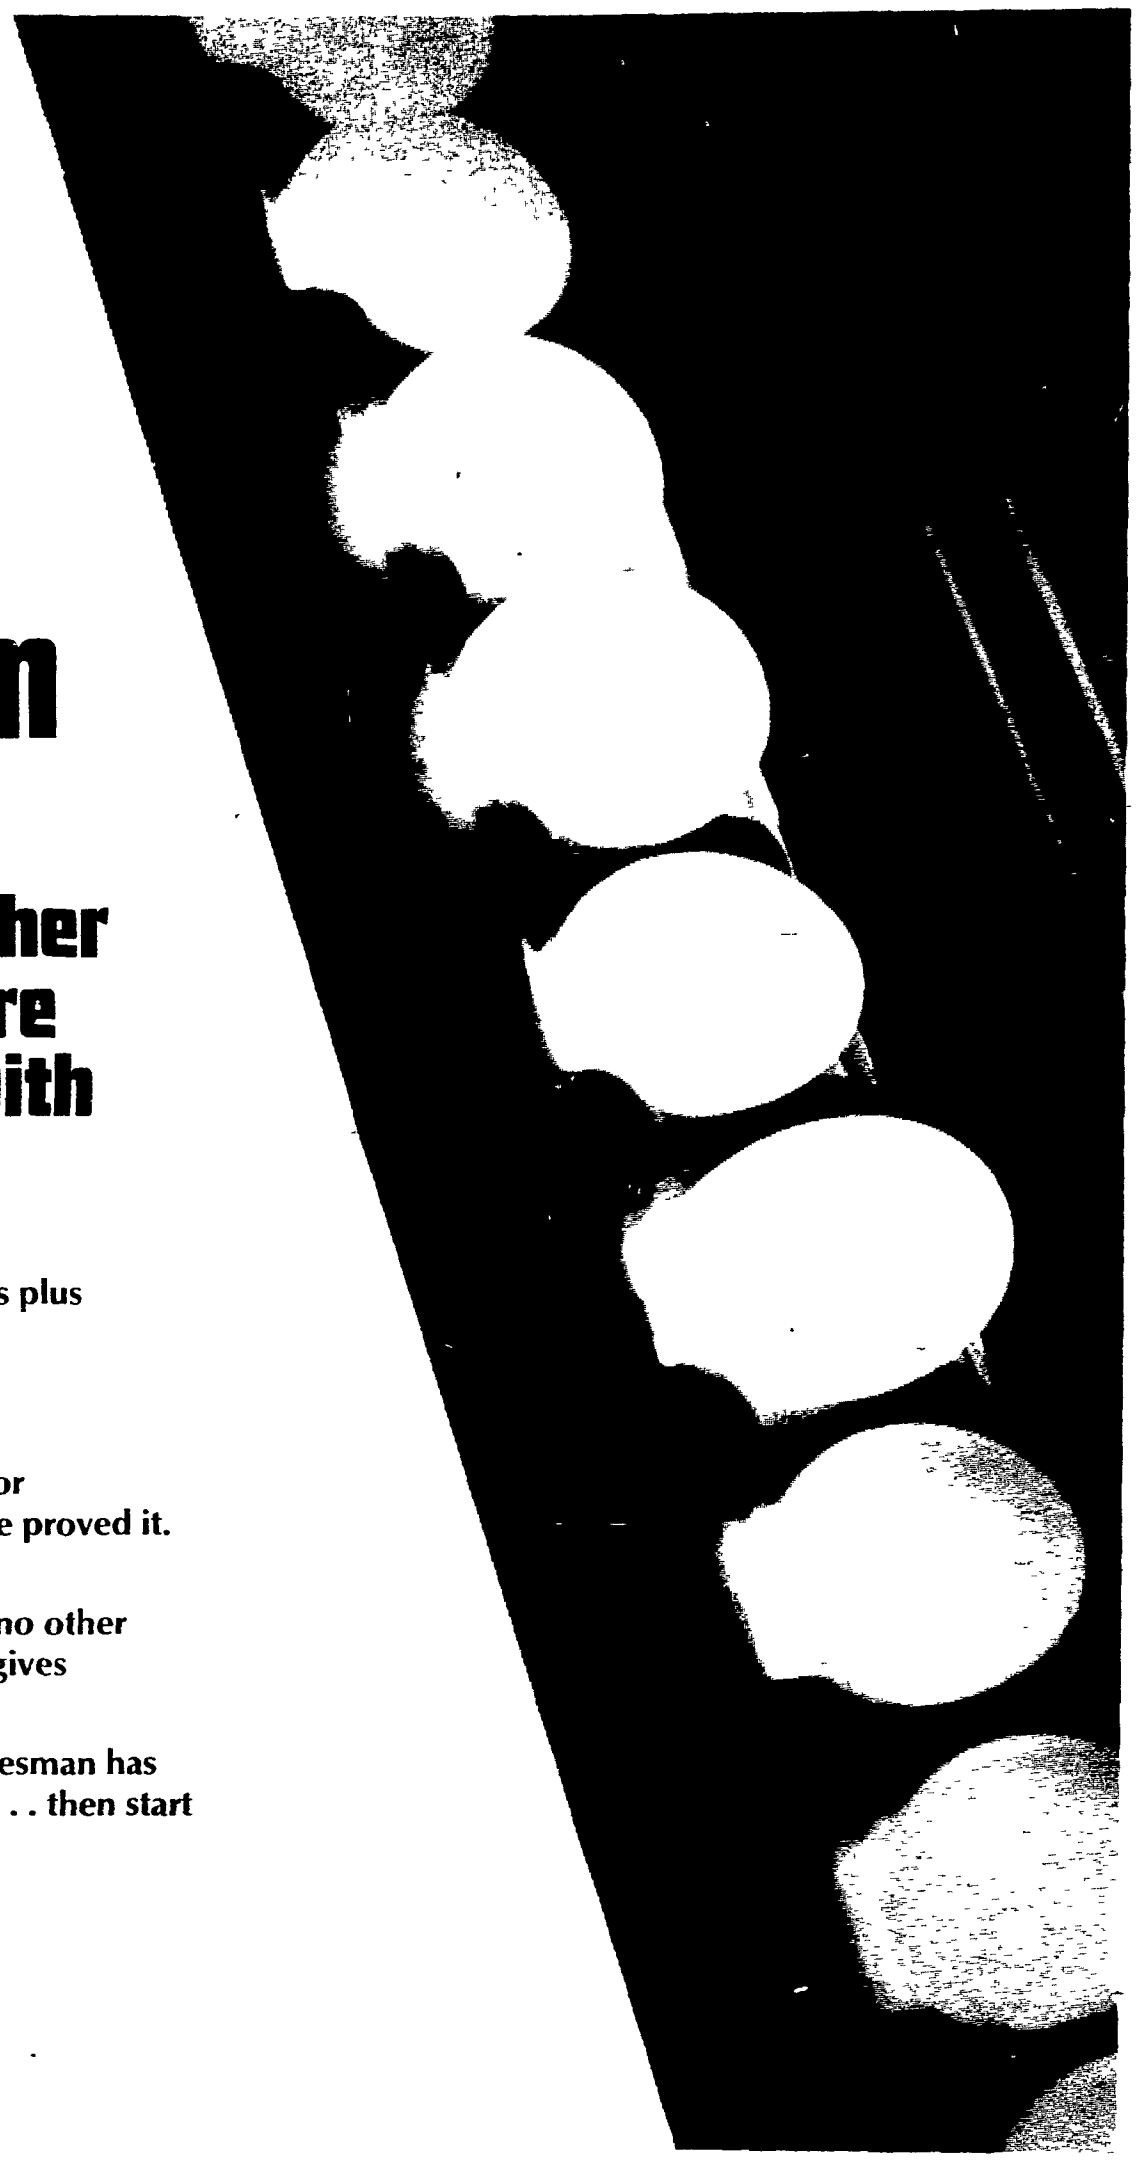
AGWAY



AGWAY SHELL FIRM FEEDS

Stronger, smoother shells mean more saleable eggs with more Grade A's

Start with good birds with healthy guts. Add Agway Shell Firm™ feeds plus night feeding.

Results?

A 3% increase in grade A yield.
Two years of field tests on six major strains of high-intensity layers have proved it.

Tests involved millions of birds.
Under conditions like yours. And no other program has yet been found that gives you a greater net return.

Your Agway Poultry Enterprise Salesman has the programs and proof. See him . . . then start selling more Grade A eggs.
